Paul Ricoeur Bibliographie Primaire Et Secondaire Primary And Secondary Bibliography 19352000:

Paul Ricoeur Frans D. Vansina, 2000 Already more than sixty years Paul Ricoeur enriches the international philosophical patrimony with an astonishing number of highly technical books and enlightening reflections on actual problems and situations To serve the community of researchers in philosophy I have already published two systematic bibliographies of and on Ricoeur in 1985 and 1995 Encouraged by friends and colleagues I present now another updated bibliography as exhaustive as possible *Phenomenology World-Wide* Anna-Teresa Tymieniecka, 2014-11-14 Phenomenology is the philosophy of our times Through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder Edmund Husserl Now its seminal ideas have been handed over to a new era The worldwide contributors to this volume make it manifest that phenomenological inspiration knows no cultural barriers It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives Phenomenology's universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them This is the aim of the present book resourcement and reinvigoration It is meant to be not only a reference work but also a guide for research and study To restore the authentic vision of phenomenology we propose returning to its foundational source in Husserl's project of a universal science unpacking all its creative capacities In the three parts of this work there are traced the stages of this philosophy's progressive uncovering of the grounding levels of reality ideal structures constitutive consciousness the intersubjective lifeworld and beyond The key concepts and phases of Husserl's thought are here exfoliated Then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated Phenomenology's geographic spread is reviewed We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences Lastly the phenomenological project's new horizons on the plane of life are limned horizons with so powerful a draw that they may be said not to beckon but to summon Here is the movement's vanguard This collection has 71 entries Each entry is followed by a relevant bibliography There is a helpful Glossary of Terms and an Index of Names **Philosophy** Hans E. Bynagle, 2006-05-30 A newly reorganized up to date overview of key reference works in philosophy reflects a veritable explosion of reference sources both print and online published over the past decade Nearly 300 of the 700 entries consist of new material with an additional 50 entries substantially revised and updated English language sources are emphasized but important non English works are also well represented For professional philosophers philosophy educators students from beginning to graduate and librarians This guide represents a substantial updating and complete re organization of the author's 1997 *Philosophy A Guide to the*

Reference Literature 2nd edition 1st edition 1986 It reflects a veritable explosion of reference sources both print and online in the field of philosophy over the past decade Nearly 300 entries or 40 percent are entirely new An additional 50 or so entries have substantial revisions recording new editions changes in serial publications series and websites or additional volumes completed in multi volume sets In addition it has been entirely re organized along topical lines Each of its twenty three chapters is divided into four sections 1 general sources 2 history of philosophy 3 branches of philosophy and 4 miscellanea This new arrangement accords better with the greatly expanded range of philosophy reference sources and makes it easier for the user to identify related sources of different types bibliographies dictionaries web gateways etc on the same topic Like its predecessor Guide to Reference Sources in Philosophy the 3rd edition aims to serve a diverse audience of professional philosophers philosophy educators students from beginning to graduate and librarians All entries include generous annotations that are often evaluative as well as descriptive English language sources are emphasized but non English works important to researchers or of interest to users with facility in other languages are also well represented

The Political Ethics of Jean-François Lyotard and Jacques Derrida Georges de Schrijver,2010 A genuine political ethics seems to require a universal perspective and yet we are told that the postmodern age eschews universal perspectives In this book Georges De Schrijver argues that the leading proponents of postmodernity have not as is commonly assumed abandoned the search for universals Rather they have sought to reshape the concept in ways that account for postmodernity s critique Examining the thought of both Jean Francois Lyotard who prophesies the end of the grand stories and Jacques Derrida the leading proponent of deconstruction De Schrijver comes to the conclusion that each in his turn is still in search of the universal Taking his lead from Kant s unrepresentable Idea Lyotard holds out hope for a universal expressed through respect for heterogeneity whereas Derrida arrives at this impossible dream through a critical study of Husserl s

phenomenology The common bond for Lyotard and Derrida is their quest of the unrepresentable For Lyotard this comes through a sublime sadness urging him to side with the silenced party in legal disputes For Derrida the same quest is expressed through a yearning for the impossible things to come a justice that goes beyond legality a reshaping of the international juridical order and a hospitality that is truly unconditional in its reach Underlying the thought of both men is a profound appreciation for their Jewish ethical inheritance an appreciation they learn from Emmanuel Levinas In passing judgment on the new world order both authors go decidedly beyond Kant and thus beyond modernity in reaching for a truly transcultural perspective in this era of globalization

The Catholic Periodical and Literature Index, 2006

The Jesuits of the Low Countries Rob Faesen, Leo Kenis, 2012 From 3 until 5 December 2009 an international colloquium was organised at the Faculty of Theology and Religious Studies KU Leuven which intended to highlight and discuss the impact of the Society of Jesus on the development of cultural scientific and political life in the Low Countries The colloquium not only aimed to bring together specialists in the various fields of Jesuitica research but also

organised a meeting between the people committed to scientific research and those who disclose archives and other information sources enabling new research. Some of the finest scholars in Jesuit studies presented the results of their research in a number of lectures. The current volume contains a selection of these lectures dealing with a broad spectrum of subjects from Jesuit spirituality to the Jesuit contribution to the science of law, political thought and the visual arts to education, mathematics and architecture. Attention is paid to the role of the Jesuits in the development of the printing press, their relation with Louvain's Faculty of Theology and their position in the Jansenist controversies as well as to their expansion abroad in the *Missio Hollandica* in South Wales and in the mission to China. Furthermore, the book includes a number of presentations from the workshops specifically concerning archives and databases related to the history of the Jesuits in the Low Countries.

Che non esista una teoria del riconoscimento degna di questo nome, cos'come invece esistono una o più teorie della conoscenza, un fatto. P. Ricoeur. Se sul piano teorico il riconoscere si presenta come una modalità attiva del conoscere, oggettivo sul piano pratico, esso chiama in causa il rapporto con l'altro ed evidenzia una dimensione etico-pratica, insieme attiva e passiva, espressione di una reciprocità che gli è costitutiva, dice cioè l'originaria correlazione tra la relazione a sé e la relazione ad altri. Come pensare insieme, quindi, dimensione teorica e dimensione pratica del riconoscimento. La pista teorico-etica che si sviluppa in questo volume, quella di un pensare che si esercita nella e a partire dalla relazione di reciprocità con l'altro, dà, nel rispetto della dissimmetria originaria che la costituisce, soltanto nella quale può accadere l'evento della conoscenza, come qualcosa di gratuito che suscita gratitudine. In tal modo, il riconoscimento declinato tutto al passivo, come riconoscimento, apre la strada all'esperienza di un pensare insieme nello spazio del tra.
