**More Alike Than Different** Margo Rivera, 1996 Just as the prevalence of incest and child sexual abuse was a well kept secret until recently the phenomenon of multiple personality disorder MPD recently re labelled dissociative identity disorder DID has been minimized In her practice as a psychologist Margo Rivera has found this to be no coincidence Confirming that the root of most severe dissociative conditions lies in severe trauma most commonly child abuse Rivera first discusses the general historical and social contexts of dissociation and proceeds through clinical theory case vignettes and recorded personal experience to provide practical guidance to assessment and treatment Rivera covers such topics as therapeutic frame transference and countertransference and how to understand and make use of these concepts She discusses the controversies around False Memory Syndrome and ritual abuse issues which currently divide professionals treating trauma survivors Rivera makes a unique contribution to the treatment of lesbian and gay abuse survivors She theorizes that all sexuality is a social construct subject to change over an individual's lifetime a reality that is nowhere more clear than in those with MPD who may experience themselves as alternately heterosexual female homosexual male lesbian and heterosexual male Insightful and provocative this important therapeutic guide will be of interest to professionals who treat trauma survivors as well as to their clients

**Trauma and Sexuality** James Chu, Elizabeth S. Bowman, 2003-06-16 Examine the effects of childhood trauma on sexual orientation and behavior This pioneering book examines the effects of childhood trauma including sexual abuse on sexual orientation and behavior It will help you expand your sensitivity and expertise in a critically important way by providing a nonjudgmental look at the profound effects of long standing early abuse on the sexual identities orientation behaviors and fantasies of the people who come to you for help From the editors In the modern era of trauma studies clinicians and researchers have been treating and investigating the effects of trauma including the sexual abuse of children for more than two decades And yet we know far more about sequelae such as post traumatic and dissociative symptoms disrupted attachment addictions eating disorders and somatoform symptoms than we do about the effects of trauma on sexual behavior With the exception of a relatively few articles in the scientific literature many of which were written by the authors in this collection little has been published about the sexual effects of sexual abuse and other childhood maltreatment Why have we neglected this obvious and important area Perhaps the reason can be simply attributed to our Victorian legacy of reluctance to openly discuss sexuality Or perhaps the reason may be related to some of the expressions of sexuality that are sometimes seen in persons with childhood trauma At times expressions such as sexual addiction homosexuality sadomasochistic behavior and prostitution have been classified as deviant This may have contributed to our reluctance to discuss them openly Or perhaps the reason is that we collectively wish to deny the effects of abuse on one of the core aspects of ourselves to deny that early traumatic events forever change the sexual lives of persons in such an intimate and profound way The co

work of Janet Freud Sullivan and Fairbairn and making extensive use of recent literature Elizabeth Howell develops a comprehensive model of the dissociative mind Dissociation for her suffuses everyday life it is a relationally structured survival strategy that arises out of the mind's need to allow interaction with frightening but still urgently needed others For therapists dissociated self states are among the everyday fare of clinical work and gain expression in dreams projective identifications and enactments Pathological dissociation on the other hand results when the psyche is overwhelmed by trauma and signals the collapse of relationality and an addictive clinging to dissociative solutions Howell examines the relationship of segregated models of attachment disorganized attachment mentalization and defensive exclusion to dissociative processes in general and to particular kinds of dissociative solutions Enactments are reframed as unconscious procedural ways of being with others that often result in segregated systems of attachment Clinical phenomena associated with splitting are assigned to a model of attachment based dissociation in which alternating dissociated self states develop along an axis of relational trauma Later chapters of the book examine dissociation in relation to pathological narcissism the creation and reproduction of gender and psychopathy Elegant in conception thoughtful in tone broad and deep in clinical applications Howell takes the reader from neurophysiology to attachment theory to the clinical remediation of trauma states to the reality of evil It provides a masterful overview of a literature that extends forward to the writings of Bromberg Stern Ryle and others The capstone of contemporary understandings of dissociation in relation to development and psychopathology The Dissociative Mind will be an adventure and an education for its many clinical readers

