Run Rhino Run:

Run, Rhino, Run Esmond Bradley Martin, Chryssee Martin, 1982 **Run Rhino Run**, 2017 *Poached* Rachel Love Nuwer, 2025-04-08 An intrepid investigation of the criminal world of wildlife trafficking the poachers the traders and the customers and of those fighting against it Journalist Rachel Nuwer plunges the reader into the underground of global wildlife trafficking a topic she has been investigating for nearly a decade Our insatiable demand for animals for jewelry pets medicine meat trophies and fur is driving a worldwide poaching epidemic threatening the continued existence of countless species Illegal wildlife trade now ranks among the largest contraband industries in the world yet compared to drug arms or human trafficking the wildlife crisis has received scant attention and support leaving it up to passionate individuals fighting on the ground to try to ensure that elephants tigers rhinos and more are still around for future generations As *Reefer Madness* Schlosser took us into the drug market or Susan Orlean descended into the swampy obsessions of *The Orchid Thief* Nuwer an award winning science journalist with a background in ecology takes readers on a narrative journey to the front lines of the trade to killing fields in Africa traditional medicine black markets in China and wild meat restaurants in Vietnam Through exhaustive first hand reporting that took her to ten countries Nuwer explores the forces currently driving demand for animals and their parts the toll that demand is extracting on species across the planet and the conservationists rangers and activists who believe it is not too late to stop the impending extinctions More than a depressing list of statistics *Poached* is the story of the people who believe this is a battle that can be won that our animals are not beyond salvation *Killing for Profit* Julian Rademeyer, 2012-11-08 A terrifying true story of greed corruption depravity and ruthless criminal enterprise On the black markets of Southeast Asia rhino horn is worth more than gold cocaine and heroin This is the chilling story of a more than two year long investigation into a dangerous criminal underworld where merciless syndicates will stop at nothing to attain their prize It is a tale of greed folly and corruption and of an increasingly desperate battle to save the rhino which has survived for more than 50 million years from extinction *Killing for Profit* is a meticulous devastating and revelatory account of one of the world's most secretive trades It exposes poachers gangsters con men mercenaries killers gunrunners diplomats government officials and other key players behind the slaughter And it follows the bloody trail from the front lines of the rhino wars in South Africa Zimbabwe and Mozambique to the medicine markets of Vietnam and the lair of a wildlife trafficking kingpin on the banks of the Mekong River in Laos *Rhinos of the World* Mario Melletti, Bibhab Talukdar, David Balfour, 2025-02-20 This book represents the culmination of more than four years of work by many rhino experts primarily from Africa Asia the United States and Europe involved in rhino conservation research and management It is one of the most comprehensive reference works ever published on the systematics ecology conservation status and management of all rhinoceros species Covering all five rhino species worldwide this volume brings together the contributions of 92 international rhino experts and provides A comprehensive overview of the current state of knowledge on the evolution phylogeny systematics and fossil

record of rhinos An in depth look at the ecology and conservation status of each species with detailed chapters A series of case studies on conservation management poaching horn trade and ex situ programs This beautifully illustrated book is an invaluable resource for researchers wildlife managers and professionals in conservation biology ecology and management as well as the general public It reveals the fascinating story of rhino evolution the long history of human interactions with rhinos and the major threats to these iconic species

