Photography And Paradox:

The Paradox of Photography Pierre Taminiaux, 2009 The Paradox of Photography analyzes the discourse on photography by four of the most important modern French poets and theorists Baudelaire Breton Barthes and Valéry It stresses in particular the importance of this visual language for the development of both new forms of narrative and original critical studies on issues of representation in art It also reflects upon the integration of photography within the domain of technical modernity while emphasizing its aesthetic identity stemming from the Western tradition of figurative painting
