Towards a Theory of Relativity of Truth in Morality and Religion Charles Goossens,1990 This study argues for a model in which moral truth is presented as truth in the perspective of certain social commitments while religious truth is interpreted as truth in the perspective of religious experience It theorizes that relativity need not conflict with universality Truth from the perspective of the outsider is therefore truth without qualification The Psychology of Personhood Jack Martin,Mark H. Bickhard,2012-11-29 What is a person Surprisingly little attention is given to this question in psychology For much of the past century psychology has tended to focus on the systematic study of processes rather than on the persons

who enact and embody them In contrast to the reductionist picture of much mainstream theorising which construes persons as their mental lives behaviours or neurophysiological particulars The Psychology of Personhood presents persons as irreducibly embodied and socially situated beings Placing the study of persons at the centre of psychology this book presents novel insights on the typical everyday actions and experiences of persons in relation to each other and to the broader society and culture Leading scholars from diverse academic disciplines paint an integrative portrait of the psychological person within evolutionary historical cultural developmental and everyday contexts

Hermeneutic Moral Realism in Psychology Brent D. Slife, Stephen Yanchar, 2019-02-12 Traditional sources of morality philosophical ethics religious standards and cultural values are being questioned at a time when we most need morality's direction Research shows that though moral direction is vital to our identities happiness productivity and relationships there is a decline in its development and use especially among younger adults This book argues that hermeneutic moral realism is the best hope for meeting the twenty first century challenges of scientism individualism and postmodernism In addition to providing a thorough understanding of moral realism the volume also takes preliminary steps toward its application in important practical settings including research psychotherapy politics and publishing

The Sociocultural Turn in Psychology Suzanne Kirschner, Jack Martin, 2010-06-01 The sociocultural turn in psychology treats psychological subjects such as the mind and the self as processes that are constituted or made up within specific social and cultural practices In other words though one's distinct psychology is anchored by an embodied biological existence sociocultural interactions are integral to the evolution of the person Only in the past two decades has the sociocultural turn truly established itself within disciplinary and professional psychology Providing advanced students and practitioners with a definitive understanding of these theories Suzanne R Kirschner and Jack Martin former presidents of the American Psychological Association's Division of the Society for Theoretical and Philosophical Psychology assemble a collection of essays that describes the discursive hermeneutic dialogical and activity approaches of sociocultural psychology Each contribution recognizes psychology as a human science and supports the individual's potential for agency and freedom At the same time they differ in their understanding of a person's psychological functioning and the best way to study it Ultimately the sociocultural turn offers an alternative to overly biological or interiorized theories of the self emphasizing instead the formation and transformation of our minds in relation to others and the world

The Rhetoric of Religious Cults A. Mooney, 2005-08-02 The Rhetoric of Religious Cults takes as its departure point the notion that cults have a distinctive language and way of recruiting members First outlining a rhetorical framework which encompasses contemporary discourse analysis the persuasive texts of three movements Scientology Jehovah's Witnesses and Children of God are analysed in detail and their discourse compared with other kinds of recruitment literature Cults distinctive negative profile in society is not matched by a linguistic typology Indeed this negative profile seems to rest on the semantics and application of the term cult itself

Wittgenstein and Psychology Rom

Harré, Michael Tisaw, 2017-11-22 Wittgenstein made use of his insights into the nature and powers of language to search out the source of conceptual confusions in the foundations of mathematics and in philosophy of psychology. Once he has established the use account of language his *Philosophical Investigations* opens out into an extensive coverage of psychological phenomena and the concepts with which we identify and manage them. In this book Harré and Tisaw display Wittgenstein's analysis of the grammar of the most important of these concepts in a systematic and accessible way. Previous studies of the psychological aspects of Wittgenstein's writings, admirable as exegeses of his thought, have paid little attention to the relevant psychology. Here the adjacent theories and empirical investigations from mainstream psychology have been described in sufficient detail to show how Wittgenstein's work impinges on psychology as it has actually been practiced. In using this book philosophers will be able to get a sense of the relevance of Wittgenstein's philosophical psychology to the development of psychology as a science. Psychologists will be able to see how to use Wittgenstein's insights to enrich and discipline their attempts to gain an understanding of human thinking, feeling, acting, and perceiving, the domain of psychology as science. The book includes an historical overview of the sources of Wittgenstein's philosophy in the Vienna of the last years of Austro-Hungary as well as a brief presentation of the main themes of his *Tractatus Logico-Philosophicus* as it anticipated computational models of cognition. Student use is emphasized with frequent summaries and self-test questionnaires.