Horn of Darkness Carol Cunningham, Joel Berger, 2000 The black rhino is nature's tank feared by all animals Even lions will break off a hunt to detour around one And yet the black rhino is on the edge of extinction its numbers dwindling from 100 000 at the turn of the century to less than 2 500 today The reason is that in places like Yemen China Korea Taiwan and Thailand the rhino's horn is more valuable than gold so valuable that people will risk their lives to harvest it To deter rhino poachers African governments have spent millions on helicopters paramilitary operations fences and guard dogs even relocation to protected areas Finally Namibia decided to dehorn its rhino population in a last ditch effort to stop the slaughter In 1991 Carol Cunningham and Joel Berger and their eighteen month old daughter Sonja went to Namibia to weigh the effects of dehorning on rhinos In *Horn of Darkness* they tell the story of three years in the Namib Desert studying Africa's last sizable population of free roaming black rhinos This is the closest most readers will come to experiencing life in the remaining wilds of Africa Cunningham and Berger writing nine chapters capture what it is like to leave the comforts of civilization to camp for months at a time in a land filled with deadly predators to study an animal that is reclusive unpredictable and highly dangerous The authors describe staking out water holes in the dead of the night creeping to within twenty seven meters of rhinos to photograph them all the while keeping a lookout for hyenas elephants and lions They recount many heart pounding escapes one rhino forces Carol Cunningham up a tree an unseen lion in hot pursuit of hyenas races right past a frozen Joel Berger and capture the adrenaline rush of inching closer to a rhino that might flee or charge at any moment They also give readers a clear sense of the careful patient work involved in studying animals the frustration of long days without finding rhinos or seeing other people coping with heat and thirst the Namib desert is one of the driest on Earth with dirt and insects driving hundreds of kilometers in a Land Rover packed to capacity slowing amassing records on one hundred individual rhinos over the course of several years And perhaps most important the authors reveal that the data they collected suggests that the dehorning project might backfire that in the four years after dehorning began calf survival was down the evidence suggests that hyenas might be preying on calves and the hornless mothers couldn't defend their offspring They also describe the dark side of scientific work from the petty jealousy of other scientists outside researchers were often seen as ecological imperialists to the controversy that erupted after the authors published their findings as furious officials of the Namibian conservation program denounced their findings and through delays and other tactics effectively withheld a permit to allow the couple to continue their study Weaving together the historical accounts of other naturalists a vividly detailed look at life in the wild and a behind the scenes glimpse of scientific work and the dark side

of the conservation movement Horn of Darkness is destined to be a classic work on the natural world *King Lonely Lion Looks at Letters* Aileen M. Gidney, 2013 *King Lonely Lion Looks at Letters* with its African based theme has not been written just to bring enjoyment to children and parents as a bedtime story and to assist educators and home schooling mums in the learning process It has also been written to be a way to encourage children to increase their vocabulary by searching the pictures in the story for other animals reptiles and insects that begin with the same letter of each story page It is extremely important to understand that *King Lonely Lion Looks at Letters* has a dual purpose It has not been written in the traditional alphabetical format of a b c but in a wonderful and adventure filled way that also allows a child to learn and practice the strokes required in writing the letters of the alphabet when this book is combined with the Phonics for Africa activity book As the author of this book I would encourage all parents educators and home schooling mums to remember that the teaching and learning process of our little ones should always be fun packed with enjoyment and carried out with a loving heart I can only hope that you and your children get as much excitement and enjoyment out of *King Lonely Lion Looks at Letters* as I did in writing it Aileen M Gidney *After They're Gone* Peter Marren, 2022-05-05 Wise challenging and offering some unexpected laughter in the dark this is a rational and insightful account of the sixth great extinction event Peter Marren is a brilliant writer and a national treasure PATRICK BARKHAM Thoughtful fascinating and very timely STEPHEN MOSS Important and thought provoking CAROLINE LUCAS GREEN PARTY MP Essential reading Marren makes a page turner out of Armageddon SIMON BARNES In his characteristic style Peter Marren has humanised the story of wildlife losses with humour and wit but also with his enormous knowledge and deep love for the living world MARK COCKER We are in the midst of an extinction event the sixth mass extinction on earth and one entirely caused by mankind All species become extinct sooner or later but we have accelerated that natural process several hundredfold and now it is happening right in front of our eyes Extinction has a terrifying finality to it And many species have already been lost to us forever there is little we can do about that What we can do however is reflect remember and ultimately acknowledge the unvarnished truth We must see the natural world as it is and not as we might want it to be Our trajectory is one that has benefited one species alone humankind For all other beings from mammals to fish from birds to insects and coral from plants to lichens and fungi the future for better or worse is in our hands *Running with Rhinos* Ed Warner, 2016-03-01 *Running with rhinos* is not a euphemism not when you're ground support for the International Rhino Foundation's Rhino Conservancy Project Edward M Warner a self proclaimed radical conservationist presents his outrageous adventures from more than a decade of collaboration with the veterinarians and biologists who care for endangered rhinos in Africa Few if any laymen like Warner have been invited to do what amounts to some of the most dangerous volunteer fieldwork around Fewer than five thousand black rhinos remain in the wilds of sub Saharan Africa About five hundred live on private conservancies in Zimbabwe For Warner working on the frontlines of rhino conservation not only allowed him to help rhinos it gave him the opportunity to pursue and refine his

