Retours Journal De Budapest:

La crisis de memoria y la Segunda Guerra Mundial Susan Rubin Suleiman, Daniel Aguirre Oteiza, 2019-05-21 Tanto los psicólogos como los historiadores han demostrado que el recuerdo de acontecimientos pasados no es estable sino cambiante y está sujeto a la influencia de las circunstancias actuales y los proyectos futuros de los individuos o los grupos sociales. De manera semejante la historia misma es según la sugerente formulación de István R. V. la perpetua recreación del pasado. Está claro que la Segunda Guerra Mundial y el Holocausto están entre nosotros. En este libro estudio casos concretos en los que los recuerdos personales de la guerra presentados como memorias literarias, ficción autobiográfica compleja, película histórica, picaresca o documental personal coinciden con la memoria pública o colectiva. Susan Rubin Suleiman

Official Journal, 1926 **Perspectives on Synchronicity, Inspiration, and the Soul** Rico Sneller, 2020-07-07 This book explores the notion of the human psyche/soul and its continuing usefulness in the background of the ongoing and always accelerating technological/scientific revolution. The main argument here follows the assumption that this revolution while not necessarily being a threat to humankind is often blind or ignorant as to its subject: the human being. In the first chapters the reader is invited to reflect on the notion of thinking as a phenomenon of consciousness that transcends merely having thoughts. Relating thinking to consciousness requires reconsidering the phenomena of inspiration and ecstasy. Provided that such a thing as inspiration exists, it makes sense to revise the solipsist or substantialist account often given of the human mind. The book defines inspiration as a clairvoyance of one's psyche and ecstasy as the experience of this clairvoyance. Next, a case is made for synchronicity experiences as a key to a better understanding of the human psyche. While being enigmatic, all throughout synchronicity experiences both on the individual and on the collective level help overcome both subject/object and body/mind dualisms. It is not likely though that the solution they could offer will be readily accepted by what is called science today since it challenges one of the latter's basic premises: causality. As a more concrete example of a condensed synchronicity experience, the author dwells on physiognomy. In the final chapter, death and suffering are discussed as extreme and therefore relevant experiences of consciousness. The book interprets death in terms of enhanced subliminality and suffering as unconscious resistance against maturing. Generally, this book explores a psycho-philosophical tradition rooted in Romantic thinking from Schelling and Schopenhauer until Kierkegaard and Jung, which has hitherto been unjustly neglected if not repressed by mainstream materialism and positivism. It makes a strong case for an intellectual account of the soul. *Journal des débats politiques et littéraires*, 1921 *Cinéma hongrois* Kristian Feigelson, 2003 Plutôt qu'un traitement

monographique, ce numéro propose une approche multidisciplinaire axée sur le thème du temps et de l'histoire.
