Perspectives On Equality Constructing A Relational Theory:

Perspectives on Equality Christine M. Koggel, 1998 Beginning with liberalism's foundational idea of moral equality as the basis for treating people with equal concern and respect Christine Koggel offers a modified account of what makes human beings equal and what is needed to achieve equality Koggel utilizes insights from care ethics but switches the focus from care as a moral response within personal relationships to the broader network of relationships within which care is given or withheld The result is an account of moral personhood and agency that is richer than the view propounded by liberal theory and care ethics This exciting and original work challenges theoretical resistance to the idea that relationships are relevant to an understanding of equality and it provides an opening to a critical analysis of relationships and care that informs and transforms our understanding of what is needed to treat all people with equal concern and respect

Relational Theory Christine M. Koggel, Ami Harbin, Jennifer J. Llewellyn, 2025-04-18 Relational theory starts from the ontological fact of our being in networks of relationships and draws out what this means for theories of knowledge and for moral and political theory This book uses insights from feminist relational theory to outline the ontological epistemological and moral political implications of this theoretical approach The chapters in this volume focus on relationships of power and oppression how these relationships shape who is taken to have knowledge and who is dismissed or ignored and what all of this means for theories of equality justice and moral and political theory more generally A focus on relationships of power and oppression opens up an examination into structures such as colonialism and capitalism that shape interconnected networks of relationships between humans and human and non human entities and ecosystems This volume which now includes eight additional chapters published both before and after the original special issue offers a significant step forward in the development of feminist relational theory Following early forays in identifying and criticizing mainstream liberal theory in the Western tradition chapters in this collection draw on approaches by anti oppression theorists found in critical disability critical race anti colonial decolonial and non Western theories to further broaden the descriptions and analyses of relationships and networks of relationships and to extend and advance feminist relational theory and its applications The chapters in this book were originally published in the Journal of Global Ethics

Being Relational Jocelyn Downie, Jennifer J. Llewellyn, 2011-11-10 At the heart of relational theory lies the idea that the human self is fundamentally constituted in terms of its relations to others For relational theorists the self not only lives in relationship with and to others but also owes its very existence to such relationships In this groundbreaking collection leading relational theorists explore core moral and metaphysical concepts while health law and policy scholars respond by analyzing how such considerations might apply to more practical areas of concern Innovative and self reflexive Being Relational brings a powerful theoretical framework to health law and policy studies In so doing it makes a bold contribution to scholarship and will appeal to a broad range of thinkers especially those with an interest in social justice and who seek to understand the complex ways in which power is
