The Geometry of Urban Layouts Mahbub Rashid, 2016-06-16 This book presents a compendium of the urban layout maps of 2 mile square downtown areas of more than one hundred cities in developed and developing countries, all drawn at the same scale using high resolution satellite images of Google Maps. The book also presents analytic studies using metric, geometrical, topological, or network and fractal measures of these maps. These analytic studies identify ordinaries, extremes, similarities, and differences in these maps, investigate the scaling properties of these maps, and develop precise descriptive categories, types, and indicators for multidimensional comparative studies of these maps. The findings of these studies indicate that many geometric relations of the urban layouts of downtown areas follow regular patterns that, despite social, economic, and cultural differences among cities, the geometric measures of downtown areas in cities of developed and developing countries do not show significant differences and that the geometric possibilities of urban layouts are vastly greater than those that have been realized so far in our cities.

The Making of America's Culture Regions Richard L. Nostrand, 2018-01-19 This outstanding text provides students with the essential foundation in the historical geography of the United States. Distinguished scholar Richard L. Nostrand skillfully synthesizes decades of historical geography research in an engaging and thought provoking overview. His regional geography framework emphasizes the three themes central to cultural geography: cultural ecology, cultural diffusion, and cultural landscape, to explain the formation and change of culture regions in the United States. He shows convincingly that regions are a valuable pedagogical device for developing students' understanding of place and context.

A Guide to Information Sources in the Geographical Sciences Stephen Goddard, 1983-01-01 Geography is a wide ranging discipline and the number of information sources available is truly enormous. These include printed books and journal articles, maps, satellite photographs, archives, statistical information, and much else. One particular problem facing geographers is that when one studies a foreign country, information may be available only in the foreign country and difficult to obtain. This book discusses the information sources available to geographers.

Period and Place Alan R. H. Baker, Mark Billinge, 1982-05-06 This 1982 volume of essays attempts to promote discussion about the purpose and practice of historical geography.

in 1988 this book provides a fascinating comparative review of research in urban historical geography in Britain and West Germany It draws together a wide range of material on the history of urban development to explore the theoretical and methodological possibilities offered by comparative surveys of contrasting national and regional urban expenses The chronological focus of the essays ranges in time from the medieval period onwards and the contributors explore not only the specifically intellectual consequences of their empirical research but also its policy implications for urban planners and conservationists Serious extended comparative debate has hitherto been absent from the field of urban historical geography as a whole this volume sought to reverse that trend and in so doing to establish a fresh research agenda for an important and expanding discipline Main Street Revisited Richard V. Francaviglia,1996-06 Popular culture Francaviglia looks sympathetically but realistically at the ways in which Main Street s image developed and persists He reaffirms that life can imitate art that the cherished icons surrounding Main Street have become the substance of popular culture Ultimately his book is about the material culture that architects town developers and image makers have left us as their legacy Seen