emerging philosophy of radical conservationism to cultivate partnerships between local communities and private landowners in Africa and to export the lessons about land and wildlife management back home to the United States In *Running with Rhinos* Stories from a Radical Conservationist Warner takes readers along as he weasels his way into becoming volunteer ground support for the International Rhino Foundation s Rhino Conservancy Project or Rhino Ops in Zimbabwe It is gritty sweaty sometimes scary and exhilarating work Warner succeeds in telling a remarkable story of the extraordinary bonds between humans and their dedication to protecting endangered animals all while weaving eye opening stories about the flora fauna geology geography and politics of sub Saharan Africa

Tiger Bone & Rhino Horn Richard Ellis, 2013-02-22 In parts of Korea and China moon bears black but for the crescent shaped patch of white on their chests are captured in the wild and brought to bear farms where they are imprisoned in squeeze cages and a steel catheter is inserted into their gall bladders The dripping bile is collected as a cure for ailments ranging from an upset stomach to skin burns The bear may live as long as fifteen years in this state Rhinos are being illegally poached for their horns as are tigers for their bones thought to improve virility Booming economies and growing wealth in parts of Asia are increasing demand for these precious medicinals Already endangered species are being sacrificed for temporary treatments for nausea and erectile dysfunction Richard Ellis one of the world s foremost experts in wildlife extinction brings his alarm to the pages of *Tiger Bone Rhino Horn* in the hope that through an exposure of this drug trade something can be done to save the animals most direly threatened Trade in animal parts for traditional Chinese medicine is a leading cause of species endangerment in Asia and poaching is increasing at an alarming rate Most of traditional Chinese medicine relies on herbs and other plants and is not a cause for concern Ellis illuminates those aspects of traditional medicine but as wildlife habitats are shrinking for the hunted large species the situation is becoming ever more critical One hundred years ago there were probably 100 000 tigers in India South China Sumatra Bali Java and the Russian Far East The South Chinese Caspian Balinese and Javan species are extinct There are now fewer than 5 000 tigers in all of India and the numbers are dropping fast There are five species of rhinoceros three in Asia and two in Africa and all have been hunted to near extinction so their horns can be ground into powder not for aphrodisiacs as commonly thought but for ailments ranging from arthritis to depression In 1930 there were 80 000 black rhinos in Africa Now there are fewer than 2 500 Tigers bears and rhinos are not the only animals pursued for the sake of alleviating human ills the list includes musk deer sharks saiga antelope seahorses porcupines monkeys beavers and sea lions but the dwindling numbers of those rare species call us to attention Ellis tells us what has been done successfully and contemplates what can and must be done to save these animals or sadly our children will witness the extinction of tigers rhinos and moon bears in their lifetime

The Trade in Wildlife Sara Oldfield, 2014-10-14 Annotation Regulation of the international trade in wildlife is failing Why How do we stop more and more plant and animal species from being endangered Leading authorities in the field show why it is not working and what needs to be done Essential reading for those working in the areas of trade environment and conservation The regulation of the trade in wildlife is failing increasing numbers of plant and animal species are threatened with extinction despite improvements in our understanding and the management of global trade Understanding why and what to do about it is urgently needed This book provides a critical assessment of how the trade in wildlife is currently regulated and how those regulations are enforced Through analysis of case studies and comparisons with the trade in other illegal goods it shows what the weaknesses are where the system is failing and what must be done if conservation efforts are to be supported by trade regulations and not undermined *Osiris, Volume 40*

