McFaul, 2006-09-30 Many authors have

written on the effect technology economics and politics have on globalization but few have addressed the potential impact of world religions on the future direction of globalization McFaul's fascinating book explores what others have not the part the world's major religions Hinduism Buddhism Jainism Zoroastrianism Judaism Christianity and Islam will play in bringing either greater peace and justice or hatred and hostility to the global village Will these religions which exert the greatest amount of influence worldwide be a force for good or ill in the emerging global village of the 21st century This book answers that question and more Covering the religions to which the majority of world's population adheres it offers insight into the commonalities differences and potential for coming together to create peace to be found among the major faiths The world's seven major religions are covered and topics such as sexuality ethics violence and the tension between secular and sacred arenas are discussed for each McFaul argues that if the leaders and laity of these religions are able to find common ground efforts toward peace and justice in the global village can be more effective and lasting If they accentuate their differences he suggests they will only produce more hatred and hostility *Teaching Peace as a Matter of Justice* Dale T.

Snauwaert,2023-07-07 This book explores the normative dimensions of peace studies and peace education through the lens of moral and political philosophy The purpose is to explore the idea of peace as a matter of justice and to articulate a pedagogical framework for the development and exercise of citizens capacities for moral reasoning and judgment regarding potential responses to the basic questions of justice including resisting injustice The just conditions necessary for peace are contingent upon the informed participation of democratic citizens who are capable of becoming dynamic agents of justice The development of citizens capacity for moral reasoning and judgment is of paramount importance for it constitutes a necessary condition for the realization of justice and peace on all levels of human society from local to global The book will be of interest to both students and all those interested in thinking about peace as a matter of justice *Journal of Moral Theology, Volume 5, Number 2* David M. *Peace Through Justice* James Brown Scott, 1917 *Engineering Peace and Justice* P. Aarne

Vesilind, 2010-10-17 Some years ago when I was chair of the department of civil and environmental engineering a colleague introduced me to a visitor from Sandia Laboratories perhaps the largest developer of armaments and weapons systems in the world We had a nice visit and as we chatted the talk naturally centered on the visitor's engineering work It turned out that his job in recent years had been to develop a new acoustic triggering device for bombs As he explained it the problem with bombs was that the plunger triggering mechanism could fail if the bomb hit at an angle and thus the explosives would not detonate To get around this he developed an acoustic trigger that would detonate the explosives as soon as the bomb hit any solid surface even at an angle As he talked I watched his face His enthusiasm for his work was clearly evident and his animated explanations of what they had developed at Sandia exuded pride and excitement I thought about asking him what it felt like to have spent his engineering career designing better ways to kill people or to destroy property the sole purpose of a bomb I wondered how many people had been killed because this man had developed a clever acoustic triggering device But good sense and decorum prevailed and I did not ask him such questions We parted as friends and in good spirits

**Natural Law, Ethics and Human Vulnerability** Sean Coyle, 2025-09-18 This book explores human vulnerability through the lens of natural law theory Beginning with a detailed examination of natural law ethics centred upon the virtues Part One it sets out the relationship between natural law and human vulnerability To be human is to be vulnerable but vulnerability must itself be understood by reference to the human goods that are the central concern of natural law ethics Such goods lie at the heart of what it means to lead a flourishing life but they are in no way certain goods such as health education the family can all be

perverted or taken away by human agency or the vicissitudes of life Part Two poses the problem of how human beings and government can build resilience in the face of these vulnerabilities Its main contention is that the central aims of vulnerability theory including that of state responsiveness are pre figured in the social teachings of the Catholic Church These teachings provide a compelling basis for the demand that the state be more responsive to social scourges such as poverty crime debt and dependency Vulnerability theorists will benefit from a new perspective on the problems that are central to their analysis natural law theorists will profit by an enrichment and extension of their central concerns
