different elsewhere in Britain The authors use biographies and memoirs as well as archives and official sources to challenge stereotypes of the mothers as desolate women rejected by society and by their families until social attitudes were transformed in the permissive 1960s They demonstrate the diversity of their lives their social backgrounds and how often they were supported by their families neighbours and the fathers of their children before the 1960s and the continuing hostility by some sections of society since then They challenge stereotypes too about the impact of war on sexual behaviour and about the stability of family life before the 1960s Much of the evidence comes from the records of the National Council for the Unmarried Mother and Her Child set up by prominent people in 1918 to help a social group they believed were neglected and which is still very active today as Gingerbread supporting lone parents in need of help Their work tells us not only about the lives of those mothers and children who had no other support but also another important story about the vibrancy of voluntary action throughout the past century and its continuing vital role working alongside and in co operation with the Welfare State to help mothers into work among other things Their history is an inspiring example of how throughout the past century voluntary organizations in the Big Society worked with not against the Big State     *Understanding Social Security (Second Edition)* Jane Millar, 2009-02-02 The second edition of this important text reviews policy developments since 1997 The chapters have been extensively updated and there are new chapters on social security reform inequalities and social security and the new welfare market     **Well-Being** J.