Tamar Novick, Lisa Onaga, Gabriel N. Rosenberg, 2025-07-14 Situates animal mobility within the politics of movement opening new perspectives in the history of science Human societies often come to know the natural world by examining animals even as animals frequently both willful and animate can elude human grasps and challenge human aims Animals and their movements have underpinned many methodological moral and epistemic dilemmas that generatively trouble the field Featuring a range of geographies species languages and cultures the contributions in this volume broaden the view of the historical roles animals play in knowledge production processes Organized according to three scales of animal movement individuals groups systems the twelve richly illustrated inquiries are situated in different time periods from the sixteenth century Ottoman Empire to the recent globalized past and introduce varied forms capacities and politics of movement associated with animals The analytic attention to animal mobility deepens comprehension of animal agency and human animal interactions in unexpected spaces including airports entertainment venues living rooms dirt roads and waterways Taken together the case studies in this volume reconsider how where and by whom science is done *Nature Crime*

Rosaleen Duffy, 2010-08-31 The perilous state of endangered species such as tigers and rhinos and the worldwide illegal trade in ivory diamonds bushmeat and many other rare and valuable commodities are familiar issues in the West The heroes in these narratives are those who work to create protected areas for wildlife the villains the shadowy poachers and smugglers who destroy endangered animals and their habitats for the sake of profit In this groundbreaking book Rosaleen Duffy argues that the story is much more complex than this She analyses the workings of the black market wildlife industry pointing out that illegal trading is often the direct result of Western consumer desires from coltan for mobile phones to caviar for the global elite She looks at how tourists contribute often unwittingly to the destruction of natural environments Most strikingly she argues that the imperatives of Western style conservation often result in serious injustice to local people who are at risk of losing not only their land but sometimes even their lives The result of many years of first hand research this

book is essential reading for anyone who wants to understand the complex realities of nature conservation Jacket

Conservation and Sustainable Use E. J. Milner-Gulland, J. Marcus Rowcliffe, 2007-11-15 The relentless exploitation and unsustainable use of wildlife whether for food medicine or other uses is a key concern for conservationists worldwide Indeed wildlife conservation and sustainable use have recently become centrepieces in conservation and development research Assessment interpretation and ultimate action in a scientific study of exploited species must consider numerous factors from the biology habitat requirements and population dynamics of the species in question to the relationships that people have with their environment and the species within it Any long term management plan must ensure that people and wildlife can coexist otherwise it is doomed to failure Conservation and Sustainable Use provides a practical and integrated approach to carrying out research on the conservation of exploited species It is relevant to both tropical and temperate biomes and is applicable to all exploited species including mammals fish and plants It describes both the practical field and theoretical modelling techniques for obtaining and interpreting information integrating biological social economic and institutional analyses It also demonstrates how to translate information into effective action through appropriate interventions from legislation to changing people's attitudes This is the first time that all these issues have been covered together in a single practically orientated volume This book will be essential reading for graduate level students and researchers in conservation biology human ecology sociology and resource economics It will also provide an important reference for anyone who is interested in carrying out a scientifically based conservation programme for an exploited species including field biologists wildlife managers and practitioners in the fields of conservation and international development *Somewhere East of Eden*

