Library of Congress Subject Headings Library of Congress,2013 **Nurturing Medical Professionalism in Different Cultural Contexts** Kamran Sattar,Kate Owen,Bhavani Veasuvalingam,2025-09-08 Medical professionalism is a multifaceted concept encompassing diverse perspectives shaped by cultural influences In Western societies professionalism often emphasizes traits like objectivity clinical competence and adherence to ethical codes This viewpoint emphasizes the importance of a standardized approach to patient care and the primacy of evidence based medicine However cultural influences can significantly alter these perceptions In many Eastern cultures for instance medical professionalism may also prioritize qualities such as empathy humility and interpersonal relationships Here the doctor patient bond holds immense significance often influencing treatment decisions and patient outcomes Additionally cultural backgrounds can shape perceptions of authority with some cultures valuing a more paternalistic doctor patient dynamic while others emphasize shared decision making and patient autonomy Thus understanding and respecting varied cultural perspectives is integral to fostering true professionalism in medicine ensuring effective communication and equitable care delivery across diverse patient populations

Cumulated Index Medicus ,1980 **Urban Family Medicine** Richard B. Birrer,2012-12-06 Now more than ever Family Medicine is alive and well in the United States The base of this medical specialty has traditionally been in the smaller cities suburban communities and rural areas of this country Over the past decade however there has been a resurgence of interest in primary care in our major metropolitan areas as a solution to the high tech subspecialty pace of the tertiary care environment A rebirth of urban family medicine has accompanied these pioneering efforts To date the accomplishments are substantial and the prospects are bright There is still a long way to go and there are a significant number of hurdles to cross Although diseases are generally the same wherever you are their effects as illness on the individual and the family are strongly influenced by the environment and social milieu Urban families have distinctive and diverse problems cultural economic and ethnic Training programs situated in the large cities must recognize these issues and include special emphasis on the situations that the family physician is likely to encounter during and after his training There is very little research

literature on the background and nature of special urban problems and these areas are the subject of several chapters of this long overdue volume devoted specifically to urban family medicine Dr Birrer has persuaded true experts to share their knowledge with the reader
