Reviews in Ecology Hala Nayel Barakat,Ahmad K. Hegazy,1997 **International Environmental Law and Policy in Africa** B. Chaytor,K.R. Gray,2013-11-11 C O OKID11 I welcome the opportunity to prepare a Foreword to the book on Environmental Policy and Law in Africa edited by Kevin R Gray and Beatrice Chaytor It is a pleasure to do that because the book is a contribution to the cause of capacity building for development and implementation of environmental law in Africa a goal towards which I have had an undivided focus over the last two decades There is still some belief in and outside Africa that for developing countries in general and Africa in particular development and implementation of environmental law is not a priority This belief prevails strongly in many quarters of the industrialised countries In fact the view is held either out of blatant ignorance or by some renegade industrialists who fail to appreciate Michael Royston s 1979 thesis that Pollution Prevention Pays 2 That group for obvious reasons must have their correspondent counterparts in Africa to provide hope that industries rejected as derelict in the West or inoperable due to rigorous environmental regulation can find homes to which they can escape and dump their polluting industries Plant Responses to Hyperarid Desert Environments Monier M. Abd El-Ghani,Francisco Martín Huerta-Martínez,Liu Hongyan,Rahmatullah Qureshi,2017-11-10 This book provides a comprehensive discussion on plant responses in hyperarid regions of Egypt China Mexico and Pakistan It describes their location physiographic features accidental vegetation along two transects endangered vegetation species human impact and variety of plant types e g climbing succulent and parasitic Studies on biotic and abiotic interactions plant biodiversity and soil plant relationships are also covered Covering a wide range of plant conditions and adaptations this book analyzes what happens when plants must endure very high temperatures and aridity Plants have adapted by evolving their physical structure to store and conserve water Examples are the absence of leaves which reduces transpiration and the growth of extremely long roots allowing them to acquire moisture at or near the water table Plants in hyperarid habitats have also made behavioral adaptations in order to survive by synchronizing with the seasons of greatest moisture and or coolest temperatures For example desert perennials remain dormant during dry periods of the year then spring to life when water becomes available The book includes many color illustrations and has extensive and up to date references for further reading

Bedouins by the Lake Ahmed Belal,2009 Sustainable development and environmental change have become two of the watchwords of the new century But what do they mean for ordinary people living in some of the harshest environments in the world where survival is the driving force This book sets out to examine these issues and how they affect and are affected by Bedouin communities living in the arid areas of the Nubian Desert in southeastern Egypt Written by a joint Egyptian Russian and British research team this book seeks to examine how the Bedouin of this area have coped with the environmental changes brought about after the construction of the Aswan High Dam and resulting formation of Lake Nasser After documenting the nature of these changes the authors show the practical and strategic ways in which the Bedouin have

responded by adapting both their use of environmental resources and the social and economic dimensions of their community Bedouins by the Lake argues that people in these communities are active agents of change and must not be seen as passive victims For them sustainable development and environmental change are not abstract academic debates but real life everyday issues around which they must organize their lives Climate Change in Deserts Martin Williams,2014-08-11 A synthesis of the environmental and climatic history of every major desert and desert margin for researchers and advanced students Sustainable Land Use in Deserts Siegmund-W. Breckle, Maik Veste, Walter Wucherer,2012-12-06 Changing desert areas for land use implies a lot of ecological problems These and related ones are dealt with in this book covering various interdisciplinary and international aspects Large areas in arid and semi arid regions are already polluted in various ways One of the biggest problems is the anthropogenic salinization by inadequate means of agriculture and irrigation Additionally most arid areas in the world are dramatically overgrazed Methods and practices of a sustainable land use in deserts are urgently needed in many arid regions This book gives a broad survey on some of the affected regions of the world as well as some case studies from elsewhere Aral Sea Negev desert Namib desert etc Thus basic and applied sciences are brought together Water management in deserts grazing systems or reclamation of desertified areas are among the topics of this book as well as social and economic aspects Plant Ecology in the Middle East Ahmad Hegazy, Jonathan Lovett-Doust,2016-01-14 This advanced textbook explores the intriguing flora and plant ecology of the Middle East framed by a changing desert landscape global climate change and the arc of human history This vast region has been largely under recognized under studied and certainly under published due in part to the challenges posed to research by political disputes and human conflict and a treatise on the subject is now timely The book integrates Middle Eastern plant geography and its major drivers geo tectonics seed and fruit dispersal plant functional types etc with the principles of plant ecology The authors include the many specialized adaptations to desert and dryland ecosystems including succulence water conserving photosynthesis and a remarkable range of other life history strategies They explore the formation of climate relicts and describe the long history of domestication in the region together with the many reciprocal effects of agriculture on plant ecology The book concludes by discussing conservation in the region highlighting five regional biodiversity hotspots where the challenges of desertification habitat loss and other threats to plant biodiversity are particularly acute Plant Ecology in the Middle East is a timely synthesis of the field setting a new baseline for future research It will be important reading for both undergraduate and graduate students taking courses in plant ecology evolution systematics biodiversity and conservation and will also be of interest and use to a professional audience of botanists conservation biologists and practitioners working in dryland ecosystems *International Conference on Desert Biome Management, Development and Improvement* ,2005

