dancing to mass movement choirs Karl Toepfer presents this dynamic subject as a vital and historically unique construction of modern identity The modern body radiating freedom and power appeared to Weimar artists and intelligentsia to be the source of a transgressive energy as well as the sign and manifestation of powerful mysterious inner conditions Toepfer shows how this view of the modern body sought to extend the aesthetic experience beyond the boundaries imposed by rationalized life and to transcend these limits in search of ecstasy With the help of much unpublished or long forgotten archival material including many little known photographs he investigates the process of constructing an empire of appropriative impulses toward ecstasy Toepfer presents the work of such well known figures as Rudolf Laban Mary Wigman and Oskar Schlemmer along with less known but equally fascinating body culture practitioners His book is certain to become required reading for historians of dance body culture and modernism *Empire of Ecstasy* offers a novel interpretation of the explosion of German body culture between the two wars nudism and nude dancing gymnastics and dance training dance photography and criticism and diverse genres of performance from solo dancing

Visions of the Future Matthew

Rampley, 2025-06-10 Some of the most striking examples of modernist architecture are churches yet they have seldom been subject to extended critical analysis In this book Matthew Rampley provides just such an analysis focusing on the Catholic Church in interwar Austria Czechoslovakia and Hungary A powerful institution in the Habsburg Empire the Catholic Church continued to be a central social political and cultural agent after 1918 working in alliance with political parties and national governments to promote visions of a new national culture As a result church building took on an important ideological and political function Rampley's study is set against the backdrop of two interrelated issues the role of architecture in the Catholic Church's response to an increasingly secular modernity and church architecture as part of the Church's attempts to shape social and political life in the states that emerged after the collapse of Austria Hungary Rampley also examines the aesthetic cultural and political contexts that informed architectural projects including the conflict between Catholicism and social democracy the embrace of fascism Catholic theories of technology and discourses of regionalism and ruralism In bringing to light an untold chapter in the history of modern architecture this book also engages in methodological reflection on the implications of the study of modern church architecture for the historiography of modernism This book will appeal to students and scholars of architectural history religious and political history and interwar Central European history
