## **Review Of The Department Of Defenses Program For Breast Cancer Research:**

**A Review of the Department of Defense's Program for Breast Cancer Research** Committee to Review the Department of Defense's Breast Cancer Research Program, Institute of Medicine, 1997-08-14 According to current statistical data one in eight women will be diagnosed with breast cancer The five year survival rate for breast cancer patients has improved in recent years but the overall mortality rates have changed little In 1993 Congress allocated 210 million for breast cancer research as part of the Department of Defense budget An Institute of Medicine IOM committee was convened at that time to advise the U S Army Medical Research and Development Command on strategies for managing a breast cancer research program This book evaluates the program s management and achievements to date Although it is too early to evaluate the program in terms of breakthrough results and new insights produced by the funded projects or investigators this book documents the process used to select research proposals for funding and analyzes the portfolio of funded projects in terms of their responsiveness to the recommendations and fundamental questions articulated in the 1993 IOM report **A**

**Review of the Department of Defense's Program for Breast Cancer Research** ,1997 Pursuant to cooperative agreement number DAMD 17 96 2 6002 to the National Academy of Sciences for support of the Institute of Medicine s Committee on Breast Cancer Research the U S Army Medical Research and Materiel Command requested the committee to review the management and funded research portfolio of the Command s Breast Cancer Research Program BCRP The committee was also asked to review the research portfolios of other major breast cancer research funding agencies and to make recommendations on BCRP management and program achievements and areas of research where additional emphasis is needed In the enclosed report the committee concluded that the BCRP fills a unique nich among public and private funding sources and that the program has established a fair peer review system and broad based research portfolio by stimulating scientists from a wide range of disciplines to participate as applicants reviewers and advisors The committee recommended continued support of the BCRP and stabilization of its funding The committee also recommended that the BCRP develop tools to evaluate the effectiveness of its various funding mechanisms and consider establishing a permanent non Army scientific oversight group which would be responsible for quality assurance and program evaluation activities **Strategies to**

**Leverage Research Funding** Institute of Medicine, Board on Health Sciences Policy, Medical Follow-Up Agency, Committee on Alternative Funding Strategies for DOD's Peer Reviewed Medical Research Programs, 2004-10-27 Since 1992 the Department of Defense DOD through the U S Army Medical Research and Material Command has received congressionally earmarked appropriations for programs of biomedical research on prostate breast and ovarian cancer neurofibromatosis tuberous sclerosis and other health problems Appropriations for these Congressionally Directed Medical Research Programs are used to support peer reviewed extramural research project training and infrastructure grants Congress has become concerned about funding increases for these programs given current demands on the military budget At the request of

Congress the Institute of Medicine IOM examined possibilities of augmenting program funding from alternative sources The resulting IOM book *Strategies to Leverage Research Funding Guiding DOD's Peer Reviewed Medical Research Programs* focuses on nonfederal and private sector contributions that could extend the appropriated funds without biasing the peer review project selection process

**Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2004** United States. Congress. House. Committee on Appropriations. **Patient Advocacy for**

**Health Care Quality: Strategies for Achieving Patient-Centered Care** Jo Anne L. Earp, Elizabeth A. French, Melissa B. Gilkey, 2007-07-23 Instructor Resources PowerPoints Sample Syllabus Readings Patient Advocacy for Health Care Quality specifically examines not just what the problems are in healthcare quality but how advocacy by professionals and lay people from within and from outside health systems can help ensure that best practices get adopted In highly readable prose this text blends many concrete examples real life vignettes and up to date research literature An emphasis on conceptual frameworks debates and ethical issues within the field makes the text appealing to graduate level learners Authored by real life advocates working in the field this book is a window into the realities of advocating in many different roles as a physician nurse or public health educator as a hospital administrator as a parent as a lobbyist as the head of a non profit organization as a researcher etc Click here to view a complete list of contributors 2008 614 pages *Department of Defense Appropriations for Fiscal Year 2007* United States. Congress. Senate. Committee on Appropriations. Subcommittee on Defense, 2006 **Congressional Record** United States. Congress, 1999 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 **Hiding Politics in Plain Sight** Patricia Strach, 2016-08-18 As late as the 1980s breast cancer was a stigmatized disease so much so that local reporters avoided using the word breast in their stories and early breast cancer organizations steered clear of it in their names But activists with business backgrounds began to partner with corporations for sponsored runs and cause marketing products from which a portion of the proceeds would benefit breast cancer research Branding breast cancer as pink hopeful positive uncontroversial on the products Americans see every day these activists and corporations generated a pervasive understanding of breast cancer that is widely shared by the public and embraced by policymakers Clearly they have been successful today more Americans know that the pink ribbon is the symbol of breast cancer than know the name of the vice president Hiding Politics in Plain Sight examines the costs of employing market mechanisms especially cause marketing as a strategy for change Patricia Strach suggests that market mechanisms do more than raise awareness of issues or money to support charities they also affect politics She shows that market mechanisms like corporate sponsored walks or cause marketing shift issue definition away from the contentious processes in the political sphere to the market where advertising campaigns portray complex issues along a single dimension with a simple solution breast cancer research will find a cure and Americans can participate easily by purchasing specially marked products This market competition privileges even more specialized actors with connections to business As well cooperative market activism fundamentally alters the public sphere by importing processes values and biases of market based action into politics Market activism does not just bring social concerns into market transactions it also brings market biases into public

policymaking which is inherently undemocratic As a result industry and key activists work cooperatively rather than contentiously and they define issues as consensual rather than controversial essentially hiding politics in plain sight
