D'Oyly Carte Paul Seeley, 2021-11-29 This book considers and discusses aspects of the management of the D Oyly Carte Opera Company in the twentieth century since the death of its founder Richard D Oyly Carte and concentrates on key events that contributed to its demise in 1982 In this book Paul Seeley follows the analytical model that proposes no single factor triggered the collapse but rather several both external and internal In the case of an opera company the external factors may include public taste and market forces but more significant are the internal factors such as the management decisions taken in response to external factors and how these compare with the original artistic aims aspirations and business models of the founder This is a study by someone with close observation of the administration at the 1982 demise Seeley was assistant to the company manager having earlier served on the music staff The book is a must read for music historians theatre historians and arts management professionals as an uncompromisingly critical history of