Geography in America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott,2005 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and

innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White

Climate Change and Sustainable Agro-ecology in Global Drylands Adel El-Beltagy,Rattan Lal,Kauser Malik,2024-10-30 Drylands a home for nearly 2 5 billion people are highly vulnerable to anthropogenic climate change and dryland area may expand to 50% of the Earth s surface by 2100 Climate change may aggravate the prevalence of undernutrition and malnutrition because of adverse effects on quantity and quality of food production in these regions This book takes a holistic approach to sustainable management of drylands to make agriculture drought resilient Eminent scientists from around the world share their knowledge and experiences for adaptation and mitigation of the anthropogenic climate change through innovation in sustainable management of water soil crops livestock and fisheries They anticipate that climate change will have major impacts on agro ecosystems which requires continuous dynamic assessments globally regionally and at the local level where the major action of adaptation would have to occur The assessment will require international cooperation and national capacity building This book emphasizes approaches such as smart and precision agriculture conservation agriculture and new innovation and technology as tools for adaptation and mitigation Several chapters are devoted to the human dimensions and policy considerations with emphasis on enhancing coping and adaptive capacity This book addresses the picture after COP27 including loss and damage governance and finance This work will be valuable to students and researchers in agroecology climate change science and dryland agriculture

Wet Prairie Shannon Stunden Bower,2011-06-29 The Canadian prairies are often envisioned as dry windswept fields however much of southern Manitoba is not arid plain but wet prairie poorly drained land subject to frequent flooding Wet Prairie brings to light the complexities of surface water management in Manitoba from early artificial drainage efforts to late twentieth century attempts at watershed management Irregular water flow patterns challenged the checkerboard landscape of the 1872 federal Dominion Lands Act and homesteaders found their agricultural ambitions at odds with local environmental realities Thus in keeping with liberal principles the provincial government undertook substantial drainage efforts Flooding and drainage became the subjects of intense and persistent debate among provincial officials drainage experts and Manitoba residents New alliances and rivalries emerged amid shifting social political and environmental contexts with enduring consequences for both the landscapes and people of the wet prairie This account of an overlooked aspect of Prairie environmental history

traces how the biophysical nature of southern Manitoba helped shape both Manitoba society and the provincial state

Microbial Biodegradation of Xenobiotic Compounds Young-Cheol Chang,2019-01-30 Microbial Biodegradation of Xenobiotic Compounds examines and collects the recent information on the bioremediation technologies around the world This book focuses on methods to decrease pollutants created by anthropogenic activities industrial activities and agricultural activities This book answers some of the questions about how to reduce contaminants And whether there is a possibility of converting these pollutants in to useful energy by advanced biotechnological methods The book combines present obtainable data with the expert knowledge of researchers from all over the world covering different aspects of environmental biotechnology and microbiology It covers basic concepts of bioremediation and various methods involved in the bioremediation process and provides specific chapters on the role of different genes and enzymes involved in microbial bioremediation process It also gives special attention to heavy metal bioremediation by microalgae and the mechanisms involved during the degradation process Recent innovative technologies about converting toxic pollutants in to useful energy like bioplastics and electricity are also discussed by specialist authors Various chapters address the bioremediation of pesticides in soil using microbial metabolites and molecular aspects of biodegradation which cover topics including identification of novel genes through the metagenomic approach and bioremediation using fungal laccase enzymes *Earth System: History and Natural Variability - Volume III* Vaclav Cilek,2009-07-15 Earth System History and Natural Variability theme is a component of Encyclopedia of Natural Resources Policy and Management in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Earth System History and Natural Variability with contributions from distinguished experts in the field presents a description of the cosmic environment around our planet influencing the Earth in a number of ways through variation of solar energy or meteorite impacts The structure of the Earth and its rocks waters and atmosphere is described The Theme focuses on geological and evolutionary processes through the history of Earth s epochs and biomes since the Early Earth to the Quaternary The unifying processes between the Earth s life and its rocks waters and atmosphere are global natural cycles of carbon sulfur and other elements that connect and influence the rate of geological processes climate change biological evolution and human economy These five volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

