Farm Worker Futurism Curtis Marez, 2016-06-17 When we think of literature and film about farm workers The Grapes of Wrath may come to mind but Farm Worker Futurism reveals that the historical role of technology especially new media has in fact had much more to do with depicting the lives of farm laborers Mexican migrants in particular in the United States From the late 1940s when Ernesto Galarza led a strike in the San Joaquin Valley to the early 1990s when the United Farm Workers UFW helped organize a fast in solidarity with janitors at Apple Computers in the Santa Clara Valley this book explores the friction between agribusiness and farm workers through the lens of visual culture Marez looks at how the appropriation of photography film video and other media technologies expressed a farm worker futurism a set of farm worker social formations that faced off against corporate capitalism and government policies In addition to drawing fascinating links between the worlds envisioned in UFW videos on the one hand and visions of Cold War geopolitics on the other he demonstrates how union cameras and computer screens put the farm worker movement in dialogue with futurist thinking and speculative fictions of all sorts including the films of George Lucas and the art of Ester Hernandez Finally Marez examines the legacy of farm worker futurism in recent cinema and literature contemporary struggles for immigrant rights management labor conflicts in computer hardware production and the antiprison movement In contrast with cultural histories of technology that take a top down perspective Farm Worker Futurism tells the story from below showing how working class people of color have often been early adopters and imaginative users of new media In doing so it presents a completely novel analysis of speculative fiction's engagements with the farm worker movement in ways that illuminate both
