The political economy of the educational process R.B. McKenzie, 2012-12-06 The purpose of The Political Economy of the Educational Process is to demonstrate in an elemental way what economics can contribute to our understanding of how education occurs Although in ways similar the book is significantly different from other studies in the economics of education Other works are primarily concerned with the effects which education or to use the economist's jargon human capital has on production market efficiency and the distribution of income The central concern of this book is how and why the student goes about acquiring whatever human capital he wishes and how the institutional setting of the university influences the amount of human capital that the student acquires This book deals with the learning process and therefore draws upon an earlier book written by Robert Staaf and myself 1 However the economic theory of learning which Staaf and I developed earlier in very precise mathematical terms is extended here through a fuller treatment of the political environment in which education occurs A major concern of this work is to make the economic analysis easily understood by professional educators and social scientists generally To accomplish this objective Chapter 2 develops for the non economicists the tools of analysis which are used throughout the book Hopefully by shying

away from esoteric theory and by trying to make the discussion provocative and informative the book 1 See Richard B McKenzie and Robert J **A Bibliography of Printing** E. C. Bigmore, C. W. H.
