Regulating Knowledge in an Entangled World uses case studies from the sixteenth to the eighteenth centuries to study knowledge transfer in early modern knowledge societies In the early modern period the scale intensity and reach of exchange exploded This volume develops a historicised understanding of knowledge transfer to shed new light on these fundamental changes By looking at the preconditions of knowledge transfer it shifts the focus from the objects circulating to the interactions by which they circulate and the way actors cement their relations The novelty of this approach shows how rules and regulations were enablers of knowledge circulation rather than impediments The chapters identify changing patterns of knowledge transfer in cases such as sixteenth century Venice the Spanish Empire in the Americas continental Habsburg early seventeenth century Dutch at sea and the Offices of the Catholic Church Through the perspective of regulating this volume advances the historiography of knowledge circulation by forging a new combination of histories of circulation and of institutions By bringing together historians from intellectual history economic history book history the history of science religion art and material culture this volume is useful for students and scholars interested in early modern knowledge societies and changing patterns of knowledge transfer *Handbook of the Language Industry* Gary Massey,Maureen Ehrensberger-Dow,Erik Angelone,2024-07-01 Digital transformation and demographic change are profoundly affecting the contexts in which the language industry operates the resources it deploys and the roles and skillsets of those it employs Driven by evolving digital resources and socio ethical demands the roles and responsibilities deriving from the proliferation of new and emerging profiles in the language industry are transcending the traditional bounds of core activities and competences associated with prototypical concepts of translation and interpreting This volume focuses on the realities in the language industry from the fresh perspective of current and emerging professional profiles and of the contexts and resources that condition and support them It traces the industry s evolution maps its current state and considers key aspects of its workplaces actors and practices In an age when artificial intelligence is challenging traditionally held views of human performance it addresses the issue of where and how human agents add value to the industry s processes and products with a detailed research based consideration of the activities competences roles responsibilities and tools that characterize the language industry of today and the near future **Quick Writes Level 6** Diana Herweck,Sarah Kartchner Clark,Karen Marks,2007-05-04 Practice writing strategies to help prepare students for current standardized tests
