Nutrition and Medical Practice Lewis A. Barness, Yank D. Coble, Donald Ian MacDonald, George Christakis, 2012-12-06 All forms of life require food materials in certain minimum amounts to insure an active life and successful reproduction Nutrition is concerned with what these materials are how they function what effects they have when absent and what happens to them when ingested During the past two centuries such nutritional disorders as scurvy beriberi rickets and pellagra have been discovered successfully treated and eradicated by physicians in developed countries In this century such noted researchers as Rose Meyerhof and Krebs have contributed enormously to the field of nutrition Currently research is evolving new concepts and facts so rapidly that the average practitioner can hardly keep current even in his own field of medicine Bona fide research by universities and governmental agencies has produced voluminous information much of which seems contradictory and therefore tends to confuse the general public particularly in the area of potential carcinogens This confusion has prompted consumer groups politicians and social welfarists to bring pressures and demands on medical schools and practitioners of medicine to increase their knowledge and concern in the field of nutrition Taking advantage of and adding to this confusion are the health food faddists and cultists some only for monetary gain and others with a real religious zeal

Nutrition in Pregnancy and Childbirth Lorna Davies, Ruth Deery, 2013-12-04 Making good nutritional choices can mean women optimise the outcomes of their birthing experience and offer their babies the best possible start in life To support this all health professionals who work with women during pregnancy birth and the postnatal period need to have an appropriate knowledge of nutrition healthy eating and other food related issues This evidence based text provides an informative and accessible introduction to nutrition in pregnancy and childbirth As well as allowing readers to recognise when nutritional deficiency may be creating challenges it explores the psychosocial and cultural context of food and considers their relevance for women's eating behaviour Finally important emerging issues such as eating during labour food supplements and maternal obesity are discussed An important reference for health professionals working in midwifery or public health contexts especially this book is also the ideal companion for a course on nutrition in pregnancy and childbirth
