Moving beyond codes of ethics, Bryan, Sanders, and Kaplan encourage students to develop a cohesive sense of ethical reasoning that both validates their moral intuition and challenges moral assumptions. Part I of the text introduces basic moral theory, provides an overview to moral development, and introduces the common morality framework. Part II focuses on common ethical issues faced by helping professionals such as confidentiality, competency, paternalism, informed consent, and dual relationships. Each chapter provides an overview of each concept and their ethical relevance for practice. Throughout the text, students put their critical thinking skills into practice to promote deep learning. Real-life cases bridge the gap between theory and practice, and discussion questions reinforce the concepts introduced in each chapter.
