Reversible World:

Subjects on the World's Stage David G. Allen, Robert A. White, 1995 In this collection eighteen scholars offer various readings on British literature of the Middle Ages and the Renaissance Although the period covered ranges from the thirteenth through the seventeenth centuries the essays are tied together by a common interest in one of three topics poetic personae dramatic production and the influence of social context upon authors or dramatists Common to these topics is the crucial point of contact between an artist and society that prompts the literary imagination to respond either with the creation of a new character or with the demonstration of change in an old one BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Reversible World**, 1978 Worlds Apart Jean-Christophe Agnew, 1986 Drawing on a variety of disciplines and documents Professor Agnew illuminates one of the most fascinating chapters in the formations of Anglo American market culture Worlds Apart traces the history of our concepts of the marketplace and the theatre and the ways in which these concepts are bound together Focusing on Britain and America in the years 1550 to 1750 the book discusses the forms and conventions that structured both commerce and theatre As marketing practice broke free of its traditional boundaries and restraints it challenged longstanding popular assumptions about the constituents of value the nature of identity the signs of authenticity and the limits of liability New exchange relations bred new legal and commercial fictions to authorise them but they also bred new doubts about the precise grounds upon which the self and its interests were to be represented Those same doubts Professor Agnew shows animated the theatre as well As actors and playwrights shifted from ecclesiastical and civic drama to professional entertainments they too devised authenticating fictions fictions that effectively replicated the bewildering representational confusions of the new placeless market **Experimental Fashion** Francesca Granata, 2017-02-23 Shortlisted for the Millia Davenport Publication Award Experimental Fashion traces the proliferation of the grotesque and carnivalesque within contemporary fashion and the close relation between fashion and performance art from Lady Gaga's raw meat dress to Leigh Bowery's performance style The book examines the designers and performance artists at the turn of the twenty first century whose work challenges established codes of what represents the fashionable body These innovative people the book argues make their challenges through dynamic strategies of parody humour and inversion It explores the experimental work of modern designers such as Georgina Godley Bernhard Willhelm Rei Kawakubo and fashion designer performance artist and club figure Leigh Bowery It also discusses the increased centrality of experimental fashion through the pop phenomenon Lady Gaga *The Mathematical Artist* Sukanta Das, Souvik Roy, Kamalika Bhattacharjee, 2022-07-01 This book brings together the impact of Prof John Horton Conway the playful and legendary mathematician's wide range of contributions in science which includes research areas Game of Life in cellular automata theory of finite groups knot theory number theory combinatorial game theory and coding theory It contains transcripts where some eminent scientists have shared their first hand experience of

interacting with Conway as well as some invited research articles from the experts focusing on Game of Life cellular automata and the diverse research directions that started with Conway's Game of Life. The book paints a portrait of Conway's research life and philosophical direction in mathematics and is of interest to whoever wants to explore his contribution to the history and philosophy of mathematics and computer science. It is designed as a small tribute to Prof Conway whom we lost on April 11 2020.

Thinking with Demons Stuart Clark, 1999. This is a work of fundamental importance for our understanding of the intellectual and cultural history of early modern Europe. Stuart Clark offers a new interpretation of the witchcraft beliefs of European intellectuals based on their publications in the field of demonology and shows how these beliefs fitted rationally with many other views current in Europe between the fifteenth and eighteenth centuries. Professor Clark is the first to explore the appeal of demonology to early modern intellectuals by looking at the books they published on the subject during this period. After examining the linguistic foundations of their writings the author shows how the writers' ideas about witchcraft and about magic complemented their other intellectual commitments in particular their conceptions of nature history religion and politics. The result is much more than a history of demonology. It is a survey of wider intellectual and ideological purposes and underlines just how far the nature of rationality is dependent on its historical context.

Martin Luther and Buddhism Paul S. Chung, 2008-02-02. Martin Luther and Buddhism. Aesthetics of Suffering carefully traces the historical and theological context of Luther's breakthrough in terms of articulating justification and justice in connection to the Word of God and divine suffering. Chung critically and constructively engages in dialogue with Luther and with later interpreters of Luther such as Barth and Moltmann placing the Reformer in dialogue not only with Asian spirituality and religions but also with emerging global theology of religions.

