Dispatches from the Vaccine Wars Christopher A. Shaw, 2021-08-31 Enter the trenches of the bloodiest battles you ve never heard of the Vaccine Wars Professor Christopher A Shaw discovered after a deep dive literature search on aluminum impacts on humans and animals that aluminum hydroxide an adjuvant in the anthrax vaccine had a significantly negative impact on motor functions and reflexes of patients in the literature After that finding he did what scientists are supposed to do and kept following the leads However organizations like WHO dismissed him immediately Those powerful organizations either knew what he knew that aluminum vaccine adjuvants were harmful or they simply didn t care In either case two possible reasons for the lack of response became clear to Shaw and his colleagues dogma and money The first had served to convince most of the world s medical professionals that Shaw had to be wrong because after all the science was settled And behind much of this was the naked fact of how much money vaccines brought in to cover the pharmaceutical industry s profit margin The combination of those two have the fingerprints of various Big Pharma companies smudged all over the question of vaccine safety which included the demonization of both scientists and lay scholars who raised even the tamest questions about safety and the push for vaccine mandates around the world After these events Shaw decided to dig deeper Dispatches from the Vaccine Wars is a comprehensive look at the origin of vaccination and the oversight of vaccines by various regulatory bodies in the United States and in Canada The book provides not only the official view on vaccines safety and efficacy but also provides a critical analysis on which such views are based Aluminum and other compounds that may contribute to autism spectrum disorder are discussed at length Professor Shaw also analyzes the corporate influences driving vaccine uptake worldwide and provides an in depth look at the push for
