Perspectives on Gulf Coast Prehistory Dave D. Davis, 1984 For the first time the archaeology of the entire northern Gulf Coast has been brought together in a comprehensive and integrated fashion The importance of what heretofore was the soft underbelly of southeastern archaeology has at least been recognized in this impressive compendium A landmark volume it is equivalent in scope to those of the North American Handbook series published by the Smithsonian Institution Jeffrey P Brain Peabody Museum Harvard University *Perspectives on Gulf Coast Prehistory* is a much needed volume which sheds light on one of the most neglected areas in southeastern archaeology the coastal strip that extends from east Texas to south Florida Each chapter in this edited work written by a recognized authority on the subject covers a particular region or chronological period Taken together the chapters contain a wealth of information on the prehistory ethnohistory and environments of the coastal zone The text is lucid and well illustrated Moreover the editor has done a superb job of arranging the papers into a coherent sequence In short this book is a major contribution which should be read not just by southeastern archaeologists but by anyone interested in human costal adaptations Vincas P Steponaitis SUNY Binghamton The Ripley P Bullen monograph series has gained rapid respect from southeastern archaeologists Well written and solid scholarly works addressing a broad range of important research topics they are essential reading for any student of southeastern Indians Bruce D Smith Smithsonian Institution Southeastern archaeology has long taken its orientation from the interior river valleys even though archaeologists have often been troubled by discrepancies between this traditional model and results of their work in costal regions *Perspectives on Gulf Coast Prehistory* is a response to these discrepancies While they neither downplay the importance of the interior s influence nor regard the coast as a region in itself the contributors to this book share a belief that the prehistory of the coastal area is different enough from the interior to justify studying it as a region The essays both wide ranging in concept and problem oriented cover the Woodland and Mississippian periods of Gulf coast prehistory from 1000 B C to the early European settlements around A D 1750 They investigate specific problems focusing on traditional concerns with cultural chronologies as well as processes of social change cultural interaction and environmental adaptation There are overviews of earlier research and a considerable body of previously unpublished material In keeping with the larger purpose of the conference at which these papers were presented a concluding roundtable discussion concentrates on similarities among coastal cultures Participants presented new research pinpointed strong and weak points in existing works and raised questions to stimulate further study Dave D Davis is associate dean of the college at Tulane University *Archaeology of Louisiana* Mark A. Rees, 2010-11-30 *Archaeology of Louisiana* provides a groundbreaking and up to date overview of archaeology in the Bayou State including a thorough analysis of the cultures communities and people of Louisiana from the Native Americans of 13 000 years ago to the modern historical archaeology of New Orleans With eighteen chapters and twenty seven distinguished contributors *Archaeology of Louisiana* brings together the studies of some

of the most respected archaeologists currently working in the state collecting in a single volume a range of methods and theories to offer a comprehensive understanding of the latest archaeological findings In the past two decades alone much new data has transformed our knowledge of Louisiana s history This collection accordingly presents fresh perspectives based on current information such as the discovery that Native Americans in Louisiana constructed some of the earliest known monumental architecture in the world extensive earthen mounds during the Middle Archaic period 6000 2000 B C Other contributors consider a variety of subjects such as the development of complex societies without agriculture underwater archaeology the partnering of archaeologists with the Caddo Nation and descendant communities and recent research in historical archaeology and cultural resource management that promises to transform our current appreciation of colonial Spanish French Creole and African American experiences in the Lower Mississippi Valley Accessible and engaging Archaeology of Louisiana provides a complete and current archaeological reference to the state s unique heritage and history

Principles of Geoarchaeology Michael R. Waters, 2022-02-22 Geoarchaeological studies can significantly enhance interpretations of human prehistory by allowing archaeologists to decipher from sediments and soils the effects of earth processes on the evidence of human activity While a number of previous books have provided broad geographic and temporal treatments of geoarchaeology this new volume presents a single author s view intended for North American archaeologists Waters deals with those aspects of geoarchaeology stratigraphy site formation processes and landscape reconstruction most fundamental to archaeology and he focuses on the late Quaternary of North America permitting in depth discussions of the concepts directly applicable to that research Assuming no prior geologic knowledge on the part of the reader Waters provides a background in fundamental geological processes and the basic tools of geoarchaeology He then proceeds to relate specific physical processes microenvironments deposits and landforms associated with riverine desert lake glacial cave coastal and other environments to archaeological site formation location and context This practical volume illustrates the contributions of geoarchaeological investigations and demonstrates the need to make such studies an integral part of archaeological research The text is enhanced by more than a hundred line drawings and photographs

