More Big Questions Paul Davies In Conversation With Phillip Adams:

More Big Questions Paul Davies, Phillip Adams, 1998 A series of six conversations drawn from the SBS series of the same name

Gnosticism Through the Prism of the Third Millennium Alexander Maistrovoy, 2018-04-27 In the epoch of the late antiquity Gnostic schools gave their own exhaustive answers for the eternal questions of humankind Who are we Where did we come from and why do we exist What gives rise to endless and inescapable evil and suffering Jorge Borges describes the Gnostic view of life that we are a careless or criminal blunder the fruit of engagement of the flawed deity and crude material Thus the Gnostic answers to these questions were radically different from those espoused by traditional religions of the time Gnosticism through the Prism of the Third Millennium explores this Gnostic view of life and how they viewed a material world as a distortion of celestial spheres and how in humanity they saw a being doomed to suffering yet carrying inside the spark of the supreme divine world Author Alexander Maistrovoy offers a history of Gnosticism and its confrontation with the church showing how despite the crash of Gnostic schools its teachings and its questions did not disappear Today we can make sense of Gnostic philosophy not through the prism of mysticism or mythology but from the point of view of rationalism scientific knowledge and historical experience And what we will discover is that Gnostic thought has meaning and relevancy today shedding light on fundamental questions about the universe ourselves and the divine

God Gametes 2 - Dark DNA and Parallels Between Gender-based Reproduction and Ancient Theology Robert Jameson, 2014-10-21 The God Gametes theory argues that we have been created by an external gender based species for the purpose of reproduction and the way we reproduce has been modelled on the way they reproduce And for thousands of years we believe our ancestors subconsciously understood our role in that process This is why they conceptualised a variety of Fertility Gods that were gender based that reproduced and why phallic imagery and lancet shaped doors have been incorporated into places of worship

God Gametes 4 and The Darwinian Fallacy Robert Jameson, 2015-05-28 The God Gametes theory argues that life on earth is part of the reproductive system of a parent species from a higher level of a multiverse We contend a single female member of the parent species colonised earth for the purpose of reproduction She drove the complexity of life on earth until one species homo sapiens evolved a large brain and the ability to host a consciousness reproductive cell of a male parent species Charles Darwin called his book On the Origin of Species but natural selection is not about the origin of anything His theory was not about the origin of species nor about the origin of life Natural selection argues the case for how one living species might gradually evolve into another living species It has nothing to do with how anything originated Supporters of this concept foster the myth that with enough throws of the dice with enough random coin flips then blind probability can design complexity It cannot

The Bali to Bairnsdale Alignment and Earth's Reproductive Chakra Robert Jameson, **Evidence of God** Nick Hawkes, 2012-03-23 Nick Hawkes looks at arguments for and against the existence for God and comes to the conclusion that faith can no more dispense with science than science can dispense with God Both

complete one another He knows the terrain well and is able to explain complex ideas in ordinary language Dr Hawkes concludes by saying that Christian theology rather than undermining science actually provides science with a solid ground of meaning on which to stand P 4 of cover Australian Book Review ,1998 Speaking Their Minds Australian Broadcasting Corporation,1998 Temporalities Russell West-Pavlov,2013 *Temporalities* presents a concise critical introduction to the treatment of time throughout literature Russell West Pavlov examines time as a crucial part of the critical theories of Newton Freud Ricoeur Benjamin and through related concepts such as psychology gender and postmodernism The author also explores representations of time in a broad range of texts ranging from the writings of St Augustine and Sterne s Tristram Shandy to Woolf s Mrs Dalloway and Stoppard s Rosencrantz and Guildenstern are Dead This comprehensive and accessible guide establishes temporality as an essential theme within literary and cultural studies **Philosophy and the Christian Worldview** David Werther,Mark D. Linville,2012-01-12 New perspectives on core questions in contemporary philosophy of religion **The Metaphysics of Modernity** Ulrich Steinvoth,2013 Does the modern age have a specific attitude to the world a way to make sense of the myriad stimuli that impinge on human organisms or as I call it a metaphysics This book claims it has It shows that what crucially changed Europe from the 16th century on was the spreading idea that things are best done for their own sake for goals inherent in an activity such as the goal of telling a good story or having a lively chat inheres in the telling or chatting itself The Renaissance took this idea from the ancients who also preferred intrinsic goals to extrinsic ones but the moderns discovered that the pursuit of intrinsic goals follows an immanent rationality that sets perfection standards to the activity Thus they could and did perfect activities that in antiquity had remained on the level of dabbling leisure time activities and transformed them into professions that we know today as theology science political theory the arts sports or journalism The European bourgeoisie though performed the most revolutionary yet also suicidal change They made traditional trade the pursuit of the extrinsic goal of acquiring money into an activity done for its own sake and enforced autonomy for its sphere just as the religious had enforced autonomy for their religious activities already in the 11th century They were so successful that they could take over the command of production in the industrial revolution and impose on all other spheres of society their goal of private profitability This was the historical end of the metaphysics of modernity But this book also argues that its principle the preference of intrinsic to extrinsic goals is still the best attitude to the world we can choose and that it is the best starting point for solving many problems of contemporary societies
