**Giant Robot** ,1999 Frames of Anime Tze-Yue G. Hu,2010-04-01 Frames of Anime provides a wonderfully concise and insightful historical overview of Japanese animation more importantly Tze yue G Hu also gives the reader a much needed frame of reference cultural and historical for understanding its development Harvey Deneroff Savannah College of Art and Design Atlanta Georgia This is a valuable study that transcends most of its predecessors by situating Japanese anime in its cultural context and providing detailed insight into the lives and works of

some of Japan's most prominent animators and their struggles to establish it as a legitimate form of cinema and television media. Its authorship by an Asian scholar also conversant with Chinese and Southeast Asian cinema and comic book culture gives it a unique comparative character. John Clammer, United Nations University, Japanese anime has long fascinated the world and its mythical heroes and dazzling colors increasingly influence popular culture genres in the West. Tze-yue G. Hu analyzes the language medium of this remarkable expressive platform and its many socio-cultural dimensions from a distinctly Asian frame of reference, tracing its layers of concentric radiation from Japan throughout Asia. Her work, rooted in archival investigations, interviews with animators and producers in Japan as well as other Asian animation studios, and interdisciplinary research in linguistics and performance theory, shows how dialectical aspects of anime are linked to Japan's unique experience of modernity and its cultural associations in Asia, including its reliance on low-wage outsourcing. Her study also provides English readers with insights on numerous Japanese secondary sources as well as a number of original illustrations offered by animators and producers she interviewed.

**Global Science Fiction** Gary Westfahl, 2005-06-09. Science fiction represents a diverse community of writers and readers that spans the entire world. This collection provides a global tour of the genre with essays about Latin American, European, African, Arabic, Indian, Japanese, and Chinese science fiction, providing insights about how writers around the world have explored and reinvigorated the genre. Essays by prominent critics from five continents inform about particular cultures and analyze representative texts by authors such as Tobias S. Buckell, Lourenço Mutarelli, Stanislaw Lem, Masande Ntshanga, Tawfiq Al-Hakim, Anil Menon, and Cixin Liu. The contributing scholars examine how national experiences have shaped these narratives, which often differ strikingly from Anglo-American science fiction. An introductory survey of foreign language science fiction in the United States endeavors to explain why so many of these texts have remained unknown to Anglophone readers. An extensive bibliography lists numerous resources for further study of science fiction from various parts of the world.

**Cinema Anime** Steven T. Brown, 2006-04-01. This collection charts the terrain of contemporary Japanese animation, one of the most explosive forms of visual culture to emerge at the crossroads of transnational cultural production in the last twenty-five years. The essays offer bold and insightful engagement with anime's concerns with gender identity, anxieties about body mutation and technological monstrosity, and apocalyptic fantasies of the end of history. The contributors dismantle the distinction between high and low culture and offer compelling arguments for the value and importance of the study of anime and popular culture as a key link in the translation from the local to the global.
