**How German Parties Select Candidates of Immigrant Origin** Sara Ceyhan, 2020-10-31 This book analyzes the threshold candidates of immigrant background need to overcome to run for legislative office Understanding whether political parties are able to adapt their selection criteria helps to assess their ability to respond to the underrepresentation of citizens of immigrant origin in parliament Although Germany's ethnic diversity is on a steady rise citizens of immigrant origin remain descriptively underrepresented Despite the pivotal role the intra party candidate selection plays in shaping who runs for election the question of how candidates of immigrant background fare in political

parties candidate selection in comparison to native born candidates remained a blind spot of research Therefore the author presents in depth empirical evidence on the selection of candidates of immigrant background in German political parties The book addresses scholars of political science interested in electoral studies as well as policy makers and party officials interested in a balanced representation of their political representatives      **Political Candidate Selection** Jeanette Ashe,2019-12-05 The secret garden of politics where some win and others lose their candidate selection bids and why some aspirant candidates are successful while others fail have been enduring puzzles within political science This book solves this puzzle by proposing and applying a universally applicable multistage approach to discover the relationship between selection rules selectors biases aspirants attributes and selection outcomes Rare party and survey data on winning and losing candidates and insider views on what it takes to win a selection contest at multiple selection stages are compared and used to reveal the inner workings of the secret garden With a primary focus on the British Labour party over several elections the findings challenge many long held assumptions about why some aspirant candidate types are successful over others and provides real world and controversial solutions to addressing women s and other marginalised groups descriptive underrepresentation As such it provides a much needed fresh look at party selection processes and draws new conclusions as to why political underrepresentation occurs and should inform policies to remedy it This text will be of key interest to scholars and students of gender and ethnicity in politics political parties and candidate selection and more broadly to the study of political elites comparative politics sociology labour studies gender race and disability studies and to practitioners

Goertzel, Stephan Vladimir Bugaj, 2006 Describing the near future technologies and scientific changes that will affect human life in the next 25 years, this book covers key topics in artificial intelligence as well as looking at computing and biotechnology. Career Behaviour and the European Parliament William T. Daniel, 2015-04-30 Career Behaviour and the

European Parliament seeks to answer the question of how a political institution such as the European Parliament can impact the career ambitions and behaviours chosen by European politicians. Long considered a second order legislature in its degree of political importance and prestige, the European Parliament is the only directly elected institution within the European Union and is an increasingly important part of the European legislative process. Using a major new source of quantitative data and interviews with more than 50 current and former European legislators, this book argues that as the institution has become increasingly professionalized and powerful, the volatility of its membership has declined. However, the professional ambitions of its members vary greatly by national background, leading to an uneven distribution of legislative seniority and influence within the legislature. The book presents a new theory with political careers acting as institutions in themselves and also offers complete background information on all elected Members of the European Parliament from 1979-2014.

Reuven Y. Hazan, Gideon Rahat, 2010-07-01 Can too much participation harm democracy? Democratic theory places great importance upon the conduct of elections, but it is not often recognized that the electoral game takes place in two arenas, not only between parties but also within them. This pioneering book presents a new approach to understanding political parties. It sheds light on the inner dynamics of party politics and offers the first comprehensive analysis of one of the most important processes any party undertakes: its process of candidate selection. Candidate selection methods are the mechanisms by which a party chooses its candidates for the general elections. It may be the function that separates parties from other organizations. For such an important function, this field has certainly faced a dearth of serious investigation. Hazan and Rahat, the leading scholars on this topic, conduct an in-depth analysis of the consequences of different candidate selection methods on democracy. This book is a culmination of almost two decades of research and defines the field of candidate selection. Part I of

the book delineates candidate selection methods based on four major dimensions candidacy the selectorate decentralization and voting versus appointment systems Part II analyses the political consequences of using different candidate selection methods according to four important aspects of democracy participation representation competition and responsiveness The book ends with a proposed candidate selection method that optimally balances all four of the democratic aspects concurrently and answers the question Is the most participatory candidate selection method necessarily the best one for democracy Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit [www.essex.ac.uk/ecpr](http://www.essex.ac.uk/ecpr) The General Editor is Professor David M Farrell School of Politics and International Relations University College Dublin

**China's Authoritarian Path to Development** Liang Tang, 2017-06-14 This book examines the various stages of China's development in the economic social and political fields relating theories and models of development to what is actually occurring in China and discussing how China's development is likely to progress going forward It argues that China's modernization hitherto can be characterized as authoritarian development a fusion of mixed economic institutions of varying types of ownership with social stability and political cohesiveness and that the present phase where more emphasis is being given to social issues is likely to lead on to a new phase where a more mature civil society and a more extensive middle class are likely to look for greater democratization It presents an in depth analysis of China's changing social structure and civil society explores the forces for and processes of democratization and assesses the prospects for further democratization

in the light of changing social structures      **Modernising the Labour Party** T. Quinn, 2004-10-14 Few parties have undergone such comprehensive organizational change as the Labour Party since 1983 Labour's organization once institutionalised the political exchange between office seeking politicians and the party's policy seeking trade union paymasters Using accessible rational choice models Thomas Quinn explores how consecutive election defeats prompted party leaders to modernize this structure to regain voters trust reducing union influence in policymaking parliamentary candidate selection and leadership contests The price may be a centralized party vulnerable to membership exit and union funding cuts

**Democracy and the Cartelization of Political Parties** Richard

S. Katz, Peter Mair, 2018-07-04 Political parties have long been recognized as essential institutions of democratic governance Both the organization of parties and their relationships with citizens the state and each other have evolved since the rise of liberal democracy in the 19th and early 20th centuries Going into the 21st century it appears that parties losing popular support putting both parties and potentially democracy in peril This book traces the evolution of parties from the model of the mass party through the catch all party model to argue that by the late 20th century the principal governing parties and their allied smaller parties collectively the political mainstream were effectively forming a cartel in which the form of competition might remain and indeed even appear to intensify while its substance was increasingly hollowed out The spoils of office were increasingly shared rather than restricted to the temporary winners contentious policy questions were kept off the political agenda and competition shifted from large questions of policy to minor questions of managerial competence To support this cartel the internal arrangements of parties changed to privilege the party in public office over the party on the ground The unintended consequence has been to stimulate the rise of extra cartel challengers to these cozy arrangements in the form of anti party system parties and populist oppositions on the left but especially on the right Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit [www](http://www)
