Where do you begin to look for a recent authoritative article on the diagnosis or management of a particular malignancy? The few general oncology textbooks are generally out of date. Single papers in specialized journals are informative but seldom comprehensive; these are more often preliminary reports on a very limited number of patients. Certain general journals frequently publish good in-depth reviews of cancer topics and published symposium lectures are often the best overviews available. Unfortunately, these reviews and supplements appear sporadically and the reader can never be sure when a topic of special interest will be covered. Cancer Treatment and Research is a series of authoritative volumes which aim to meet this need. It is an attempt to establish a critical mass of oncology literature covering virtually all oncology topics, revised frequently to keep the coverage up to date, easily available on a single library shelf or by a single personal subscription. We have approached the problem in the following fashion: First, by dividing the oncology literature into specific subdivisions such as lung cancer, genitourinary cancer, supportive care, etc. Second, by asking eminent authorities in each of these areas to edit a volume on the specific topic on an annual or biannual basis. Each topic and tumor type is covered in a volume appearing frequently and predictably, discussing current diagnosis, staging, markers, all forms of treatment modalities, basic biology, and more. *CSU-PHS Collaborative Radiological Health Laboratory* Collaborative Radiological Health Laboratory,1977 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1993 First multi-year cumulation covers six years 1965-70 **2017 CFR Annual Print Title 42 Public Health Parts 1 to 399** Office of The Federal Register,2017-07-01 **Medical Books and Serials in Print** ,1984 **Pathology Annual** ,1980 **CSU-FDA Collaborative Radiological Health Laboratory Annual Report** ,1981 Contains reports on ongoing investigations being conducted by the Laboratory for its long-term study of the mortality, morbidity, and physiopathology of beagles exposed to a single low dose of ionizing radiation in utero or early in life CSU-FDA Collaborative Radiological Health Laboratory Annual Report Collaborative Radiological Health Laboratory,1976 Contains reports on ongoing investigations being conducted by the Laboratory for its long-term study of the mortality, morbidity, and physiopathology of beagles exposed to a single low dose of ionizing radiation in utero or early in life List of Serials and Monographs Indexed for Online Users ,1990 *Energy Research Abstracts* ,1982 **Annual Report - United States Fish and Wildlife Service** U.S. Fish and Wildlife Service,1979 Interstitial Pulmonary Diseases Moises Selman L, Roberto Barrios,1991-03-31 This book discusses basic and clinical aspects of selected topics in interstitial lung disease and the pathogenic mechanisms of pulmonary fibrosis.
