Alsup,2007-02-01 The Post Resurrection Appearance Stories of the Gospel Tradition Although there are innumerable studies of the Easter event the spectrum of New Testament research demonstrates an astonishing vacuum regarding a history of tradition analysis of the Easter appearance stories especially in the application of the form critical method This study begins with a methodological review of the more recent literature and challenges the widely accepted view that the appearance stories are to be excluded from consideration of the origins of Easter faith Because of the far reaching confusion over the place of these stories within the complex of the resurrection traditions Part Two scans the distinctions and relationships between them In Part Three the author concentrates upon the appearance stories themselves and raises the following questions Are pre redactional forms discernible If so do such demonstrate by comparison similarities of form and content Does a NT Gattung stand behind them And finally Part Four probes the matter of analogies in the world of primitive Christianity while Part Five summarizes and asks provisionally if observations of a formal nature invite suggestive possibilities for further work on the question of historical experience behind the stories An attempt at critical review of such questions is long overdue **Building a Community of Writers** Kim Cernek,2007-02 Featuring writer s workshop

teaching techniques activities directly linked to writing standards Cover **Narratives of Organisational Change and Learning** Stefanie Reissner,2008-01-01 Narratives of Organisational Change and Learning investigates change and learning through the comparative and contextual analysis of organisational stories It focuses on how organisational actors make sense of and learn from profound change as exemplified by three manufacturing firms from Britain South Africa and Russia The interaction between organisational change and wider social economic and political changes in the organisations environments and their impact on the organisational actors identity is examined The book also explores the complex responses to organisational change epitomised by patterns of stories prevalent in each of the three organisations as well as the important insights into often unacknowledged narrative processes of learning which result from profound change

Maps of Meaning Jordan B. Peterson, 2002-09-11 Why have people from different cultures and eras formulated myths and stories with similar structures What does this similarity tell us about the mind morality and structure of the world itself From the author of 12 Rules for Life An Antidote to Chaos comes a provocative hypothesis that explores the connection between what modern neuropsychology tells us about the brain and what rituals myths and religious stories have long narrated A cutting edge work that brings together neuropsychology cognitive science and Freudian and Jungian approaches to mythology and narrative Maps of Meaning presents a rich theory that makes the wisdom and meaning of myth accessible to the critical modern mind

A Cultural Dictionary of Punk Nicholas Rombes, 2010-06-01 Neither a dry as dust reference volume recycling the same dull facts nor a gushy gossip puff piece A Cultural Dictionary of Punk 1974 1982 is a bold book that examines punk as a movement that is best understood by placing it in its cultural field It contains myriad critical listening descriptions of the sounds of the time but also places those sounds in the context of history Drawing on hundreds of fanzines magazines and newspapers the book is in the spirit of punk an obsessive exhaustively researched and sometimes deeply personal portrait of the many ways in which punk was an artistic cultural and political expression of defiance A Cultural Dictionary of Punk is organized around scores of distinct entries on everything from Lester Bangs to The Slits from Jimmy Carter to Minimalism from Dot Dash to Bad Brains Both highly informative and thrillingly idiosyncratic the book takes a fresh look at how the malaise of the 1970s offered fertile ground for punk as well as the new wave post punk and hardcore to emerge as a rejection of the easy platitudes of the dying counter culture The organization is accessible and entertaining short bursts of meaning in tune with the beat of punk itself Rombes upends notions that the story of punk can be told in a chronological linear fashion Meant to be read straight through or opened up and experienced at random A Cultural Dictionary of Punk covers not only many of the well known now legendary punk bands but the obscure forgotten ones as well Along the way punk s secret codes are unraveled and a critical time in history is framed and exclaimed Visit the Cultural Dictionary of Punk blog here

Epidemic Politics in Contemporary Vietnam Martha Lincoln, 2021-11-04 Through a tumultuous 20th century period of revolution and foreign wars Vietnam s public health system was praised by international observers as a bright light in an epidemiologically dark world standing out for its accomplishments in infectious disease control Since the country s transition to a market economy with socialist orientation in the mid 1980s however some of these achievements have been reversed as the renovation of national systems for welfare and health leaves gaps in the social safety net A series of cholera outbreaks that spread through Northern Vietnam in 2007 2010 revealed the paradoxes contradictions and challenges that Vietnam

faces in its post transition period This book presents an anthropological analysis of the political economic and infrastructural inputs to these epidemics and suggests how the most commonly repeated accounts of disease spread misdirected public attention and suppressed awareness of risk factors in Vietnam s capital Drawing a parallel to the experience of novel coronavirus in Asia and beyond this book reflects on how political priorities economic forces and cultural struggles influence the experience and the epidemiology of infectious disease Landscape, Religion, and the Supernatural Matthias Egeler,2024 This book is the first study to tackle the relationship between landscape and religion in depth Author Matthias Egeler overviews previous theories of the relationship between landscape and religion and then pushes this theorizing further with a rich case study the supernatural landscape of the Icelandic Westfjords There religion and the supernatural from churches to elf hills are ubiquitous in the landscape and as Egeler shows this example sheds entirely new light on core aspects of the relationship between landscape religion and the supernatural **Storytelling** Holly Burns,2008
