Stirling,2023-05-12 The COVID 19 pandemic provides stark evidence of the importance of medicine on a global scale
However revisiting the influenza pandemic of 1918 provided a perspective as we searched for a viable vaccine and instituted
public health measures This shows that medical knowledge is an accumulative process extending to the past and it is in the
spirit of that legacy that this bibliography has been compiled The book is a one stop resource that cites literature related to
the historical aspects of medicine It also acknowledges medicine s global reach and devotes significant effort in that respect
Although the online world seems to dominate on both a social and educational level there is still a need for thoughtfully
curated and focused reference works and this bibliography accomplishes that goal The book has 9 000 citations It utilizes the
WHO s International classification of Diseases for the section on diseases and disorders and the U S Food Drug
Administration s Product Code Classification Database for the section on medical devices equipment and instruments It
includes detailed subject geographic and people indexes for an easy reference Virology Robin Nicholas, David