The Nile Basin Martin Williams,2019-01-03 Discusses how prehistoric humans responded to the environmental and climatic changes within the Nile Basin during the past million years **Climate - Vegetation:** M.A. Zahran,2010-03-10 Deserts are unique ecosystems with their own biotic and abiotic components and are often rich in renewable natural resources the appropriate management of which can contribute significantly to the sustainable management of desert regions for the welfare of the people Yet while there are many books on the flora of the countries fringing the important

desert countries of the Mediterranean and Red Seas there are few books reporting on their ecophysiology and vegetation ecology This book presents the vegetation types of the African and Asian countries of the Mediterranean and Red Sea coastal regions and discusses the ecological threats and economic applications of these critical resources In particular it examines the relationships between climate and vegetation and discusses these within the context of desertification agro industrial applications ecotourism and sustainable development The book will provide a valuable reference for researchers and graduate students involved in plant ecology biogeography economic botany and environmental management in the Afro Asian Mediterranean and Red Sea coastal regions as well as other desert regions around the world **Biodiversity** Bilge

Antalya Turkey This book discusses the value of bioresources and the need for their conservation in terms of the biomolecular chemistry of naturally occurring molecular systems The development of pharmaceutical agricultural and industrial products from bioresources can be used to promote incentives for conservation by providing an economic return to sustainable use of those sources The 54 chapters inform readers on the search for insight into the species and documents how much of life remains to be scientifically identified They also explore identification strategies and methods along with the implications for protecting biodiversity In summary biomolecular aspects of biodiversity and innovative utilization of bioresources are discussed from very diverse points of view ranging from their botanical zoological taxonomic and genomic expressions to their biomolecular structural mechanistic and functional aspects *The History of the Peoples of the Eastern*

Desert Hans Barnard, Kim Duistermaat, 2012-12-31 The last quarter century has seen extensive research on the ports of the Red Sea coast of Egypt the road systems connecting them to the Nile and the mines and quarries in the region Missing has been a systematic study of the peoples of the Eastern Desert the area between the Red Sea and the Nile Valley in whose territories these ports roads mines and quarries were located The historical overview of the Eastern Desert in the shape of a roughly chronological narrative presented in this book fills that gap The multidisciplinary perspective focuses on the long term history of the region The extensive range of topics addressed includes specific historical periods natural resources nomadic survival strategies ancient textual data and the interaction between Christian hermits and their neighbors The breadth of perspective does not sacrifice depth for all authors deal in some detail with the specifics of their subject matter As a whole this collection provides an outline of the history and sociology of the Eastern Desert unparalleled in any language for its comprehensiveness As such it will be the essential starting point for future research on the Eastern Desert Includes a CD of eleven audio files with music of the Ababda Nomads and six short videos of Ababda culture **Wildlife Review**, 1985

Animal Science Reviews 2011 David Hemming, 2012 Animal Science Reviews 2011 provides scientists and students in animal science with timely analysis on key topics in current research Originally published online in CAB Reviews this volume makes available in printed form the reviews in animal science published during 2011 **Roads and Ecological**

Infrastructure Kimberly M. Andrews, Priya Nanjappa, Seth P. D. Riley, 2015-06-01 A practical guide that explains how we can design roads that are compatible with populations of small wildlife Few of us think twice about driving on roads Yet the very presence of roads and the act of driving on them can impact the ecological infrastructure that supports an animal's daily life What chance does a turtle have of successfully laying its eggs when it needs to traverse a busy highway Is it realistic to expect small mammals to breed when an interstate thoroughfare subdivides their population These are the sorts of challenges faced by small often slow moving animals challenges that road engineers and ecologists are trying to address For countless small species vehicles traveling at high speeds are nothing less than missiles shooting across migration pathways For too many animals the danger can lead to the loss of populations in part because they simply are not programmed to react to traffic Salamanders faced with a two lane road between the forest and their aquatic breeding site for example will typically cross that road regardless of the congestion The result can be hundreds of flattened animals in a single night Roads and Ecological Infrastructure is the first book to focus on reducing conflict between roads and small animals Highlighting habitat connections and the challenges and solutions from both transportation and ecological perspectives the volume covers various themes including animal behavior related to roads and design approaches to mitigate the negative effects of roads on wildlife The chapter authors from transportation experts to university researchers each promote a goal of realistic problem solving Conceptual and practical this book will influence the next decade or more of road design in ecologically sensitive areas and should prevent countless unnecessary wildlife fatalities Published in association with The Wildlife Society
