Business and Politics in Asia's Key Financial Centres J. J. Woo, 2015-12-14. This book provides unique insights into the politics of finance and the socio-political relations which drive financial policymaking in Hong Kong, Singapore and Shanghai. While the existing literature in the field focuses mainly on economic explanations for financial centre development, this book fills a gap by focusing on the socio-political relations which underpin the financial policy-making process. Drawing on extensive interviews with senior policy makers and financial sector professionals, the book describes how state-industry relations drive financial policy-making in three major financial hubs. Insights and policy recommendations drawn from these interviews will be particularly useful for policy makers and financial sector professionals hoping to draw lessons from the successful development of the three leading Asian financial centres. **Business and Politics in Asia's Key Financial Centres** draws on public policy theoretical frameworks for its analytical basis. The three chapters focusing on the historical development of Hong Kong, Singapore and Shanghai also provide a consolidated narrative with regard to the development of these three cities as leading financial centres while also serving as independent case studies. Scholars focusing on policy processes and political factors that underpin financial sector development as well as instructors and students of public policy, international political economy and financial sector policy will find this book useful for their research.

Elizabeth Graue, Daniel J. Walsh, 1998-02-19. What is the world like for today's children? How do they construct meaning in it? Answering these key questions, *Studying Children in Context* explains the art and science of doing qualitative research involving children. Authors M. Elizabeth Graue and Daniel J. Walsh carefully discuss the research process dealing succinctly with generic research issues yet emphasizing where work with children presents its own particular challenges. They look across the research enterprise in the first part of the book, conceptualizing it as a holistic

activity They next focus on fieldwork and in the final section examine the interpreting and reporting aspects of qualitative research In addition to presenting their own considerable experiences in fieldwork with children Graue and Walsh also present the contributions of numerous researchers with their own insights on key issues Studying Children in Context will be an invaluable addition to the libraries of teachers and researchers interested in qualitative research methods in general and in doing fieldwork with children in particular Words of Welfare Sanford Schram,1995 It has been suggested that policy analysis has come to serve the needs of the state at the expense of the citizens This book offers a critique of how welfare policy is analyzed and set in the USA illustrating that how we study issues affects what ultimately gets done about them
