Wonder as a New Starting Point for Theological Anthropology José Francisco Morales Torres, 2023-04-04 In

Wonder as a New Starting Point for Theological Anthropology Opened by the World Jos Francisco Morales Torres constructs a new theological anthropology that begins with wonder He contends that the visceral experience of wonder is an opening up of the human by an excess that saturates the world This opened by ness points to a transforming receptivity as the basis of the person and to an extravagant Generosity that grounds all creation Thus wonder which is grounded in generous Excess is not only a gift but a demand it calls for a liberative praxis that resist the forces that flatten the fullness of life into what is useful and profitable and that reduce the limitless worth of fellow humans to mere commodities to be exploited and exchanged at the altar of the idolatrous Market Wonder reveals a primordial receptivity in the human person which demands of us an ethic of sustainability that does not reduce the other to commodity a vulnerability that risks being opened by the other a commitment to solidarity and liberation that resist the forces of an insatiable idolatrous Market that seeks only to steal and kill and destroy

The Moral Psychology of Shame
Alessandra Fussi,Raffaele Rodogno,2023-02-01 Few emotions have divided opinion as deeply as shame Some scholars have argued that shame is essentially a maladaptive emotion used to oppress minorities and reinforce stigmas and traumas an emotion that leaves the self at the mercy of powerful others Other scholars however have argued that the absence of a sense of shame in a subject their shamelessness is tantamount to a vicious moral insensitivity As the eleven original chapters in this collection attest however shame scholars are entering a new phase one in which scholarship no longer attempts to defend one side of shame against the other but rather accepts both faces as faithful to the phenomenon to be explained At the core of our understanding of shame there are profound disagreements about the importance of the Other in shaping our moral identity As this collection shows by its study of shame the difficulty of the connection between Self Other and morality spans over millennia and cultures and currently animates important debates at the core of feminism and disability studies Contributors Mark Alfano Alessandra Fussi Lorenzo Greco JeeLoo Liu Katrine Krause Jensen Heidi L Maibom Tjeert Olthof Imke von Maur Alba Montes S nchez Raffaele Rodogno Alessandro Salice Krista K Thomason ngrid Vendrell Ferran

Studia Phaenomenologica: Vol. XV / 2015 - Early Phenomenology Dermot Moran,Rodney K.B. Parker,2016-02-01

Empathy, Sociality, and Personhood Elisa Magrì,Dermot Moran,2018-03-12 This book explores the phenomenological investigations of Edith Stein by critically contextualising her role within the phenomenological movement and assessing her accounts of empathy sociality and personhood Despite the growing interest that surrounds contemporary research on empathy Edith Stein s phenomenological investigations have been largely neglected due to a historical tradition that tends to

consider her either as Husserl's assistant or as a martyr. However, in her phenomenological research, Edith Stein pursued critically the relation between phenomenology and psychology, focusing on the relation between affectivity, subjectivity, and personhood. Alongside phenomenologists like Max Scheler, Kurt Stavenhagen, and Hedwig Conrad Martius, Stein developed Husserl's method, incorporating several original modifications that are relevant for philosophy, phenomenology, and ethics. Drawing on recent debates on empathy, emotions, and collective intentionality, as well as on original inquiries and interpretations, the collection articulates and develops new perspectives regarding Edith Stein's phenomenology. The volume includes an appraisal of Stein's philosophical relation to Edmund Husserl and Max Scheler and develops further the concepts of empathy, sociality, and personhood. These essays demonstrate the significance of Stein's phenomenology for contemporary research on intentionality, emotions, and ethics. Gathering together contributions from young researchers and leading scholars in the fields of phenomenology, social ontology, and history of philosophy, this collection provides original views and critical discussions that will be of interest also for social philosophers and moral psychologists.

Narrative and Self-Understanding Garry L. Hagberg, 2019-11-15. This exciting new edited collection bridges the gap between narrative and self-understanding. The problem of self-knowledge is of universal interest; the nature or character of its achievement has been one continuing thread in our philosophical tradition for millennia. Likewise, the nature of storytelling, the assembly of individual parts of a potential story into a coherent narrative structure, has been central to the study of literature. But how do we gain knowledge from an artform that is by definition fictional, by definition not a matter of ascertained fact, as this applies to the understanding of our lives? When we see ourselves in the mimetic mirror of literature, what we see may not just be a matter of identifying with a single protagonist, but also a matter of recognizing long-form structures, long-arc narrative shapes.

that give a place to and thus make sense of the individual bits of experience that we place into those structures But of course at precisely this juncture a question arises do we make that sense or do we discover it The twelve chapters brought together here lucidly and steadily reveal how the matters at hand are far more intricate and interesting than any such dichotomy could accommodate This is a book that investigates the ways in which life and literature speak to each other **Science**

Meets Philosophy Hans Christian Garmann Johnsen, 2023-04-26 The book is an attempt to bring together what are often seen as incommensurable scientific and philosophical positions Its core argument is that a main reason for the divisions about what constitutes scientific knowledge relates to disagreements on philosophical issues The book explores what these disagreements are about and discusses whether they can be overcome Taking a historical perspective the book traces the divides in science back to three main philosophical traditions realism idealism and scepticism It maps how these have inspired three main current positions in science logical empiricism phenomenology and sociology of scientific knowledge The book is intended for a general audience concerned with today's debates on scientific knowledge and society It will be useful for students and researchers studying philosophy of science sociology of scientific knowledge realism phenomenology positivism logical empiricism analytical philosophy and sustainable scientific knowledge **The Matrix of Christian**

Michener, 2013-12-06 Patrick Nullens and Ronald T Michener seek to revitalize Christian ethics through an integrative approach to classical ethics Their matrix of consequential principle virtue and value ethics provides an alternative to postmodern situation ethics and brings the framework of biblical wisdom to bear on contemporary ethical questions **Postmodernism and Continental Philosophy** Hugh J. Silverman, Donn Welton, 1988-04-07 The

volume begins with a major statement by the French feminist culture critic Julia Kristeva and includes essays by well known and also younger continental philosophers writing in the North American context and reassessing the European heritage its limits and effective futures **Edith Stein's On the Problem of Empathy** Timothy A. Burns, 2024-05-15 Empathy Einf

hlung as a crucial concept for understanding ourselves others and communities was a central topic of interest in the first half of the twentieth century amongst philosophers and in the emerging sciences of psychology and sociology Edith Stein's dissertation and inaugural publication On the Problem of Empathy introduces her unique take on empathy embodiment phenomenology and intersubjectivity Her immersion in phenomenology and her intimate familiarity with the psychology and sociology of her day make it a challenge for contemporary readers to understand This companion provides a guide to Stein's first philosophical masterpiece The opening essays including a contribution from ngrid Vendrell Ferran indicate the most important influences on Stein's thought circa 1917 the structure and method of her argument the place of this work in her oeuvre its historical significance and its relevance for contemporary philosophical discussions Timothy Burns then provides a clear and detailed summary of each section of Empathy elucidating the argument that weaves through this classic of philosophical thought **The Publishers' Trade List Annual** , 1985 *Dynamics of Discernment* Stephen J.