Social Philosophy of Science for the Social Sciences Jaan Valsiner, 2019-12-11 This is an international and interdisciplinary volume that provides a new look at the general background of the social sciences from a philosophical perspective and provides directions for methodology. It seeks to overcome the limitations of the traditional treatises of a philosophy of science rooted in the physical sciences as well as extend the coverage of basic science to intentional and socially normative features of the social sciences. The discussions included in this book are divided into four thematic sections: Social and cognitive roots for reflexivity upon the research process; Philosophies of explanation in the social sciences; Social normativity in social sciences; Social processes in particular sciences. *Social Philosophy of Science for the Social Sciences* will find an interested audience in students of the philosophy of science and social sciences. It is also relevant for researchers and students in the fields of psychology, sociology, economics, anthropology, education, and political science. Relations and Functions within and around Language

David Lockwood, Michael Cummings, Peter Fries, William Spruiell, 2005-05-01 Currently there is a movement in linguistics towards careful use of corpora in linguistic and text analysis which has involved both written and spoken corpora and those which combine spoken and written text. Most text analyses address written texts, often literary works, but detailed discussion of the language of a single oral text from multiple perspectives has rarely been published. This book is among the first to integrate the analysis of the language of spoken and written texts. It describes language as a network of functional relations involving a context which is also a network of functional relations. The essays in Part One present several perspectives on the theory of language as functional relations; those in Part Two discuss a single

oral text using a variety of functional perspectives All of the essays are by linguists interested in oral and written texts who have achieved international recognition in their fields Illustrated in this book are cognitive social construction social praxis and anthropological approaches to the description of text *The Hidden Worldviews of Psychology's Theory, Research, and Practice* Brent D. Slife, Kari A. O'Grady, Russell D. Kosits, 2017-06-26 By revealing underlying assumptions that influence the field of psychology this book challenges psychologists to reconsider the origins of ideas they may take as psychological truths

Radebe, 2023-12-01 Post apartheid South Africa continues to face challenges in its attempts at economic transformation from decades of apartheid and colonisation This need for revolution has resulted in various policy initiatives including the ongoing demands for the nationalisation of the economy The commercial media has a central role in shaping policy debates But this media is an ideological tool and an economic resource since it is owned and controlled by people with political and economic interests and therefore tends to support and promote their interests This book provides a Marxist critique of the representation of the

nationalisation of the mines debate by the South African commercial media Radebe examines corporate control of the media to articulate the interrelations between the State Capital and the Media and how commercial media represents shapes and influences public policy He concludes that beyond factors such as ownership commercialisation and the influence of advertising on news content the global capitalist hegemony has a more powerful effect on the commercial media in South Africa than previously thought Print edition not for sale in Sub Saharan Africa Where Culture and Mind Meet Brady Wagoner, Kevin Carriere, 2021-01-01 Cultural psychology explores the mutual constitution of persons minds and social cultural worlds It aims to be both transdisciplinary and international in its approach and to develop theoretical models that remain faithful to people s lived experiences This volume further advances these objectives through an exploration of core concepts especially normativity liminality and resistance cultural psychology s foundations in philosophy and the translation of theory into a methodology for investigating distinctly human ways of relating to the world *Social Constructionism* Andy Lock, Tom Strong, 2010-03-25 Social Constructionism Sources and Stirrings in Theory and Practice offers an introduction to the different theorists and schools of thought that have contributed to the development of contemporary social constructionist ideas charting a course through the ideas that underpin the discipline From the New Science of Vico in the 18th century through to Marxist writers ethnomethodologists and Wittgenstein ideas as to how socio cultural processes provide the resources that make us human are traced to the present day Despite constructionists often being criticised as relativists activists and anti establishment and for making no concrete contributions their ideas are now being adopted by practically oriented disciplines such as management consultancy advertising therapy education and nursing Andy Lock and Tom Strong aim to provoke a wider grasp of an alternative history and tradition that has developed alongside the one emphasised in traditional histories of the social sciences *Persons and their Minds (Open Access)* Svend Brinkmann, 2017-07-06 Today s approaches to the study of the human mind are divided into seemingly opposed camps On one side we find the neurosciences with their more or less reductionist research programs and on the other side we find the cultural and discursive approaches with their frequent neglect of the material sides of human life Persons and their Minds seeks to develop an integrative theory of the mind with room for both brain and culture Brinkmann s remarkable and thought provoking work is one of the first books to integrate brain research with phenomenology social practice studies and actor network theory all of which are held together by the concept of the person Brinkmann s new and informative approach to the person the mind and mental disorder give this book a wide scope The author uses Rom Harr s hybrid psychology as a meta theoretical starting point and expands this significantly by including four sources of mediators the brain the body social practices and technological artefacts The author draws on findings from cultural psychology and argues that the mind is normative in the sense that mental processes do not simply happen but can be done more or less well and thus are subject to normative appraisal In addition to informative theoretical discussions this book includes a number of detailed case studies

including a study of ADHD from the integrated perspective Consequently the book will be of great interest to academics and researchers in the fields of psychology philosophy sociology and psychiatry **Words of Conflict, Words of War** Fathali M. Moghaddam, Rom Harré, 2010-05-05 This highly insightful and cohesive group of studies reveals the power of political narratives to create conflict and peace Words of Conflict Words of War How the Language We Use in Political Processes Sparks Fighting is a fascinating exploration of the narratives leaders use to position both themselves and others in the course of political processes that lead to peace or conflict Drawing on the relatively new field of positioning theory expert essays provide insights into the ways words position us for better or worse and influence our intended results The focus on narratives from the interpersonal to the international leads to a better understanding of political processes and conflict resolution Part one of the study deals with micropolitics and personal positioning Part two explores positioning by political parties and factions Links between micro and macro are illustrated by leadership studies of individuals such as President Barak Obama President Mahmoud Ahmadinejad President George W Bush Governor Sarah Palin and the Reverend Ian Paisley The focus throughout is on how a leader can use language to redirect collective politics in support of conflict or of peace
