A groundbreaking new book that upends our understanding of ancient America. Conventional history tells us humans migrated on foot across present day Alaska populating the Americas far later than other continents. However, emerging new evidence suggests seafarers reached the continents thousands of years earlier and developed far more sophisticated civilizations than previously imagined. From distinguished historian BBC World Service Gavin Menzies, the author of the blockbuster New York Times bestseller 1421, comes a revolutionary new account of how the first humans came to North and South America. Menzies reveals that ancient peoples used the oceans' natural currents and prevailing winds to make voyages across both the Atlantic and Pacific. What's more, we now must accept that they had time to develop remarkably advanced cultures. Armed with cutting edge DNA evidence, newly unearthed artifacts, and astonishing linguistic and archaeological discoveries, Menzies shows humans have been making transoceanic voyages as far back as 100,000 years ago, vastly predating the supposed overland migration to the Americas during the last Ice Age. The ancient South American civilizations of the Olmec and Maya in Central and South America may have had direct origins and influences from Asia. Ancient maps held in the Library of Congress in Washington D.C. show there must have been sustained and dedicated voyages to the Western Hemisphere by Chinese explorers as early as 2200 B.C. Huge Chinese settlements occupied and made exploratory journeys from Nova Scotia. Japanese, Korean, and even earlier European voyages likewise predated the explorations currently recorded by history. A maverick scholar, Menzies has made a riveting new contribution to the story of humanity's earliest explorers, revealing the truth behind one of history's most fascinating questions: Who discovered America?

Harvard's Classics Collection Complete 71 Volumes is a monumental anthology that serves as a comprehensive survey of the foundational texts and figures that have shaped Western literature and thought. This collection spans millennia encompassing works from ancient Greece to the Enlightenment and up through the 19th century showcasing a diverse range of literary styles including poetry, philosophy, fiction, and scientific discourse. The inclusion of seminal works by figures such as Dante Alighieri, William Shakespeare, Plato, and Charles Darwin amongst others highlights the anthology's breadth and depth, offering readers an unparalleled insight into the various currents that have influenced Western cultural and intellectual history. The contributing authors and editors of this collection are each luminary in their own right, having left indelible marks on their respective fields. This anthology not only collates works by philosophers, scientists, and literary giants but also orchestrates a dialogue among them, offering a unique multidisciplinary perspective. The collection navigates through Renaissance humanism, the Enlightenment's valorization of reason, and the Romantic era's emphasis on individual emotion and natural beauty, painting a rich historical and cultural panorama. Through their collective works, this anthology encapsulates the essence of human thought and its evolution over the centuries. Harvard's Classics Collection Complete 71 Volumes is an essential resource for those looking to immerse themselves in the rich tapestry of human knowledge and creativity. Whether for scholarly research, educational pursuits, or personal enrichment, this collection offers an unmatched opportunity to engage with the texts that have served as cornerstones of Western culture. Readers are invited to explore this treasure trove of human experience, thought, and expression, which continues to enlighten, instruct, and
