Using Humor to Maximize Living Mary Kay Morrison, 2012-03-29 Humor gets very little respect While references to the importance of having a sense of humor are liberally sprinkled throughout the popular media and it is usually mentioned as one of the qualities of effective employees it is rare to find purposeful humor practice Humor is without a doubt the one quality that most of us agree is needed in life However it is rare to find serious applications on the benefits of applying humor in everyday life and in our world of work When the federal government tried to incorporate humor into a staff development program of a federal agency there was an outcry It seems that humor was thought to be a waste of taxpayer money and the program was axed The purpose of *Using Humor to Maximize Living* is to affirm sustain and encourage people in the practice of humor not only as a personal tool to optimize a healthy life style but also to maximize the benefits of humor in everyday life Check out the research that includes a review on the use of humor to nurture creativity to increase the capacity for memory retention to support an optimal work environment and to build safe communities that reflect the relational trust necessary for maximizing living Author Mary Kay Morrison teaches a 3 hour grad course in Humor Studies through the Association for Applied and Therapeutic Humor AATH at the annual conference each year <http://www.aath.org> humor academy

blurry I can recall having a blurred vision when others would ask me what living higher meant I can even recall a time when a picture was taken of me as a child with my eyes closed A relative later found this picture and asked me how I was able to sleep standing up while the camera caught my image I ask us all that my relative asked me How are we able to keep our eyes closed right now Let us have the strong inordinate desire to focus on the moment This desire to open our eyes will naturally pull the camera lens to us What happened Nothing We opened our eyes After desire comes to posture Picture posture is necessary when capturing a memory Are we willing to change our posture for the cameras in life It s interesting what happens after we open our eyes for the camera changes our position Finally we achieve access to see closer look at change more The camera gives access Access to function in life is far greater than desire or even posture believe it or not Haven t we all glanced at a picture that was taken of us before Perhaps a picture that we take with others involved These three elements are the agents for higher territory a greater way A new ground and a new look from a different angle in each situation Our camera lens must focus
