Mercantilist Economics Lars Magnusson,2012-12-06 This collection of papers reflects the variety of interpretations and definitions connected with the concept of mercantilism which have evolved historically during the last two centuries They range from interpretations of mercantilistic ideas to interpretations of policies They stress the relationship between economic social and political ideas and range from the 17th to the late 20th century Lastly they provide us with more knowledge of specific national cases as well as a discussion of mercantilism as a general phenomenon *Economic Expansion and Social Change: Industry, trade, and government* C. G. A. Clay,1984 Historical understanding of the dynamics of economic and social change in the sixteenth and seventeenth centuries has been transformed in the last twenty or thirty years by an enormous volume of original research A fascinating picture has emerged of an economy and society in turmoil under the influence of population growth inflation the commercialisation of agriculture the growth of a huge capital city the emergence of distinct forms of manufacturing and changes in the international economic context Traditional forms of production traditional social structures and traditional values all came under increasingly insistent attack from the forces of change leading to radical economic and social readjustments In this book Christopher Clay draws on this flourishing research to provide a lucidly written analysis of the economy and society of England in the sixteenth and seventeenth centuries logically organised on a thematic rather than a chronological basis *The Theoretical Evolution of International Political Economy* George T. Crane,Abla Amawi,1997 This collection of classic and contemporary readings charts the historical and theoretical evolution of the field This is a valuable resource for students and teachers of international relations and international economics **The World Turned Upside Down?** R. J. Barry Jones,2000 This book interrogates the widespread claim that contemporary globalization has ended the centrality of the state in world affairs and is effectively irreversible It offers discriminating definitions of globalization internationalization and international interdependence and demonstrates the analytical and empirical difficulties generated by these concepts Handbook of the History of Economic Thought Jürgen Backhaus,2011-11-12 This reader in the history of economic thought challenges the assumption that today's prevailing economic theories are always the most appropriate ones As Leland Yeager has pointed out unlike the scientists of the natural sciences economists provide their ideas largely to politicians and political appointees who have rather different incentives that might prevent them from choosing the best economic theory In this book the life and work of each of the founders of economics is examined by the best available expert on that founding figure These contributors present rather novel and certainly not mainstream interpretations of the founders of modern economics The primary theme concerns the development of economic thought as this emerged in the various continental traditions including the Islamic tradition These continental traditions differed substantially both substantively and methodologically from the Anglo Saxon orientation that

has been dominant in the last century for example in the study of public finance or the very construct of the state itself This books maps the various channels of continental economics particularly from the late 18th through the early 20th centuries explaining and demonstrating the underlying unity amid the surface diversity In particular the book emphasizes the writings of John Stuart Mill his predecessor David Ricardo and his follower Jeremy Bentham the theory of Marginalism by von Th nen Cournot and Gossen the legacy of Karl Marx the innovations in developmental economics by Friedrich List the economic and monetary contributions and struggle of escape by John Maynard Keynes the formidable theory in public finance and economics by Joseph Schumpeter a reinterpretation of Alfred Marshall L on Walras Heinrich von Stackelberg Knut Wicksell Werner Sombart and Friedrich August von Hayek are each dealt with in their own right *On the History of Economic Thought* A. W. Bob Coats, 2005-08-08 Following an introduction to the key ideas of Coats this work focuses on two themes the difference between British and American economics both in content and in the practice of the profession and the interrelationships between economic ideas events or conditions and policy issues **Consumption as an Investment** Cosimo Perrotta, 2004 This work explores the changing place of consumption as a source of investment in production and growth within economic writings from ancient history to the present This project is carried out with great skill vigour and originality and will help to bring consumption studies to the mainstream of economic thought Handbook of Organization Theory and Management Thomas D. Lynch, Peter L. Cruise, 2005-11-01 Few subjects are more influenced by philosophy than the form of governance that guides and administers public affairs yet much of the literature about public administration remains silent about this connection Handbook of Organization Theory and Management The Philosophical Approach Second Edition identifies and discusses many of the mos **The Colonizing Trick** David Kazanjian, 2003 An illuminating look at the concepts of race nation and equality in eighteenth and nineteenth century America The idea that all men are created equal is as close to a universal tenet as exists in American history In this hard hitting book David Kazanjian interrogates this tenet exploring transformative flash points in early America when the belief in equality came into contact with seemingly contrary ideas about race and nation The Colonizing Trick depicts early America as a white settler colony in the process of becoming an empire one deeply integrated with Euro American political economy imperial ventures in North America and Africa and pan American racial formations Kazanjian traces tensions between universal equality and racial or national particularity through theoretically informed critical readings of a wide range of texts the political writings of David Walker and Maria Stewart the narratives of black mariners economic treatises the personal letters of Thomas Jefferson and Phillis Wheatley Charles Brockden Brown s fiction congressional tariff debates international treaties and popular novelettes about the U S Mexico War and the Yucatan s Caste War Kazanjian shows how emergent racial and national formations do not contradict universalist egalitarianism rather they rearticulate it making equality at once restricted formal abstract and materially embodied *Handbook on the History of Economic Analysis Volume II* Gilbert Faccarello, Heinz D. Kurz, 2016-07-27 This

unique troika of Handbooks provides indispensable coverage of the history of economic analysis Edited by two of the foremost academics in the field the volumes gather together insightful and original contributions from scholars across the world The encyclopaedic breadth and scope of the original entries will make these Handbooks an invaluable source of knowledge for all serious students and scholars of the history of economic thought

Barry Jones, 2002-09-11 This three volume Encyclopedia offers the first comprehensive and authoritative survey of the rapidly developing field of international political economy Its entries cover the major theoretical issues and analytical approaches within the field The set also provides detailed discussion of the contributions of key individuals and surveys a wide range of empirical conditions and developments within the global political economy including its major institutions The Encyclopedia has been designed to be eclectic in approach and wide ranging in coverage Theoretical entries range from discussions of the definition and scope of the field through core methodological questions such as rationalism and the structure agent problem to surveys of the major theories and approaches employed in the study of the international political economy

Governing Consumption James Cruise, 1999 Paradoxically however each of these realistic novelists other than Sterne failed in his attempt to erect character as a moral buffer against the suspense of a commercially driven world Jacket

The Empire of the St. Lawrence Donald Creighton, 2017-06-22 Originally published in 1937 as *The Commercial Empire of the St Lawrence 1760 1850* and re issued in its present form in 1956 Donald Creighton's study of the St Lawrence became an essential text in Canadian history courses This his first book helped establish Creighton as the foremost English Canadian historian of his generation In it he examines the trading system that developed along the St Lawrence River and he argues that the exploitation of key staple products by colonial merchants along the St Lawrence River system was key to Canada's economic and national development Creighton tells the story of the St Lawrence empire largely from the perspective of these Canadian merchants who above all others struggled to win the territorial empire of the St Lawrence and to establish the Canadian commercial state Christopher H Moore historian and Governor General Award winner has written a new introduction to this classic text
