Review Of U S Military Research And Development 1984:

Professional Journal of the United States Army ,1985 *Reviewing the Cold War* Odd Arne Westad,2013-10-14

Since the cold war ended it has become an international field of study with new material from China the former Soviet Union and Europe This volume takes stock of where these new materials have taken us in our understanding of what the cold war was about and how we should study it Science, Technology and the Military E. Mendelsohn,Merritt Roe Smith,P.

Weingart,2013-03-14 **Air Force Magazine** ,1985 **Military Technology, Armaments Dynamics and Disarmament**

Hans Gunter Brauch,1989-01-13 New Weapons, Old Politics Thomas L. McNaugher,2011-10-01 Americans spend more than 100 billion a year to buy weapons but no one likes the process that brings these weapons into existence The problem McNaugher shows is that the technical needs of engineers and military planners clash sharply with the political demands of Congress McNaugher examines weapons procurement since World War II and shows how repeated efforts to improve weapons acquisition have instead increased the harmful intrusion of political pressures into that technical development and procurement process Today s weapons are more complicated than their predecessors So are the nation s military forces The design of new systems and their integration into the force structure demand more care time and flexibility Yet time and flexibility are precisely what political pressures remove from the acquisitions process In a series of case studies and conceptual discussions McNaugher tackles concerns at the heart of the debate about acquisition the slow and heavily bureaucratic approach to development the preference for ultimate weapons over well organized and trained forces and the counterproductive incentives facing the nation s defense firms He calls for changes that run against the current fashion less centralization or procurement less haste in developing new weapons and greater use of competition as a means of removing the development process from political oversight Above all McNaugher shows how the United States tries to buy research and development on the cheap and how costly this has been The nation can improve its acquisition process he concludes only when it recognizes the need to pay for the full exploration of new technology Review of U.S. Military Research and Development, 1984 Kosta Tsipis,Penny Janeway,1984 **In the Shadow of the Garrison State** Aaron L.

Friedberg,2012-01-06 War or the threat of war usually strengthens states as governments tax draft soldiers exert control over industrial production and dampen internal dissent in order to build military might The United States however was founded on the suspicion of state power a suspicion that continued to gird its institutional architecture and inform the sentiments of many of its politicians and citizens through the twentieth century In this comprehensive rethinking of postwar political history Aaron Friedberg convincingly argues that such anti statist inclinations prevented Cold War anxieties from transforming the United States into the garrison state it might have become in their absence Drawing on an array of primary and secondary sources including newly available archival materials Friedberg concludes that the weakness of the American state served as a profound source of national strength that allowed the United States to outperform and outlast its supremely

centralized and statist rival the Soviet Union Friedberg's analysis of the U S government's approach to taxation conscription industrial planning scientific research and development and armaments manufacturing reveals that the American state did expand during the early Cold War period But domestic constraints on its expansion including those stemming from mean self interest as well as those guided by a principled belief in the virtues of limiting federal power protected economic vitality technological superiority and public support for Cold War activities The strategic synthesis that emerged by the early 1960s was functional as well as stable enabling the United States to deter contain and ultimately outlive the Soviet Union precisely because the American state did not limit unduly the political personal and economic freedom of its citizens Political scientists historians and general readers interested in Cold War history will value this thoroughly researched volume Friedberg's insightful scholarship will also inspire future policy by contributing to our understanding of how liberal democracy's inherent qualities nurture its survival and spread **New Books** National Defense University. Library, Program Manager ,1988

American Science Policy since World War II Bruce Smith,2011-02-01 Just after the close of World War II America's political and scientific leaders reached an informal consensus on how science could best serve the nation and how government might best support science The consensus lasted a generation before it broke under the pressures created by the Vietnam War Since then the nation has struggled to reestablish shared beliefs about the means and goals of science policy In *American Science Policy Since World War II* author Bruce L R Smith makes sense of the break between science and government and identifies the patterns on postwar science affairs He explains that what might otherwise seem to be a miscellaneous set of separate episodes actually constituted a continuing debate of national importance that was closely linked to broad political and economic trends Smith's precise and unique analysis gives both the scholar and historian a better understanding of where we are and how we got there while casting a modest light on future policy directions

Complex Air Defense Tom Karako,Masao Dahlgren,2022-05-01 In the past five years Russia China and others have accelerated their development of hypersonic missiles to threaten U S forces in the homeland and abroad The current Ballistic Missile Defense System largely equipped to contend with legacy ballistic missile threats must be adapted to this challenge The same characteristics that make hypersonic missiles attractive may also hold the key to defeating them This CSIS report argues how a new hypersonic defense architecture should exploit hypersonic weapons unique vulnerabilities and employ new capabilities such as a space sensor layer to secure critical nodes These changes are not only necessary to mitigate the hypersonic threat but to defeat an emerging generation of maneuvering missiles and aerial threats **The Economics of Defence, Disarmament, and Peace** Keith Hartley,Nick Hooper,1990 This major reference work is a comprehensive critical guide to the large and growing literature on the economics of defence disarmament and peace It covers the cost of defence spending and its effects on growth investment unemployment technical change and other aspects of a nation's economic performance It includes material on the determinants of defence spending namely defence budgets programme budgeting

and procurement policy It also deals with the economic impact of arms limitation disarmament and the conversion from military production to products with peaceful uses Survival February - March 2022 The International Institute for Strategic Studies (IISS),2023-04-21 Survival the IISS s bimonthly journal challenges conventional wisdom and brings fresh often controversial perspectives on strategic issues of the moment In this issue The Ukraine crisis Robert Hunter argues that the most important requirement of successful US led negotiations with Russia is that Moscow demonstrate that it is prepared to be a responsible international actor Erin Sikorsky contends that climate change should have a larger role in the day to day national security agendas of the United States and other countries Stephan Fr hling and Andrew O Neil warn that current US debates about no first use tend to underplay the broader alliance implications of any shift in US nuclear policy Rahul Roy Chaudhury and Kate Sullivan de Estrada assess that given the 2021 US FONOP targeting India Washington and New Delhi need to better manage their diverse positions on global governance especially in the maritime domain Nien chung Chang Liao warns that pragmatism in Chinese foreign policy is waning and considers why Chinese diplomats have become so aggressive And nine more thought provoking pieces as well as our regular Book Reviews and Noteworthy column Editor Dr Dana Allin Managing Editor Jonathan Stevenson Associate Editor Carolyn West Assistant Editor Jessica Watson Monthly Catalog of United States Government Publications ,1991 **Bulletin of the Atomic Scientists** ,1985-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *World Military Expenditures and Arms Transfers*, 1986 United States. Arms Control and Disarmament Agency,1987 **World Military Expenditures and Arms Transfers** ,1987 *Monthly Catalogue, United States Public Documents* ,1985 Science Support by the Department of Defense United States. Congress. House. Committee on Science and Technology. Task Force on Science Policy,1987
