**John Reeves's History of the English Law, from the Time of the Romans to the End of the Reign of Elizabeth** John Reeves, 1869 Terror's Triumph William Meier, 2024-11-19 The idea of modern terrorism and the practice of terrorist violence emerged in Britain's first colony Ireland before spreading through imperial networks to South and East Asia to Africa and to the Middle East Thus empire not only birthed terror but also made it global And the sheer spread diversity and longevity of that empire produced multiple stages in the evolution of terrorism from rural intimidation to urban guerilla warfare to homegrown radicalism Indeed today's global terror challenges the ethics of counter terrorism the threats of Islamist and international terrorism and the rise of homegrown right wing extremism all have roots in colonialism

**The Materiality of Politics: Volume 1** Ranabir Samaddar, 2007-08-01 The Materiality of Politics uses a series of historical illustrations to reveal the physicality and underlying materiality of political processes Volume 1 subtitled The Technologies of Rule discusses the techniques of modern rule which form the basis of the post colonial Indian state Beginning with the rule of law the volume analyses the nature and manifestations of constitutional rule the relation between law and terror and the construction of extraordinary sovereign power The author also investigates the methods of care protection segregation and stabilization by which rule proceeds In the processes the material core of the cultural and the aesthetic is exposed     **Death Orders** Anna Geifman, 2010-05-20 This fascinating study shows how terrorism as developed and practiced in Romanov Russia has over the past century manifested itself as the template for modern and postmodern terrorism as a universal sociocultural psychological and existential experience irrespective of particular political causes ethnic distinctions and ideological boundaries Arguing that Russia is the birthplace of modern terrorism Death Orders The Vanguard of Modern Terrorism in Revolutionary Russia uses the nation as a case study of psycho historical patterns of worldwide terrorist activity during the past century Key features of early 20th century Russian political extremism serve as models for terrorist experiences in other periods and regions as author Anna Geifman builds a typology of a universal phenomenon The book shows how in Russia and elsewhere terrorists objectives have degenerated from punishment of individual adversaries and attempts to intimidate political elites to indiscriminate acts of political violence It shifts attention from ideology to practices that had been previously hidden ignored or rationalized demonstrating that what terrorists say about their motives may not be what actually drives them to brutality By looking closely at Russian precedents for the

general experience of modern political violence the book helps illuminate many obscure aspects of terrorism today     *The Law of Targeting* William H. Boothby, 2012-08-16 Targeting is the primary method for securing strategic objectives in an armed conflict Failure to comply with the law of targeting jeopardizes the achievement of those aims It is therefore essential that all those involved in or studying issues surrounding targeting have an accurate and complete understanding of this area of law This book offers the definitive and comprehensive statement of all aspects of the law of targeting It is a one stop shop that answers all relevant questions in depth It has been written in an open accessible yet comprehensive style and addresses both matters of established law and issues of topical controversy The text explains the meanings of such terms as civilian combatant and military objective Chapters are devoted to the core targeting principles of distinction discrimination and proportionality as well as to the relationship between targeting and the protection of the environment and of objects and persons entitled to special protection New technologies are also covered with chapters looking at attacks using unmanned platforms and a discussion of the issues arising from cyber warfare The book also examines recent controversies and perceived ambiguities in the rules governing targeting including the use of human shields the level of care required in a bombing campaign and the difficulties involved in determining whether someone is directly participating in hostilities This book will be invaluable to all working in this contentious area of law     A History of the French Revolution Henry Morse Stephens, 1891     *From the end of the reign of Louis the Fifteenth to the consulate of Napoleon Bonaparte* Thomas Edward Watson, 1900     **The Banality of Evil** Bernard J. Bergen, 1998 Takes its point of departure from Hannah Arendt's Eichmann in Jerusalem Focuses neither on Eichmann nor the Holocaust but on what Bergen sees as the political and philosophical consequences of the banality of evil These derive from the human failure to develop the thought will and judgment that are necessary to prevent the kind of evil committed by the Nazis Like Arendt Bergen is more concerned with totalitarianism than antisemitism often referring to her work *The Origins of Totalitarianism*     From the reign of Edward IV. to the reign of Elizabeth John Reeves, 1869     **The People [ed. by J. Barker]**. Joseph Barker,     Select Cases on the Law of Torts John Henry Wigmore, 1912