Health and Climate Change Pim Martens, 2014-04-08. Understanding how complex ecological and climatic change can influence human health is the new challenge before us. The book confronts these multidimensional risk assessments head on and will catalyse the important interdisciplinary and integrated approach that is the new paradigm now required for environmental and public health research. Dr JONATHAN PATZ, Johns Hopkins School of Hygiene and Public Health. This book provides a sturdy foundation for thinking about how best to tackle a varied spectrum of population health hazards posed by different aspects and combinations of global change processes. It also goes that extra mile by estimating the attributable population burdens of disease or mortality that are likely to result from these aspects of global change. It is heartening to see the results of this mathematical modeling being presented in policy relevant terms. From the Foreword by TONY McMICHAEL.

Health and Climate Change is the first major study of the potentially devastating health impacts of the global atmospheric changes which are under way. Using the best available data the author presents models of the most plausible future courses of vector borne diseases such as malaria, dengue fever and schistosomiasis, skin cancer caused by ozone depletion and cardiovascular and respiratory disorders caused by higher temperatures. Current epidemiological research methods are not well adapted to

analysing complex systems influenced by human intervention or more simple processes calculated to take place within the distant future Health and Climate Change proposes a new paradigm of integrated eco epidemiological models for these areas of study It will be essential reading for those concerned with public health and epidemiology environmental studies climate change and development studies Originally published in 1998 Order Out of Chaos Ilya Prigogine, Isabelle Stengers, 2018-01-23 A pioneering book that shows how the two great themes of classic science order and chaos are being reconciled in a new and unexpected synthesis Order Out of Chaos is a sweeping critique of the discordant landscape of modern scientific knowledge In this landmark book Nobel Laureate Ilya Prigogine and acclaimed philosopher Isabelle Stengers offer an exciting and accessible account of the philosophical implications of thermodynamics Prigogine and Stengers bring contradictory philosophies of time and chance into a novel and ambitious synthesis Since its first publication in France in 1978 this book has sparked debate among physicists philosophers literary critics and historians Bodies Out of Bounds Jana Evans Braziel, Kathleen LeBesco, 2001-09-13 This is an exceptional collection the subject is of obvious importance yet terribly undertheorized and unexamined I know of no other work that offers what this collection provides Marcia Millman author of Such a Pretty Face Being Fat in America A valuable contribution to scholarly debates on the place of excessive bodies in contemporary culture This book promises to enrich all areas of inquiry related to the politics of bodies Carole Spitzack author of Confessing Excess Women and the Politics of Body Reduction This anthology includes a wide range of perceptive and original essays which explore and analyze the underlying ideologies that have made fat incorrect Echoing the spirit of the nineteenth century adage about children who should be neither seen nor heard some of the authors powerfully remind us that we keep bodies out of bound silenced and unseen unless of course we need to peek at the comic or grotesque Raquel Salgado Scherr co author of Face Value The Politics of Beauty Through textual analyses video film analyses television theory and literary theory this collection demonstrates the various ways in which dominant representations of fat and corpulence have been both demonized and rendered invisible This volume will be a crucial corollary to work on the tyranny of slenderness a collection of different perspectives on the fat body is sorely missing in women s studies communication and media studies Sarah Banet Weiser author of The Most Beautiful Girl in the World Beauty Pageants and National Identity **Professional Playwrights** Ira Clark, 2021-12-14 The most neglected of the English Renaissance playwrights are the major Carolines Philip Massinger John Ford James Shirley and Richard Brome Writing in the 1620s and 1630s always in the shadow of their great precursors Shakespeare and Jonson they have often been dubbed mere purveyors of slick escapist sensationalism who avoided the great issues of their day and turned away from the impending breakdown of English society Ira Clark s revisionist book shows us these dramatists and their time whole particularly through analysis of their treatment of sociopolitical issues issues that find echoes in twentieth century concerns For each of these playwrights Clark sketches his known social circle describes characteristic social and political stances and dramatic techniques and

