Crafting Minoanisation Joanne Elizabeth Cutler, 2021-10-31 The mid second millennium BC material record of the southern Aegean shows evidence of strong Cretan influence This phenomenon has traditionally been seen in terms of Minoanisation but the nature and degree of Cretan influence and the process processes by which it was spread and adopted have been widely debated This new study addresses the question of Minoanisation through a study of the adoption of Cretan technologies in the wider southern Aegean principally weaving technology By the early Late Bronze Age Cretan style discoid loom weights had appeared at a number of settlements across the southern Aegean In most cases this represents not only the adoption of a particular type of loom weight but also the introduction of a new weaving technology the use of the warp weighted loom The evidence for and the implications of the adoption of this new technology is examined Drawing upon recent advances in textile experimental archaeology the types of textiles that are likely to have been produced at a range of sites both on Crete itself and in the wider southern Aegean are discussed and the likely nature and scale of textile production at the various settlements is assessed A consideration of the evidence for the timing and extent of the adoption of Cretan weaving technology in the light of additional evidence for the adoption of other Cretan technologies is used to gain insight into the potential social and economic strategies engaged in by various groups across the southern Aegean as well as the

motivations that may have driven the adoption and adaptation of Cretan cultural traits and accompanying behaviors By examining how technological skills and techniques are learned and considering possible mechanisms for the transmission of such technical knowledge and know how new perspectives can be proposed concerning the processes through which Cretan techniques were taken up and imitated abroad

Culture and Comfort Katherine Grier, 2013-09-03 In Culture and Comfort Katherine C Grier shows how the design and furnishings of the mid nineteenth century parlor reflected the self image of the Victorian middle class Parlors provided public facades for formal occasions and represented an attempt to resolve the often opposing ideals of gentility and sincerity to which American culture aspired The book traces the fortunes of the parlor and its upholstery from its early incarnations in palace hotels railroad cars steamships and photographers studios through its mid century heyday when even remote frontier homes could boast suites of red plush sofas and chairs to its slow uneven metamorphosis into the more versatile living room The author argues that even as the home increasingly was seen as a haven from industrialization and commercialization its ties to industry and commerce in the form of more affordable machine made furniture and drapery became stronger By the 1920s the parlor's decline signaled both a blurring of the Victorian distinctions between public and private manners and the transfer of middle class identity from the home to the automobile Describing the deportment a parlor required the activities it sheltered and the marketing and manufacturing breakthroughs that made it available to all Culture and Comfort reveals the full range of cultural messages conveyed by nineteenth century parlor materials
