Saint Denis made it truly one of the most beautiful churches in Europe. Students of history and architecture know Suger best for his work on Saint Denis, the burial site of medieval French kings, queens, and nobility. The abbot enlarged, decorated, improved, and redesigned the building so beautifully that it is safe to say that he became the foremost church architect of twelfth-century France. The man, however, was so much more than an architect. He served as a counselor and member of the courts of King Louis VI and VII, who sent him across Europe on diplomatic missions. He represented those kings at the papal curia and imperial diets. He was also a close friend and confidante of King Henry I of England, whom he often visited on behalf of French royal interests. Never shy, Suger seems almost obsessed that his works and deeds not be forgotten. He acquired numerous properties and estates for his abbey as well as improved the ones it already possessed. He built new buildings, barns, walls for villages, and increased the return of grain from all the abbey's lands. Readers interested in the medieval agricultural system and way of life will also enjoy these texts. Suger's texts also provide a wealth of information about the events of his era as well as a large amount of biographical material on his accomplishments. This translation of his writings intends to enhance his reputation and make his name better known by students at all levels and among those interested in medieval topics.

**Chinese Economists on Economic Reform - Collected Works of Ma Hong** Ma Hong, 2013-12-04 This book is part of a series which makes available to English-speaking audiences the work of the individual Chinese economists who were the architects of China's economic reform. The series provides an inside view of China's economic reform, revealing the thinking of the reformers themselves, unlike many other books on China's economic reform which are written by outside observers. Ma Hong (1920-2007) was one of the leading advocates for China's market-oriented reforms, one of the earliest scholars to adopt the concept of a socialist market economy. Politically active from the 1930s when he campaigned against the Japanese occupation, he held many important posts, notably President of the Chinese Academy of Social Sciences in the 1980s. He was particularly influential in the field of industrial economics, putting to use his own experiences of managing industrial enterprises and a strong advocate of the need for China's economic development to be stable. The book is published in association with the China Development Research Foundation, one of the leading economic and social think tanks in China, where many of the theoretical foundations and policy details of economic reform were formulated.