Not Trauma Alone Steven Gold, 2013-08-21 How is an individual to lead a comfortable productive existence when he or she was never taught the skills necessary for effective living Adult survivors of child abuse often face this dilemma Instead of being nurtured as children and taught life skills by their caregivers child abuse survivors were subjected to a daily regimen of coercive control contempt rejection and emotional unresponsiveness It is not surprising therefore that many survivors encounter difficulty adjusting from this type of damaging childhood atmosphere to one in which they have autonomy This book addresses the particular problems associated with treating adult survivors of child abuse Until now psychotherapy for child abuse survivors often centered on the trauma of their abuse experiences However survivors frequently reveal a history suggesting it was not abuse trauma alone that created their difficulties but growing up essentially alone without the consistent emotional support and guidance needed for development of effective functioning This book presents an alternative to trauma focused treatment that though effective for treatment of other forms of trauma can induce deteriorated rather than improved functioning in survivors of prolonged childhood maltreatment The contextual therapy presented in Not Trauma Alone delineates a psychotherapeutic approach that emphasizes helping survivors develop the capacities for effective functioning that were never transmitted to them during their formative years Detailed descriptions of the methods and interventions comprising contextual therapy are included in this critical book for all mental health professionals clinicians

*Toward a Psychology of Uncertainty* Doris Brothers, 2011-04-12 Since trauma is a thoroughly relational phenomenon it is highly unpredictable and cannot be made to fit within the scientific framework Freud so admired In Toward

a Psychology of Uncertainty Trauma Centered Psychoanalysis Doris Brothers urges a return to a trauma centered psychoanalysis Making use of relational systems theory she shows that experiences of uncertainty are continually transformed by the regulatory processes of everyday life such as feeling knowing forming categories making decisions using language creating narratives sensing time remembering forgetting and fantasizing Insofar as trauma destroys the certainties that organize psychological life it plunges our relational systems into chaos and sets the stage for the emergence of rigid life constricting relational patterns These trauma generated patterns which often involve denial of sameness and difference the creation of complexity reducing dualities and the transformation of certainty into certitude figure prominently in virtually all of the complaints for which patients seek analytic treatment Analysts she claims are no more strangers to trauma than are their patients Using in depth clinical illustrations Dr Brothers demonstrates how a mutual desire to heal and to be healed from trauma draws patients and analysts into their analytic relationships She recommends the reconceptualization of what has heretofore been considered transference and countertransference in terms of the transformation of experienced uncertainty In her view the increased ability of both analytic partners to live with uncertainty is the mark of a successful treatment Dr Brothers perspective sheds fresh light on a variety of topics of great general interest to analysts as well as many of their patients such as gender the acceptance of death faith cult like training programs and burnout Her discussions of these topics are enlivened by references to contemporary cinema and theatre

**The Politics and Experience of Ritual Abuse** Sara Scott, 2001 Sara Scott s book is a very powerful work not only in terms of the subject matter and the politics of intense violence and violation that it explores but also as a commentary on methodology and the nature of power She thus contributes to the empowerment of survivors and the breaking of closures on debate and intervention Professor Jeff Hearn University of Manchester author of The Violences of Men Through exemplary use of theory and research Scott s analysis of ritual abuse moves forward key debates within feminism therapy and social science more generally This eloquent book confirms established sociological wisdom that great insights are produced from skilful research into boundary cases Lois Bryson Emeritus Professor Research Institute for Gender and Health University of Newcastle Australia very carefully researched argued and presented It contains some very important if highly shocking and disturbing material which is handled in a highly sensitive way Professor Mary Maynard Department of Social Policy and Social Work University of York This book makes an important contribution to the existing literature and debate on ritual abuse as well as to the understanding of gendered violence and abuse more generally Marianne Hester Professor of Sociology and Social Policy University of Sunderland We live in an era characterised by contradictions not least in relation to the issue of ritual abuse which emerged as a social problem only to have its existence immediately challenged by a discourse of disbelief While many academics have ranked amongst the sceptics in this debate Sara Scott is a sociologist who takes her respondents seriously as well as acknowledging the interests and experiences which have shaped her own position The Politics and Experience of Ritual Abuse offers insight into why ritual abuse has become such a contested issue while enabling the reader to explore the meaning of ritual abuse through the accounts of those who claim direct experience Drawing on her research with adults who identified themselves as survivors the author argues that the wholesale dismissal of such accounts as false memories produced by a moral panic may be somewhat premature The Politics and Experience of Ritual Abuse has been written for anyone interested in the specific controversy over ritual abuse including students and researchers in criminology social work sociology and women s studies

