The Dynamics of Corporate Social Responsibilities Radu Mareş, 2008 This book proposes that the responsible business practices of leading companies are significant not only as isolated instances of self regulation but that they also contribute to a broader rule making process which has been underway in the last decade and is aimed at making business more responsive to human rights and environmental concerns The flexibility of existing laws as well as the emergence of new regulations relevant to corporate social responsibility CSR are highlighted As CSR increasingly interacts with public policy some insufficiently understood effects of CSR appear that can help us advance toward more systemic solutions in the business and human rights area This study identifies variables that states can stimulate through a wide range of interventions ranging from capacity building measures to policy to hard law so that responsible practices get diffused more broadly and deeply in the business community The intended audiences are legal experts with an interest in enhancing the protection of human rights in developing countries and CSR theorists and practitioners mindful of the broader social dynamics that surround the implementation of CSR commitments Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations for 2003 United States. sustainability and responsibility At one end of this continuum are stakeholders who believe the only way to achieve a sustainable and socially conscious society is to establish and enforce regulations with the concomitant governmental organizations to oversee and enforce those regulations At the other end are those who consider firms to be crucial organizations for achieving sustainability and socially responsible outcomes and who feel it is the responsibility of stakeholders to determine the legitimacy of firms actions It is probably not the case that any economies exist at either end of this continuum but it is clear that the availability of reliable information is critical for any stakeholder to review the performance of either the governments or the firms This book presents a varied set of papers that explore the issues that must be considered regardless of which position a stakeholder takes
