## Return Of The World:

**Success in a Low-Return World** Michael J. Oyster, 2018-11-19 Following the Great Financial Crisis the S P 500 advanced more than 17 percent annualized from February 2009 through June 2018 At this pace a buy and hold investor in the stock market would see their money double in 5 years and more than triple in 7 years This performance has lulled many investors into thinking that such above average returns will be with us into perpetuity Unfortunately this may not be the case Far more likely the return an investor may receive from the stock market will be slightly better than half the long term average about 5% to 7% Most investment portfolios hold a greater allocation to stocks than any other class of investment asset Massive amounts of wealth were created from the bull market since early 2009 providing institutions and individuals with a rising tide that lifted their portfolios above their goals without much effort The environment of the future stands to be far less accommodating so finding suitable investments other than U S stocks that can achieve the necessary returns or make up the shortfall will be a critical component of achieving goals in years to come This book will explore those solutions

**Immanence and Immersion** Will Schrimshaw,2017-10-19 Immersion is the new orthodoxy Within the production curation and critique of sound art as well as within the broader fields of sound studies and auditory culture the immersive is routinely celebrated as an experiential quality of sound the value of which is inherent yet strengthened through dubious metaphysical oppositions to the visual Yet even within the visual arts an acoustic condition grounded in Marshall McLuhan s metaphorical notion of acoustic space underwrites predispositions towards immersion This broad conception of an acoustic condition in contemporary art identifies the envelopment of audiences and spectators who no longer perceive

from a distance but immanently experience immersive artworks and environments Immanence and Immersion takes a critical approach to the figures of immersion and interiority describing an acoustic condition in contemporary art It is argued that a price paid for this predisposition towards immersion is often the conceptual potency and efficacy of the work undertaken resulting in arguments that compound the marginalisation and disempowerment of practices and discourses concerned with the sonic The variously phenomenological correlational and mystical positions that support the predominance of the immersive are subject to critique before suggesting that a stronger distinction between the often confused concepts of immersion and the immanence might serve as a means of breaking with the figure of immersion and the circle of interiority towards attaining greater conceptual potency and epistemological efficacy within the sonic arts