 Synchronic and Diachronic Alluvial Landscape Reconstructions **Plaquemine Archaeology** Mark A. Rees, Patrick C.
 Livingood, 2007 First major work to deal solely with the Plaquemine societies Plaquemine Louisiana about 10 miles south of
 Baton Rouge on the banks of the Mississippi River seems an unassuming southern community for which to designate an
 entire culture Archaeological research conducted in the region between 1938 and 1941 however revealed distinctive cultural
 materials that provided the basis for distinguishing a unique cultural manifestation in the Lower Mississippi Valley
 Plaquemine was first cited in the archaeological literature by James Ford and Gordon Willey in their 1941 synthesis of
 eastern U S prehistory Lower Valley researchers have subsequently grappled with where to place this culture in the local
 chronology based on its ceramics earthen mounds and habitations Plaquemine cultural materials share some characteristics
 with other local cultures but differ significantly from Coles Creek and Mississippian cultures of the Southeast Plaquemine has
 consequently received the dubious distinction of being defined by the characteristics it lacks rather than by those it
 possesses The current volume brings together eleven leading scholars devoted to shedding new light on Plaquemine and
 providing a clearer understanding of its relationship to other Native American cultures The authors provide a thorough yet
 focused review of previous research recent revelations and directions for future research They present pertinent new data on
 cultural variability and connections in the Lower Mississippi Valley and interpret the implications for similar cultures and
 cultural relationships This volume finally places Plaquemine on the map incontrovertibly demonstrating the accomplishments
 and importance of Plaquemine peoples in the long history of native North America **Space Shuttle Advanced Solid
 Rocket Motor (ASRM) Program, Design, Construction and Operation of New Facilities for Manufacturing and
 Testing (MS, FL, LA)** , 1989 **Expedition of Hernando de Soto West of the Mississippi, 1541-1543: Symposia (p)**
 Gloria A. Young Michael P. Hoffman, 1993 **Arrowheads and Spear Points in the Prehistoric Southeast** Linda
 Crawford Culberson, 2009-11-12 The Native American tribes of what is now the southeastern United States left intriguing
 relics of their ancient cultural life Arrowheads spear points stone tools and other artifacts are found in newly plowed fields on
 hillsides after a fresh rain or in washed out creek beds These are tangible clues to the anthropology of the Paleo Indians and
 the highly developed Mississippian peoples This indispensable guide to identifying and understanding such finds is for
 conscientious amateur archeologists who make their discoveries in surface terrain Many are eager to understand the culture
 that produced the artifact what kind of people created it how it was made how old it is and what its purpose was Here is a
 handbook that seeks identification through the clues of cultural history In discussing materials used the process of

manufacture and the relationship between the artifacts and the environments it reveals ancient discoveries to be not merely interesting trinkets but by products from the once vital societies in areas that are now Alabama Arkansas Georgia Kentucky Louisiana Mississippi the Carolinas as well as in southeastern Texas southern Missouri southern Illinois and southern Indiana The text is documented by more than a hundred drawings in the actual size of the artifacts as well as by a glossary of archeological terms and a helpful list of state and regional archeological societies Bottle Creek Ian W. Brown, 2003-03-19 Consisting of 18 earthen mounds and numerous additional habitation areas dating to A D 1250-1550 the Bottle Creek site was first professionally investigated in 1932 when David L DeJarnette of the Alabama Museum of Natural History began work there to determine if the site had a cultural reipconnected to the north by a river system This volume builds on earlier investigations to present extensive recent data from major excavations conducted from 1991 to 1994 and supported in part by an NEH grant Ten anthropologists examine various aspects of the site including mound architecture prehistoric diet pottery classification vessel forms textiles used to make pottery impressions a microlithic stone tool industry water travel the persistence of mound use into historic times and the position of Bottle Creek in the protohistoric world **The Forgotten Centuries** Charles M. Hudson, Carmen Chaves Tesser, 1994 The Forgotten Centuries draws together seventeen essays in which historians archaeologists and anthropologists attempt for the first time to account for approximately two centuries that are virtually missing from the history of a large portion of the American South Using the chronicles of the Spanish soldiers and adventurers the contributors survey the emergence and character of the chiefdoms of the Southeast In addition they offer new scholarly interpretations of the expeditions of Lucas Vasquez de Ayllon from 1521 to 1526 Panfilo de Narvaez in 1528 and most particularly Hernando de Soto in 1539-43 as well as several expeditions conducted between 1597 and 1628 The essays in this volume address three other connected topics Describing some of the major chiefdoms Apalachee the Oconee Province Cofitachequi and Coosa the essays undertake to lay bare the social principles by which they operated They also explore the major forces of structural change that were to transform the chiefdoms disease and depopulation the Spanish mission system and the English deerskin and slave trades And finally they examine how these forces shaped the history of several subsequent southeastern Indian societies including the Apalachees Powhatans Creeks and Choctaws These societies the so called native societies of the Old South were in fact new ones formed in the crucible fired by the economic expansion of the early modern world *The Southern and Central Alabama Expeditions of Clarence Bloomfield Moore* Clarence Bloomfield Moore, 2001-04-09 The works by Clarence B Moore reproduced in this volume were published originally in 1899 1901 1903 1904 1905 1907 and 1918 *Archaeological News*, 1985 **A World Engraved** J. Mark Williams, Daniel T. Elliott, 1998-10-06 Collects 15 essays concerning the archaeological culture of the Swift Creek people a culture centered in Georgia and surrounding states from AD 100 to 700 While little is known of the Swift Creek culture's language and social rules their social interactions are documented using analysis of the stamps used to decorate their

 Bense,2016-09-16 A chronological summary of major stages in Southeastern United States development this unique textbook
 overviews the region s archaeology from 20 000 years ago to World War I Early chapters review the history and development
 of archaeology as a discipline The following chapters organized in chronological order highlight the archaeological
 characteristics of each featured period The book s final chapters discuss new directions in Southeastern archaeology
 including trends in teaching research the business of archaeology and the public s growing interest This versatile text
 perfectly suits undergraduates or anyone requiring a hands on guide for self exploration of the fascinating region This is the
 first of its kind book to summarize Southeastern archaeology It includes both prehistoric and historic archaeology Its easy to
