Moray House And The Road To Merger:

Social Change in the History of British Education Joyce Goodman, Gary McCulloch, WILLIAM RICHARDSON, 2013-09-13
This work provides an overall review and analysis of the history of education and of its key research priorities in the British context. It investigates the extent to which education has contributed historically to social change in Britain, how it has itself been moulded by society and the needs and opportunities that remain for further research in this general area. Contributors review the strengths and limitations of the historical literature on social change in British education over the past forty years, ascertain what this literature tells us about the relationship between education and social change and map areas and themes for future historical research. They consider both formal and informal education, different levels and stages of the education system, the process and experience of education and regional and national perspectives. They also engage with broader discussions about theory and methodology. The collection covers a large amount of historical territory from the sixteenth century to the present, including the emergence of the learned professions, the relationship between society and the economy, the role of higher technological education, the historical experiences of Ireland, Scotland and Wales, the social significance of teaching and learning and the importance of social class, gender, ethnicity and disability. It involves personal biography no less than broad national and international movements in its considerations. This book will be a major contribution to research as well as a general resource in the history and historiography of education in Britain. University of Edinburgh Journal, 2003

European Accountancy Yearbook is the first annual reference work to focus on the emerging Pan-European accounting scene. Following numerous international mergers and syndicate formations, large accountancy firms are competing to provide services to international corporations and businesses with cross-border trade. The Yearbook provides a one-stop reference source, allowing financial directors of these companies to find out which accountancy firms are providing what services and where. It will also provide great assistance to other accountancy and financial services organisations to evaluate the state of the fast-growing European market and to assess competitors or possible partners. The Yearbook includes profiles of all the major firms, showing the international coverage, their services offered, fee income, partners, branch offices, etc. In addition, the Yearbook includes invaluable reference data such as country-by-country accountancy scene overview, corporate tax rates, E.C. directives, etc. **The Times Index**, 2013-04
