Numerology A Basics:

Numerology David V. Barrett, 1995 *What Number are you? - Numerology Complete Manual* French Academy, 2016-02-21 Numerology is an ancient science through which does not predict the future but is related to the personality of each of us it is used to define ourselves with our different personalities to the place we are to occupy a general level professional and sentimental It is considered one of the oldest analytical techniques in the world more than two and a half millennia ago Egyptian priests and Babylonians used it as a way to learn about others and for the understanding of human psychology Much of numerological knowledge is also attributed to the teacher philosopher Pythagoras who is said before accepting a student in his school examined it by name and date of birth In fact the character dimensions of each person are drawn by assigning to each letter of the name and surname of its corresponding number With his school Pythagoras came to the unit on the subject of interpretation going beyond what could be the social order and the different religions of the period More particularly according to him the numbers are the essence of things and everything can be reduced to a numerical expression Numerology is therefore the discipline that studies the meaning of the numbers which draws so precise the close ties that human life microcosm has with the Universe macrocosm This study is based on the tradition that our name day month and year of our birth are the most simple and immediate to know deep and then come to understand the characteristics that identify our personality because of our behavior and our possible aspirations and inclinations increasing so the degree of awareness The numerology say that everything even what is abstract can be reduced to a numerical unity then giving a specific meaning to each one of them In Numerology take into account the basic numbers from 1 to 9 and the dominant numbers 11 22 and 33 called Numbers Masters that have a significant importance because it transcends the world of the nine basic numbers and amplify the characteristics of the numbers that are obtained from their reduction 2 4 and 6 Astrology And Numerology Mastery Luis Taylor, 2021-04-16 55% OFF for Bookstores NOW at 32 95 instead of 39 95 LAST DAYS There is widespread debate over whether numerology is the only factor that will help you improve your life Although a lot of research is being done on the same there is no way to determine whether changing up your life and path number will contribute towards bettering you 100% So you might have to do certain other things as well which will help you remain happy and satisfied with your life for longer Some of that has to do with what you surround yourself with in terms of both people and the environment It is obvious that you will have to deal with unnecessary issues if you surround yourself with negative people Negativity can hamper your growth and also cause you to backtrack in your life If you wish to seek true happiness you should surround yourself with people that will contribute to your life positively It is easier said than done as we cannot really choose who we surround ourselves with and many people exist through their own will So it is best for us to filter out some of these people and surround ourselves with those that promote positive vibes Some people wonder if these negative vibes really do affect them Truth be told it is possible for negativity to alter your life It can