provides a detailed reading of an exemplary play In considering their artistry he notes their variations on traditional dramatic characters situations and styles Where their predecessors had offered deep psychological portrayals the Carolines he finds present characters whose roles grow out of their social relations The issues they engage range from the sovereignty of King or Parliament and the criteria for social mobility to parental dominion and the rights of women and children Their presentations range from conservatism Ford s distilled and Shirley s playful through Massinger s accommodation to Brome s extemporaneous experimentation The Carolines theatrical world Clark argues is accessible to modern readers through the social theories of our time which depend on their world as a stage trope for such concepts as symbolic interactionism and the ritual inculcation of social cohesion This important book sheds new light on both the artistic and the political climate of seventeenth century England

Masquerade and Civilization Terry Castle,1986 Public masquerades were a popular and controversial form of urban entertainment in England for most of the eighteenth century They were held regularly in London and attended by hundreds sometimes thousands of people from all ranks of society who delighted in disguising themselves in fanciful costumes and masks and moving through crowds of strangers The authors shows how the masquerade played a subversive role in the eighteenth century imagination and that it was persistently associated with the crossing of class and sexual boundaries sexual freedom the overthrow of decorum and

urban corruption Authorities clearly saw it as a profound challenge to social order and persistently sought to suppress it The book is in two parts In the first the author recreates the historical phenomenon of the English masquerade the makeup of the crowds the symbolic language of costume and the various codes of verbal exchange gesture and sexual behavior The second part analyzes contemporary literary representations of the masquerade using novels by Richardson Fielding Burney and Inchbald to show how the masquerade in fiction reflected the disruptive power it had in contemporary life It also served as an indispensable plot catalyst generating the complications out of which the essential drama of the fiction emerged An epilogue discusses the use of the masquerade as a literary device after the eighteenth century The book contains some 40 illustrations

Transfiguring Transcendence in Harry Potter, His Dark Materials and Left Behind Mike Gray, 2013-10-23 Three recent and commercially successful series of novels employ and adapt the resources of popular fantasy fiction to create visions of religious identity J K Rowling's Harry Potter books Phillip Pullman's Dark Materials and Tim LaHaye and Jerry Jenkins Left Behind series The act of creating fantasy counter worlds naturally involves all three stories in the creation of what Mike Gray terms transfigurations of transcendence hopeful albeit paradoxical encodings of the ambiguous non observable reality whose primary locus in modern society is the societally extra systemic human individual Popular fantasy fiction turns out to involve acts of world creation that are inherently religious and inherently paradoxical A substantive examination shows that all three are involved in more or less intentional re narrations of traditional Christian beliefs and narratives The atheist His Dark Materials series does not deny but re imagines the Christian visions of selfhood the traditionalist Left Behind series does not simply replicate but modifies its own declared values the apparent secularity of the Harry Potter series is shaped by its creative reception of Christian patterns and narratives While the stories visions of selfhood clearly clash the basic paradoxes involved in their struggle to articulate transcendence expose significant parallels and a productive conversation with the Christian tradition It is not simply that popular fantasy fiction is theologically relevant the Christian Heilsgeschichte too proves to be highly relevant in popular culture However while far from obsolescent models

of religious identity in contemporary society require criticism and creativity and as evinced most powerfully in the Harry Potter stories a flair for constructive engagement with paradox *The Making of the Alice Books* Ronald Reichertz, 2000

Analysing Lewis Carroll's Alice books in the context of children's literature from the seventeenth through the nineteenth century Ronald Reichertz argues that Carroll's striking originality was the result of a fusion of his narrative imagination and formal and thematic features from earlier children's literature *The Making of the Alice Books* includes discussions of the didactic and nursery rhyme verse traditionally addressed by Carroll's critics while adding and elaborating connections established within and against the continuum of English language children's literature Drawing examples from a wide range of children's literature Reichertz demonstrates that the Alice books are infused with conventions of and allusions to earlier works and identifies precursors of Carroll's upside down looking glass and dream vision worlds Key passages from related books are reprinted in the appendices making available many hard to find examples of early children's literature
