Irrational Exuberance in the U.S. Housing Market Mr. Christopher W. Crowe, 2009-03-01 The recent housing bust has reignited interest in psychological theories of speculative excess Shiller 2007 I investigate this issue by identifying a segment of the U.S. population evangelical protestants that may be less prone to speculative motives and uncover a

significant negative relationship between their population share and house price volatility Evangelicals focus on Biblical prophecy could account for this difference since it may enable them to interpret otherwise negative events as containing positive news dampening the response of house prices to shocks I provide evidence for this channel using a popular internet measure of prophetic activity and a 9 11 event study I also analyze survey data covering religious beliefs and asset holding and find that end times beliefs are associated with a one third decline in net worth consistent with these beliefs providing a form of psychic insurance Scheve and Stasavage 2006a and 2006b that reduces asset demand

Surface Treatment Methods of Natural Fibres and their Effects on Biocomposites Asim Shahzad,Fulga Tanasa,Carmen-Alice Teaca,2022-03-25 Natural fiber composites have experienced a renaissance over the last two decades as a response to societal demands for developing eco friendly biodegradable and recyclable materials They are now being extensively used in everyday products as well as in automotive packaging sports and the construction industries These fibers require surface treatments in order to improve their properties and interfacial bonding with polymer matrices and to reduce their hydrophilic character These methods can be grouped into three major categories chemical physical and biological Chemical methods use chemical reagents to reduce fibers hydrophilic tendency and thus improve compatibility with the matrix They also expose more reactive groups on the fibre surface to facilitate efficient coupling with the matrix Physical methods change structural and

surface properties of the fiber and thereby influence the interfacial bonding with matrices without extensively changing the chemical composition of the fibers They are cleaner and simpler than the chemical methods Biological methods use biological agents like fungi enzymes and bacteria to modify the fiber surface properties These methods are not toxic like chemical methods and are not energy intensive like physical methods Surface Treatment Methods of Natural Fibers and their Effects on Biocomposites presents an overview and recent developments of these methods All the major methods are reviewed explaining the science and methodology behind each method The effects of these methods on various properties of fibers and the biocomposites made from these fibers are analyzed in detail The book will be an essential reference for academic researchers materials scientists and engineers postgraduate students and industrial researchers and development scientists and engineers working on natural fibers and biocomposites Extensive coverage of all the surface modification methods chemical physical biological of natural fibers and its effect on properties of produced composites The chemical mechanisms which are utilized in surface treatments are discussed in detail and how these affect the interfacial properties and characteristics Systematic and comprehensive review on surface modifications of natural fibres and explains how the effect of the surface treatment can be characterized and measured as well as the effect on properties

The Ministry, Vol. 12, No. 07 Various Authors, 2008-07-01 This issue of The Ministry contains a complete record of the twelve messages given during the 2008 summer training on the Crystallization study of the Gospel of Luke held June 30 July 5 in Anaheim California The crucial truth and burden embodied in these twelve messages may be summarized in the following two sets of statements The highest standard of morality is the living of the Lord Jesus as the Man Savior whose life was a composition of God with the divine attributes and man with the human virtues to be the basic factor for His dynamic salvation The Man Savior's God man living constituted a prototype for the reproduction of the God man in the believers who are reborn of the pneumatic Christ in their spirit and transformed by the pneumatic Christ in their soul In order to be one with the Man Savior in His God man living we need to sit at His feet and listen to His word so that we may be infused with His life for the expression of God and with His desire for our service to God unto the building of God By praying ourselves into God we are empowered in Christ to repudiate ourselves renounce our material possessions and follow the Man Savior so that we may live in the reality of the economy of God to become rich toward God for the kingdom of God We need to be today's ministers and witnesses by living and proclaiming the gospel Christ as the jubilee of grace for the accomplishing of God's eternal economy If we lose our soul life in this age and do not preserve it by lingering in the earthly and material things we may participate in the rapture of the overcomers and stand before the Son of Man on Mount Zion These messages are being published immediately following the training in order that they may benefit the saints who are participating in the many video trainings that are held throughout the earth
