Understanding Comparative Politics Mehran Kamrava, 2012-08-21 Comparative politics has undergone significant theoretical changes in recent decades. Particularly since the 1980s, a new generation of scholars have revamped and rejuvenated the study of the subject. Mehran Kamrava examines current and past approaches to the study of comparative politics and proposes a new framework for analysis. This is achieved through a comparative examination of state and social institutions, the interactions that occur between them, and the political cultures within which they operate. The book also offers a concise and detailed synthesis of existing comparative frameworks that up to now at least have encountered analytical shortcomings on their own. Although analytically different in its arguments and emphasis from the current Mainstream genre of literature on comparative politics, the present study is a logical outgrowth of the scholarly works of the last decade or so. It will be essential reading for all students of comparative politics.

Social and Political Change in Revolutionary China David S. G. Goodman, 2023-06-14 This in-depth study examines the influence of the Chinese Communist Party's effective organizing in Shanxi Province during the War of Resistance. Shanxi Province was on the frontlines of the 1937-1945 War of Resistance against Japan, the war that launched the Chinese Communist Party. During that time, the Taihang Base Area of Southwest Shanxi was one of the Party's most important strongholds. David Goodman provides the first county-level analysis of social and political change in the Taihang Base Area during those crucial years. Goodman explores revolution as a process, arguing that the Party was successful because of its management of revolutionary incrementalism. He examines the roles of various groups, highlighting the activities of urban intellectuals, teachers, and peasant small holders as agents of change. Based on newly available sources, including recently republished materials from the Taihang Base Area, restricted documentation from the Taiyuan Archive, and interviews with veterans of the Taihang Base Area, this meticulously researched work deepens our understanding of the social and political origins of the Chinese revolution.

Cultural Politics in the Third World Mehran Kamrava, 2002-01-04 First Published in 1999. This book does not aim to offer a new or radically different interpretation of the ongoing debate over cultural geography. Kamrava states nor does it seek to present a universal theory of what Third World countries have done or ought to do as they navigate the political, economic, and sociocultural traumas of development. Instead, it tries to place culture in its proper political perspective in the Third World.

Negotiated Revolutions George Lawson, 2017-03-02 Straightforward histories of post revolution

States have all too often failed to provide sufficient context to rescue revolution both as concept and practice from the misplaced triumphalism of the contemporary world. In *Negotiated Revolutions*, George Lawson marks a definitive departure in the study of radical political and socio-economic change, presenting a unique comparative analysis of three transformations from authoritarian rule to market democracy. Through the lens of international sociology, the book critically considers the large-scale processes of social and political revolution, bringing three apparently distinct transformations from seemingly disparate authoritarian regimes and geographies under a common rubric. With unique and novel conceptual analysis, the book accurately locates both the potential and actuality of radical change in contemporary world affairs, processes usually mistakenly subsumed under the general framework of transitology.

Repeating Revolutions Timothy Scott Johnson, 2025-01-17 *Repeating Revolutions* examines how activists, intellectuals, social scientists, and historians looked to France's Revolutionary past to negotiate Algeria's struggle for decolonization from the 1930s to the 1960s. The French Empire justified their claims over Algeria in part through messages of universal progress marked by the political visions tied to the French Revolution. Supporters of Algerian independence confronted those historical claims by identifying the Algerian cause with the French Revolution and by highlighting the apparent contradictions between the history of 1789 and imperial rule. Far-right activists meanwhile saw the movement to decolonize Algeria as another manifestation of the revolutionary disorder stemming from the French Revolution. Behind these analogies lay broader changes in the study of North African society and contemporary political relevance of the French Revolution. The focus on analogies to the French Revolution puts different sets of actors in conversation with one another and offers a fresh take on how people's experiences and expectations changed throughout the Algerian War. This book will appeal to readers interested in the intellectual history of decolonization, the historiography of the French Revolution, the historiography of North African studies, and questions of historical comparison and conceptual change.

Arab National Media and Political Change Fatima El-Issawi, 2016-11-08 This book examines the evolution of national Arab media and its interplay with political change, particularly in emerging democracies in the context of the Arab uprisings. Investigated from a journalistic perspective, this research addresses the role played by traditional national media in consolidating emerging democracies or in exacerbating their fragility within new political contexts. Also analyzed are the ways journalists report about politics and transformations of these media industries, drawing on the international experiences of media in transitional societies. This study builds on a field investigation led by the author and conducted within the project *Arab Revolutions: Media Revolutions* covering Libya, Tunisia, and Egypt.
