African-American Teens Discuss Their Schooling Experiences Gail L. Thompson, 2002-01-30. For decades, researchers and policymakers have grappled with the issue of the underachievement of African American students. An age-old problem has been that these students, on average, lag behind their peers of other racial/ethnic groups in math, science, and reading. Recently, California, like some other states, has implemented a high-stakes standardized testing program that has revealed that when test scores are disaggregated along racial/ethnic lines, the scores of African American students continue to trail those of their peers. The study described in this book was undertaken in an effort to uncover schooling practices that are advantageous or detrimental to the achievement of African American students. The study was based on interviews and questionnaire results from nearly 300 African American high school seniors. Most of these students resided in a region that had a low college attendance rate and a high child poverty rate. The students were given an opportunity to discuss numerous issues pertaining to their schooling experiences, including

teacher attitudes and expectations the curriculum homework practices the quality of services provided by their high school counselors racism at school school safety parental involvement and their early reading habits and attitudes about reading In addition to quantitative results most chapters include detailed narratives describing the elementary and secondary schooling experiences of the interviewees *National Differences, Global Similarities* David Baker, Gerald K. LeTendre, 2005 Using US schools as a reference point this book provides a description of schooling as a global institution The authors draw on a four year investigation conducted in 47 countries that examined many aspects of K 12 schooling They discuss how world trends and the forces behind them will work to shape the directions education may take Catholic Schools William Sander, 2013-03-14 In *When Work Disappears* Harvard sociologist William Julius Wilson 1996 notes that African Americans in Chicago who attended Catholic schools are viewed more favorably by employers than African Americans who attended public schools Such findings corroborate a widely though not universally held view that Catholic schools succeed in boosting mobility for children of less privileged families Can its success be broadened Nobel prize winning economist Robert Fogel 2000 drawing upon the research by Wilson and others suggests that Catholic schools might play a larger role in promoting an egalitarian society if grants were made available to poor students that could be used in the parochial school sector Nobel prize winning economists Milton Friedman 1962 and Gary Becker 1989 also make strong cases for education vouchers and for more competition in primary and secondary education in the United States From a different perspective Archbishop of Chicago Francis Cardinal George argues that Catholic education that is faith based that provides values and discipline that is Jesus centered has the potential to transform the world Archdiocese of Chicago 2000b Despite such opinions there is controversy concerning the measured effects of Catholic schooling on educational attainment academic achievement and other tangible outcomes **You Want Me to Teach What?** Norman Joseph LaFave, 2012 Problem You feel shaky about being assigned to teach upper level science and math and need to get up to speed fast Solution Follow this concise book's tried and true methods which you can integrate into your classroom and lesson plans starting from the first day of class *You Want Me to Teach What* avoids long discussions of education theory and specific lesson plans Instead it concentrates on general techniques for approaching a variety of problems and enhancing your teaching skills in science and math It covers student psychology classroom management planning instruction problem solving techniques laboratory methods and reporting assessment and professional development Without feeling inundated you'll find a wealth of sensible guidance whether you're a preservice education major wanting to teach physical science or mathematics a new teacher looking for practical methods to integrate into your instruction or an experienced teacher in search of fresh ways to improve in the classroom Practical Handbook of School Psychology Gretchen Gimpel Peacock, Ruth A.
