The political economy of food and nutrition policies Per Pinstrup-Andersen, 1993-01-01 Few nutritionists and economists fully appreciate how the political environment shapes policy and subsequently affects the relevance of their policy recommendations When governments fail to follow the recommendations of nutritionists and economists and are unable to design and implement cost effective nutrition programs and policies it is often attributed to politics or to lack of political will on the part of decisionmakers Past nutrition planning efforts frequently failed to understand the goals and behavior of the various agents and institutions inside and outside the government that in the final analysis determine whether the planning effort is successful In *The Political Economy of Food and Nutrition Policies* Per Pinstrup Andersen brings together a group of

distinguished authorities to improve the understanding of how nutrition policies are formulated within larger political and economic contexts and how public sector agencies behave with regard to food and nutrition

Handbook of Nutrition and Ophthalmology Richard David Semba, 2007-12-06 The Nutrition and Health series of books have as an overriding mission to provide health professionals with texts that are considered essential because each includes 1 a synthesis of the state of the science 2 timely in depth reviews by the leading researchers in their respective fields 3 extensive up to date fully annotated reference lists 4 a detailed index 5 relevant tables and figures 6 identification of paradigm shifts and the consequences 7 virtually no overlap of information between chapters but targeted inter chapter referrals 8 suggestions of areas for future research and 9 balanced data driven answers to patient health professionals questions which are based upon the totality of evidence rather than the findings of any single study The series volumes are not the outcome of a symposium Rather each editor has the potential to examine a chosen area with a broad perspective both in subject matter as well as in the organization of their volume The international perspective especially with regard to public health initiatives is emphasized where appropriate The editors whose trainings are both research and practice oriented have the opportunity to develop a primary objective for their book define the scope and focus and then may invite the leading authorities from around the world to be part of their initiative The editor authors are encouraged to provide an overview of the field discuss their own research and relate the research findings to potential human health consequences

The Political Economy of Hunger: Volume 1: Entitlement and Well-being Jean Dreze (ed), Amartya Sen, 1990 Part of a major report on world hunger instigated by the World Institute for Development Economics Research this volume deals with possible solutions to the problem of regular outbreaks of famine in various parts of the world

Alex McIntosh, 2013-11-21 Here

The author applies theories of social organization, culture, social stratification, social change, rural sociology, the sociology of the body, and social problems to empirical problems in food and nutrition. By doing so, he sheds light on issues such as the rise of the state, population growth, famine, obesity, eating disorders, the maldistribution of food across class, gender, and ethnic boundaries, and the changing nature of the food industry.

Cities and Agriculture Henk de Zeeuw, Pay Drechsel, 2015-09-16 As people increasingly migrate to urban settings and more than half of the world's population now lives in cities, it is vital to plan and provide for sustainable and resilient food systems which reflect this challenge. This volume presents experience and evidence-based state-of-the-art chapters on the key dimensions of urban food challenges and types of intra and peri-urban agriculture. The book provides urban planners, local policy makers, and urban development practitioners with an overview of crucial aspects of urban food systems based on an up-to-date review of research results and practical experiences in both developed and developing countries. By doing so, the international team of authors provides a balanced textbook for students of the growing number of courses on sustainable agriculture, food, and urban studies, as well as a solid basis for well-informed policy making, planning, and implementation regarding the development of sustainable, resilient, and just urban food systems.

Food Security, Poverty and Nutrition Policy Analysis Suresh Babu, Shailendra Gajanan, 2021-09-21 *Food Security, Poverty and Nutrition Policy Analysis: Statistical Methods and Applications*, Third Edition, combines statistical data analysis and computer literacy, applying the results to develop policy alternatives through a series of statistical methods for real-world food insecurity, malnutrition, and poverty problems. The book presents the latest uses of statistical methods for policy analysis using the open-source statistical environment R, in addition to having the original Stata files and applications. A new chapter on obesity brings in new datasets for analysis to effectively demonstrate the use of such data for addressing policy issues. Finally, program evaluation methods which can be directly applied to the data on food security, nutrition, poverty indicators, and causal factors are included. This unique real-world data takes the reader through a hands-on approach toward econometric practice whereby they can also test the effects of policy and program interventions. Further, this is the first book to explore actual data with STATA and R statistical packages that also provides a line-by-line guide to the programming and interpretation of results. Provides a fully revised and updated tome on the latest technology, assessment advances, and policy insights surrounding food security. Combines case studies with data-based analysis. Includes self-contained, downloadable datasets, statistical appendices, computer programs, and interpretations of the results for policy applications.