Michael McKeown, 2017-11-07 From the author of *Half Way Down an African Moon* comes an evocative account of random journeys undertaken in Africa over the last thirty years Written at a time when the natural world everywhere is being heedlessly plundered and exploited as never before these recollections impassioned comic ironic and critical by turn are a reminder that in everything but multi national corporate cupidity the damage may well be irreparable Whether drifting in a fishing boat among lurking pods of unpredictable hippos down the Zambezi tracing the demise of the hapless Dodo in Mauritius trekking for lowland gorillas in the rainforests of south east Nigeria in the company of a wryly erudite local parks ranger or pondering the Stone Age mind set of wealthy trophy hunters the author's exhilaration for wildlife and nature glows through the prism of a gradually darkening lens The current state of our natural world may look bleak but giving up on it as he reminds us is not an option **Megaherbivores** R. Norman Owen-Smith, 1988 An account of the limitations and advantages conferred by large body size

Mega Mammals in Ancient India Shibani Bose, 2020-01-02 Since antiquity big mammals have inspired fear as well as fantasy among humans Not only do megafauna pervade the domains of religion art literature and folklore it is also now widely acknowledged that they can serve as important if not always adequate indices of environmental quality In this book Shibani Bose looks into eras bygone in order to chronicle the journeys of three mega

mammals the rhinoceros elephant and tiger across millennia in early north India Carefully sifting through archaeological evidence and literary records in Sanskrit Pali Prakrit and classical Western accounts Bose documents the presence of these big mammals in diverse cultural contexts from hunter gatherer societies to the first urban civilization of India and beyond This work aims to reconstruct human interactions with these mega species through time while trying to understand the larger ecology of ancient India This book is especially well timed as the conservation of our megafaunal heritage is a major concern for biologists ecologists and conservationists It underlines the need to historicize human interactions with these mega mammals with the contention that awareness regarding their past is critical for their future **Strange and**

Wonderful Karen Polinger Foster, 2020-05-04 Ever since the creation of the world's first botanical and zoological gardens five thousand years ago people have collected displayed and depicted plants and animals from lands beyond their everyday experience Some did so to demonstrate power over distant territories others to enhance prestige by possessing something no one had seen before Exotica also satisfied intellectual curiosity furthered scientific research and educated and entertained In addition exotica especially their state sponsored representation were often instruments of political persuasion and in turn exerted considerable influence over expansionist policies More than an account of gardens and menageries from antiquity to the present Strange and Wonderful explores the imagery of exotic flora and fauna in Western art seeking answers to certain fundamental and universal questions How do artists schooled in traditional modes of rendering the familiar deal with the new and strange Why are rare species deliberately introduced into images otherwise devoid of the unusual What is the pictorialized relationship between exotic reality and artistic imagination Karen Polinger Foster takes readers on a journey across millennia and around the globe telling fascinating stories and meeting along the way such characters as Hatshepsut's baboons Charlemagne's elephant Durer's rhinoceros and Victoria's hippopotamus What emerges is a sense of just how strong and far reaching the pull of the unknown and exotic has been across time and space Ultimately images of the wonderful reveal as much about the indigenous as they do about the strange enabling us to glimpse more vividly the power of imagination to mold the unknown to its purposes This dazzling and richly illustrated volume offers a thoughtful much needed inquiry into a very human phenomenon

An Arid Eden Garth Owen-Smith, 2011-02-02 Two remarkable tales woven together the story of the Kaokoveld an arid eden in the remote north west of Namibia so nearly lost but regained to become one of Africa's iconic wildlife tourism destinations and also the story of a young man's search for an African way to do conservation in Africa Garth Owen Smith first visited the Kaokoveld in 1967 It was a life changing experience His unconventional ideas challenged both the conservation establishment and the former South African regime Despite this community based conservation was pioneered in the Kaokoveld and today Namibia is a world leader in this field But the early years when the foundation for this ground breaking approach to conservation was laid are largely forgotten and untold *An Arid Eden A Personal Account of Conservation in the Kaokoveld* brings those years alive through the eyes of Owen Smith

spanning four and a half decades of extraordinary dedication passion and achievement The author and his partner Dr Margaret Jacobsohn have won some of the world s most prestigious conservation awards for their work in Namibia which has always challenged conventional wisdom The NGO they founded continues to break conservation agricultural and rural development paradigms
