Patterns in Comparative Religion Mircea Eliade, 1974 In this era of increased knowledge the essence of religious phenomena eludes the psychologists sociologists linguists and other specialists because they do not study it as religious According to Mircea Eliade they miss the one irreducible element in religious phenomena the element of the sacred Eliade abundantly demonstrates universal religious experience and shows how humanity's effort to live within a sacred sphere has manifested itself in myriad cultures from ancient to modern times how certain beliefs rituals symbols and myths have with interesting variations persisted

Patterns of Belief Eric Carlton, 1973 *Patterns of Belief* Eric Carlton, 2017-07-05 The principle purpose of Religious Education has traditionally been to instruct and inform with discussion and questioning occupying a secondary position This traditional approach gives overwhelming emphasis to the historical aspects of religion and not only fails to put into perspective the issues raised by religion today but also takes no account of the growing movement in schools towards learning by enquiry and questioning rather than by the accumulation of stated facts This title first published in 1973 explores the ways in which religion can be approached from a more sociological standpoint and aims to encourage the reader to examine religion in a more objective manner The wide ranging and exploratory theme of this book makes it ideal for follow up work and suggestions for further study are provided after each chapter This title will be of interest to teachers and students of Religious Studies

American Mosaic Phillip E. Hammond, Benton Johnson, 1970

An Ethology of Religion and Art Bryan Rennie, 2020-02-13 Drawing from sources including the ethology of art and the cognitive science of

religion this book proposes an improved understanding of both art and religion as behaviors developed in the process of human evolution Looking at both art and religion as closely related but not identical behaviors a more coherent definition of religion can be formed that avoids pitfalls such as the Eurocentric characterization of religion as belief or the dismissal of the category as nothing more than false belief or the product of scholarly invention The book integrates highly relevant insights from the ethology and anthropology of art particularly the identification of the special by Ellen Dissanayake and art as agency by Alfred Gell with insights from among others Ann Taves who similarly identified specialness as characteristic of religion It integrates these insights into a useful and accurate understanding and explanation of the relationship of art and religion and of religion as a human behavior This in turn is used to suggest how art can contribute to the development and maintenance of religions The innovative combination of art science and religion in this book makes it a vital resource for scholars of Religion and the Arts Aesthetics Religious Studies Religion and Science and Religious Anthropology The Dynamics of Religion ,1979
