Williams,2003 Clearing in the deep past Reaching out europe and the wider world The global forest **Power over Peoples**
Daniel R. Headrick,2012-06-28 A major history of technology and Western conquest For six hundred years the nations of Europe and North America have periodically attempted to coerce invade or conquer other societies They have relied on their superior technology to do so yet these technologies have not always guaranteed success Power over Peoples examines Western imperialism s complex relationship with technology from the first Portuguese ships that ventured down the coast of Africa in the 1430s to America s conflicts in the Middle East today Why did the sailing vessels that gave the Portuguese a century long advantage in the Indian Ocean fail to overcome Muslim galleys in the Red Sea Why were the same weapons and methods that the Spanish used to conquer Mexico and Peru ineffective in Chile and Africa Why didn t America s overwhelming air power assure success in Iraq and Afghanistan In Power over Peoples Daniel Headrick traces the evolution of Western technologies from muskets and galleons to jet planes and smart bombs and sheds light on the environmental and social factors that have brought victory in some cases and unforeseen defeat in others He shows how superior technology translates into greater power over nature and sometimes even other peoples yet how technological superiority is no guarantee of success in imperialist ventures because the technology only delivers results in a specific environment or because the society being attacked responds in unexpected ways Breathtaking in scope Power over Peoples is a revealing history of technological innovation its promise and limitations and its central role in the rise and fall of empire Some images inside the book are unavailable due to digital copyright restrictions **The Oxford Handbook of Analytical Sociology**

Peter Hedström,Peter Bearman,2011-01-06 Analytical sociology is a strategy for understanding the social world It is concerned with explaining important social facts such as network structures patterns of residential segregation typical beliefs cultural tastes and common ways of acting It explains such facts by detailing in clear and precise ways the mechanisms through which the social facts were brought about Making sense of the relationship between micro and macro thus is one of the central concerns of analytical sociology The approach is a contemporary incarnation of Robert K Merton s notion of middle range theory and presents a vision of sociological theory as a tool box of semi general theories each of which is adequate for explaining certain types of phenomena The Handbook brings together some of the most prominent sociologists in the world Some of the chapters focus on action and interaction as the cogs and wheels of social processes while others consider the dynamic social processes that these actions and interactions bring about Global History in China Xin Fan,2024-06-30 This book explores global history as an emerging field of scholarly studies in China today Readers are invited to rethink the origin of global history in China and to examine its current state Chinese scholarship is rooted in a warm appreciation of globalization in the age of Opening up and Reform and presented as a trendy transnational intellectual movement at the opening of the twenty first century On the one hand global history claims an identity of the new eager to criticize the Eurocentric bias embedded in the narratives of the old ones from world history on the other hand as an

emerging field it is yet to face competitions from national histories and area studies which are nurtured by latest state initiatives with outspoken political agendas As a whole global history captures Chinese scholars tenacious interest in studying globalization through the lens of history This book will interest historians China scholars and those trying to grasp the Chinese perspective on the world The Cambridge Economic History of Modern Britain Roderick Floud, Jane Humphries, Paul Johnson, 2014-10-09 A new edition of the leading textbook on the economic history of Britain since industrialization Combining the expertise of more than thirty leading historians and economists Volume 1 tracks Britain's economic history in the period ranging from 1700 to 1870 from industrialisation to global trade and empire Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and apply quantitative methods New approaches are proposed to classic issues such as the causes and consequences of industrialisation the role of institutions and the state and the transition from an organic to an inorganic economy as well as introducing new issues such as globalisation convergence and divergence the role of science technology and invention and the growth of consumerism Throughout the volume British experience is set within an international context and its performance benchmarked against its global competitors A Cultural History of Work in the Age of Enlightenment Anne Montenach, Deborah Simonton, 2020-09-17 Winner of the 2020 PROSE Award for Multivolume Reference Humanities The Enlightenment led to revised ideas about work together with new social attitudes toward work and workers Coupled with dynamism in the economy and the rise of the middling orders work was more frequently perceived positively as a commodity and as a source of social respectability This volume explores the cultural implications of the transition from older systems based on privilege control and embedded practices to a more open society increasingly based on merit and ability It examines how guild controls broke down and political and commercial systems loosened It also considers the theoretical justifications that brought new binding ideas such as the strengthening of ideology on home domesticity for the female and work and politics for the male North America embodied the extremes of these transitions with free workers able to make their way in a society based on ability and initiative while solidifying the ravages of the slavery system A Cultural History of Work in the Age of Enlightenment presents an overview of the period with essays on economies representations of work workplaces work cultures technology mobility society politics and leisure **Imaginations of Time in Lydgate and Hoccleve's Verse** Dr Karen Elaine Smyth, 2013-05-28 Using empirical research to explore medieval writers' imaginings of time this study presents a new morphology by which to study narratives of time in fifteenth century literary culture focusing on poems of John Lydgate and Thomas Hoccleve Karen Smyth begins with an overview of medieval time keeping devices and considers collective and individual attitudes and perceptions of time She then examines a range of Middle English authors' appropriations and innovations in relation to such perceptions identifying competitions of tradition and innovation allowing for an interrogation of commonly accepted medieval theories of time An empirically based morphology emerges and is used

to examine narratives of time in Lydgate and Hoccleve's work Through a series of close readings of selected short poems and Lydgate's Troy Book Fall of Princes and Siege of Thebes and of Hoccleve's Regiments of Princes and Series Karen Smyth looks at expressions of time and examples of the authors negotiation of time consciousness illustrating how both poets manipulate a range of cultural narratives of time in order to create multiple and sometimes competing temporalities within a single poem Smyth simultaneously draws attention to Lydgate's and Hoccleve's underestimated artistic skills and lays out a means to re-evaluate medieval cultural attitudes towards time

White Heat Carroll W. Pursell, 1994 Technology has been called the art of the twentieth century It is the expression of everything that makes us human Our myths and rituals our fantasies and creativity all find expression in our technology The ability to forge tools by the fashioning of metal in its white heat state was preceded by the creation of tools in stone This was the first indication of humanity's capacity to shape and use the raw materials available to it It reached its peak in the industrial revolution of the nineteenth century and today its momentum can be seen in every part of our lives It is this combination of technological creativity and human passion which Carroll Pursell pursues in White Heat Professor Pursell explores technology not as a succession of gadgets and gizmos but as a study of how society's values are embedded in them Written to accompany a major television series and illustrated with some surprising and fascinating photographs his book reveals a new layer of meaning to the devices tools and machines which have been developed throughout human history

Galileo's Pendulum Dusan I. Bjelic, 2012-02-01 Drawing on the theories of Michel Foucault Judith Butler and others who have written on the history of sexuality and the body Galileo's Pendulum explores how the emergence of the scientific method in the seventeenth century led to a de-emphasis on the body and sexuality The first half of the book focuses on the historical modeling of the relation between pleasure and knowledge by examining a history of scientific rationality and its relation to the formation of the modern scientist's subjectivity Relying on Foucault's history of sexuality the author hypothesizes that Galileo's pendulum as an extension of mathematics and the body must have been sexualized by schemes of

historical representation to the same extent that such schemes were rationalized by Galileo The second half of the book explores the problems of scientific methodology and attempts to return the body in an explicit way to scientific practice Ultimately Galileo's Pendulum offers a discursive method and praxis for resexualizing the history of Galilean science