**Traumabehandlung** Michaela Huber, 2023-01-05 Bindung als Grundlage der Traumabehandlung Bei komplex traumatisierten Menschen sind aufgrund einer früh erworbenen strukturellen Dissoziation Veränderungen nur schwer möglich. Hilfreich ist allein eine tiefe innere Bindung zu einem anderen Menschen, denn sie kann dazu beitragen, Verbindungen zwischen einzelnen Persönlichkeitsanteilen aufzubauen. Und genau hier muss Psychotherapie ansetzen: Bindungsorientiert auf der inneren Ebene arbeiten und helfen, innere Verbindungen herzustellen. Erst dann können Klient:innen auch von kognitiven und verhaltensorientierten sowie körpertherapeutischen Behandlungsmethoden tief innerlich profitieren. In diesem Standardwerk zur Traumabehandlung werden aktualisiert und auf den neuesten Stand gebracht die Behandlungsmethoden vorgestellt, die auch komplex traumatisierten Menschen helfen. *Canadian Journal of Psychiatry*, 1997 *Treating Addicted Survivors of Trauma* Katie Evans, J. Michael Sullivan, 1995-01-01 This book uses composite clinical examples and the authors' own practical experience to demonstrate how to treat addicted survivors of trauma and abuse. By integrating mental health paradigms with disease models of addiction and combining psychotherapeutic techniques with 12 step recovery practices, the authors present an easy-to-replicate model for assessment and treatment. They provide an overview of the various types and resulting effects of childhood abuse and other traumas and then describe the disease of addiction and its treatment. Simultaneously addressing both addiction and survivor issues, the book describes ways to identify and assess substance-dependent survivors and organize, direct and plan their treatment. In addition, it provides specific strategies for working with significant others, adolescents and individuals who also exhibit antisocial, borderline and narcissistic personality disorders. This book is aimed at psychologists, chemical dependency counselors, social workers and family therapists.

*Canadian Book Review Annual*, 1996 **Treating Dissociative and Personality Disorders** Antonella Ivaldi, 2016-05-26 *Treating Dissociative and Personality Disorders* draws on major theorists and the very latest research to help formulate and introduce the Relational Multi-Motivational Therapeutic Approach (REMOTA), a new model for treating such patients within a clinical psychoanalytic setting. Supported by her fellow contributors, Antonella Ivaldi provides an overview of existing theories and evidence for their effectiveness in practice, sets out her own theory in detail and provides rich clinical detail to demonstrate the advantages of the REMOTA model as applied in a clinical setting. The narratives in this book show how it is possible to integrate different contributions within a multidimensional aetiopathogenic treatment model which considers the mind as a manifestation of the relationship between body and world. From a conceptual perspective, according to which consciousness emerges and develops in the interpersonal dimension, this book shows how it becomes possible to understand in the therapeutic space what stands in the way of sound personal functioning and how to create the conditions for improving this. *Treating Dissociative and Personality Disorders* will be highly useful in addressing the particular clusters of symptoms presented by patients, stimulating therapists of different backgrounds to explore the complexity of human nature. On reading this book, it will become clear that theories can truly become useful instruments if

approached with a critical mind and with humbleness in order to venture into what we do not know and will never know completely the relationship with the other unique and irreplaceable Treating Dissociative and Personality Disorders provides an integrative and comparative new approach that will be indispensable for combining relational clinical knowing and motivational theories It will appeal to psychoanalysts and psychotherapists especially those in training clinicians of different backgrounds interested in comparative psychotherapy as well as social workers and graduate and postgraduate students
