Revolution From Above:

Russia's Revolution from Above, 1985-2000 Gordon Hahn, 2018-04-27 The fall of the Soviet communist regime in 1991 offers a challenging contrast to other instances of democratic transition and change in the last decades of the twentieth century The 1991 revolution was neither a peaceful revolution from below as occurred in Czechoslovakia nor a negotiated transition to democracy like those in Poland Hungary or Latin America It was not primarily the result of social modernization the rise of a new middle class or of national liberation movements in the non Russian union republics Instead as Gordon Hahn argues the Russian transformation was a bureaucrat led state based revolution managed by a group of Communist Party functionaries who won control over the Russian Republic RSFSR in the mid 1990s Hahn describes how opportunistic Party and state officials led by Boris Yeltsin defected from the Gorbachev camp and proceeded in 1990 91 to dismantle the institutions that bound state and party These revolutionaries from above seized control of political economic natural and human resources and then separated the party apparatus from state institutions on Russian Republic territory With the failed August 1991 hard line coup Yeltsin banned the Communist Party and decreed that all Union state organs including the KGB and military were under RSFSR control In Hahn s account this mode of revolutionary change from above explains the troubled development of democracy in Russia and the former Soviet republics Hahn shows how limited mobilization of the masses stunted the development of civil societies and the formation of political parties and trade unions with real grass roots The result is a weak society unable to nudge the state to concentrate on institutional reforms society needs for the development of a free polity and economy Russia s Revolution from Above goes far in correcting the historical record and reconceptualizing the Soviet transformation It should be read by historians economists political scientists and Russia area scholars

Tucker, 2017-07-05 In the years since Stalin's death his profound influence upon the historical development of Communism has remained elusive and in need of interpretation Stalinism as his system has become known is a phenomenon which embraced all facets of political and social life While its effect upon the Soviet Union and other nations today is far less than it was while Stalin lived it is by no means dead In this landmark volume some of the world's foremost scholars of the subject in a concerted group inquiry present their interpretations of Stalinism and its influence on all areas of comparative Communist studies from history and politics to economics sociology and literary scholarship The studies contained in this volume are an outgrowth of a conference on Stalinism held in Bellagio Italy sponsored by the American Council of Learned Societies In his major contribution to this book Leszek Kolakowski calls Stalinism a unified state organism facing atom like individuals This extraordinary volume augmented by a revealing new introduction by the editor Robert C Tucker can be seen as amplifying that remark nearly a half century after the death of Joseph Stalin himself Contributors to this work are Wlodzimierz Brus Katerina Clark Stephen F Cohen Alexander Erlich Leszek Kolakowski Moshe Lewin Robert H McNeal Mihailo Markovic Roy A Medvedev T H Rigby Robert Sharlet and H Gordon Skilling Robert C Tucker's principle work on Stalin has been described by George F Kennan as the most significant single contribution made to date anywhere to the history of Soviet power **Re-distribution from Above** Karuti Kanyinga, 2000 Using empirical evidence from the coastal district of Kenya an area with a long history of private land ownership this report challenges the key assumptions of the proponents of land individualization The author points to the many dysfunctions associated with land privatization and reinforces the growing critique that customary land tenure is far more complex and flexible than its critics are prepared to concede

Quatri me de couverture *Cronies or Capitalists? The Russian Bourgeoisie and the Bourgeois Revolution from 1850 to 1917* David Lockwood, 2009-05-27 Why wasn't there a successful bourgeois revolution in Russia Was it because Russian capitalists were too servile in their relationship with the Tsarist autocracy Or was it because Russian states Tsarist republican and Soviet were just too strong This book is a political history of the Russian capitalist class from 1850 to 1917 that seeks to answer these questions The book covers the consistent opposition of the Russian bourgeoisie to the Tsarist autocracy up to and including the revolution of 1905 It then considers its alliance from 1909 with new state elements officials politicians army officers and technical experts who were convinced of the possibility of reform and renovation through a radically reorganised state cleansed of its autocratic detritus Such a reorganisation was expected as a result of the Great War While these ideas came to a temporary fruition in the February Revolution of 1917 they also laid the basis for a much more demanding Soviet state in October and the destruction of the bourgeoisie itself The book ends with a consideration of the wider implications for the concept of the bourgeois revolution implications that stretch well beyond Russia that are revealed by the rise and fall of the Russian bourgeoisie

The Affirmative Action Empire Terry

Martin,2001-02-15 The Soviet Union was the first of Europe's multiethnic states to confront the rising tide of nationalism by systematically promoting the national consciousness of its ethnic minorities and establishing for them many of the institutional forms characteristic of the modern nation state In the 1920s the Bolshevik government seeking to defuse nationalist sentiment created tens of thousands of national territories It trained new national leaders established national languages and financed the production of national language cultural products This was a massive and fascinating historical experiment in governing a multiethnic state Terry Martin provides a comprehensive survey and interpretation based on newly available archival sources of the Soviet management of the nationalities question He traces the conflicts and tensions created by the geographic definition of national territories the establishment of dozens of official national languages and the world's first mass affirmative action programs Martin examines the contradictions inherent in the Soviet nationality policy which sought simultaneously to foster the growth of national consciousness among its minority populations while dictating the exact content of their cultures to sponsor national liberation movements in neighboring countries while eliminating all foreign influence on the Soviet Union's many diaspora nationalities Martin explores the political logic of Stalin's policies as he responded to a perceived threat to Soviet unity in the 1930s by re-establishing the Russians as the state's leading nationality and deporting numerous enemy nations
