*Moral Investigations* Henry L. Ruf, 1977-01-01      **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1979      *Ethics* Ronnie Littlejohn, 1993 Iran's heritage is as varied as it is complex and the archaeological philological and linguistic scholarship of the region has not been the focus of a synoptic study for many decades. Thus *The Oxford Handbook of Ancient Iran* fills a longstanding gap in the literature of the ancient Near East providing up to date authoritative essays by leading specialists based both inside and outside of Iran on a wide range of topics extending from the earliest Paleolithic settlements in the Pleistocene era to the Islamic conquest in the 7th century AD. The volume is divided into sections covering prehistory the Chalcolithic the Bronze Age the Iron Age the Achaemenid period the Seleucid and Arsacid periods and the Sasanian period concluding with the Arab conquest of Iran. In addition more specialized chapters are included that treat numismatics Elymaean Arsacid Persid and Sasanian religion the Avesta and Zoroastrianism languages proto Elamite Elamite Akkadian Old Persian Greek Aramaic Parthian and Middle Persian political ideology calendars textiles administrative seals and sealing Sasanian silver and reliefs and political relations with Rome and Byzantium. No other single volume covers as much of Iran's archaeology and history with the same degree of authority. This work will be of vast interest to a wide range of students and scholars from archaeologists and art historians to philologists Classicists ancient historians religious historians and numismatists      **The Philosopher's Index**, 2006 Vols for 1969 include a section of abstracts

**Empirically Informed Ethics: Morality between Facts and Norms** Markus Christen, Carel van Schaik, Johannes Fischer, Markus Huppenbauer, Carmen Tanner, 2013-10-07 This volume provides an overview of the most recent developments in empirical investigations of morality and assesses their impact and importance for ethical thinking. It involves contributions of scholars both from philosophy theology and empirical sciences with firm standings in their own disciplines but an inclination to step across borders in particular the one between the world of facts and the world of norms. Human morality is complex and probably even messy and this clean distinction becomes blurred whenever one looks more closely at the various components that enable and influence our moral actions and ethical orientations. In that way morality may indeed be located between facts and norms and an empirically informed ethics that is less concerned with analytical purity but immerses into this moral complexity may be an important step to make the contributions of ethics to this world more valuable and relevant.

**Contemporary Debates in Moral Theory** James Dreier, 2009-02-04 *Contemporary Debates in Moral Theory* features pairs of newly commissioned essays by some of the leading theorists working in the field today. Brings together fresh debates on the most controversial issues in moral theory. Questions include: Are moral requirements derived from reason? How demanding is morality? Are virtues the proper starting point for moral theorizing? Lively debate format sharply defines the issues and paves the way for further discussion. Will serve as an accessible introduction to the major topics in contemporary moral theory while also capturing the imagination of professional philosophers      **Working Virtue**

Rebecca L. Walker, Philip J. Ivanhoe, 2007-01-04 *Working Virtue* is the first substantial collective study of virtue theory and contemporary moral problems. Leading figures in ethical theory and applied ethics discuss topics in bioethics, professional ethics, ethics of the family, law, interpersonal ethics, and the emotions. Virtue ethics is centrally concerned with character traits or virtues and vices such as courage, cowardice, kindness, heartlessness, and generosity, stinginess. These character traits must be looked to in any attempt to understand which particular actions are right or wrong and how we ought to live our lives. As a theoretical approach, virtue ethics has made an impressive comeback in relatively recent history, both posing an alternative to and in some ways complementing well-known theoretical stances such as utilitarianism and deontology. Yet there is still very little material available that presents virtue ethical approaches to practical contemporary moral problems such as what we owe distant strangers, our parents, or even non-human animals. This book fills the gap by dealing with these and other pressing moral problems in a clear and theoretically nuanced manner. The contributors offer a variety of perspectives, including pluralistic, eudaimonistic, care-theoretical, Chinese, comparative, and stoic. This variety allows the reader to appreciate not only the wide range of topics for which a virtue ethical approach may be fitting but also the distinctive ways in which such an approach may be manifested.

**Conscience in Moral Life** Jason J. Howard, 2014-03-19 The notion of conscience remains one of the most widely used moral concepts and a cornerstone of ordinary moral thinking. This book explores where this widespread confidence in conscience stems from by examining the history of conscience as a moral concept and its characteristic moral phenomenology. Jason Howard provides a comprehensive reassessment of the function of conscience in moral life, detailing along the way the manifold problems that arise when we believe our conscience is more reliable than is actually warranted. The result is a step-by-step evaluation of our most accepted assumptions. Howard goes on to argue from a phenomenological perspective that conscience is indispensable for understanding moral experience. He capitalizes on a dialectical perspective developed by Hegel and Ricoeur in which conscience is seen as the recognition of the other and integrates this with work in the philosophy of emotion, arguing that conscience is best seen in terms of the function it serves in moderating the moral emotions of shame, guilt, and pride.

Research in Education, 1974 *Resources in Education*, 1988

*Teaching Literature* T. Agathocleous, A. Dean, 2002-12-16 In *Teaching Literature*, scholars explain how they think about their everyday experience in the classroom using the tools of their ongoing scholarly projects and engaging with current debates in literary studies. Until recently, teaching has played second fiddle to literary research as a mode of knowledge in academia, leaving new teachers with nowhere to turn for advice about teaching and no forum for discussion of the difficulties and opportunities they face in the classroom.

**Key Terms in Ethics** Oskari Kuusela, 2010-11-04 The book offers a comprehensive overview of the key terms, concepts, thinkers, and major works in the history of this key area of philosophical thought. An indispensable compass for students coming to the subject for the first time and a very handy for more advanced undergraduate students as a reference tool.

**Morality in Everyday Life** Melanie Killen, Daniel Hart, 1999-10-13 This collection highlights research on morality in human development

**Mind and Morals** Larry May, Marilyn Friedman, Andy Clark, 1996 The essays in this anthology deal with the growing interconnections between moral philosophy and research that draws upon neuroscience developmental psychology and evolutionary biology The essays in this anthology deal with the growing interconnections between moral philosophy and research that draws upon neuroscience developmental psychology and evolutionary biology This cross disciplinary interchange coincides not accidentally with the renewed interest in ethical naturalism In order to understand the nature and limits of moral reasoning many new ethical naturalists look to cognitive science for an account of how people actually reason At the same time many cognitive scientists have become increasingly interested in moral reasoning as a complex form of human cognition that challenges their theoretical models The result of this collaborative and often critical interchange is an exciting intellectual ferment at the frontiers of research into human mentality
